## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

The General Printing Act, approved January 12, 1895, created the Office of Superintendent of Documents, and defined the duties of the Superintendent. One of these duties was the preparation of a monthly catalogue, provided for as follows:

"Section 69. A catalogue of Government publications shall be prepared by the superintendent of documents on the first day of each month, which shall show the documents printed during the preceding month, where obtainable, and the price thereof."

The first issue under this provision was made for the month of January, 1895, being numbered one (1) of the series, and the issue was continued in practically the same form (that of Governmental author by department) up to January 1, 1906 (no. 133), when the form was changed to Governmental author by issuing office.

In December, 1897 (no. 36), a new and very useful feature, an index, was introduced, and beginning in February, 1900 (no. 62), the catalogue was further improved by making the index cumulative from January to June and July to November, with a yearly index in the December number.

With these additions, and as a result of the careful work which was put upon it by the catalogue force, the Monthly catalogue assumed an important place on the reference shelves of the libraries and became a handy manual for all persons interested in United States Government publications. In fact, from the returns received from the libraries in answer to questions relative to the usefulness of the publications of this Office, it is evident that the Monthly catalogue has been more widely used and more highly prized than either the Document catalogue or the Document index.

It was not the intention of Congress, however, to have the work of cataloguing done in duplicate. Its purpose in legislating was to provide for a "Comprehensive index," or catalogue, which should be the permanent official record of all Government publications both Congressional and Departmental; a "Consolidated index" to the numbered Congressional documents and reports, instead of numerous indexes distributed through the volumes composing the four series—that is, Senate documents, Senate reports, House documents, and House reports, and a Monthly catalogue to be issued "on the first

day of each month," and which should show "the documents printed during the preceding month, where obtainable, and the price thereof."

This legislation for a Monthly catalogue really contemplated a list of available publications, to be issued promptly, and to tell where they could be obtained and whether free or at what cost.

Obviously the Catalogue as issued up to the present time has not strictly complied with this law, as it has been composed mainly of entries for documents and reports which were not "available" at any price.

In order to comply more strictly with the law and make it possible with a limited force of trained people to issue the Document catalogue and Document index more promptly, and in view of the fact that these same experts must be used in the reorganization of the Superintendent of Documents' Office, it became necessary to eliminate from the Monthly catalogue those valuable features which were not specifically directed by law, and which only a law and an additional force of experts would warrant.

The sacrifice of the cumulative index was one which economy and the avoidance of duplication demanded. No doubt it was valuable; but since it delayed the issue of the more important bibliographical publications, its elimination was considered wise.

The dropping of this feature necessitated a less involved form of entry, and, as an experiment, the issuing office was chosen. There is a diversity of opinion as to the advisability of this experiment, even with those who are unanimous in their condemnation of the removal of the index.

After careful consideration of the subject, and the Office being still in a condition of reorganization which would not warrant action looking to the reinstatement of the old form and index, no matter how advisable that might seem to many, the issue in its present form is submitted for your generous criticism.

The main feature in this new form is the subject arrangement, rather than that by Governmental author, which, without an index, was voted to be too cumbersome, although it possessed many advantages. The form of subject headings used in the Document catalogues of this Office has been adopted for use in the Monthly catalogue so as to secure uniformity in the subject treatment of the publications. References will be made to the subject so that the publication will be fully covered. The typography has been only slightly changed in order to use machines in the composition. The paper is of a much better quality, and it will be the endeavor of this Office, as in all its publications, to have the presswork and other mechanical operations first class, that the catalogues may be not only accurate but easy of reference and pleasing to the eye.

No publication will be entered which is *not* "obtainable." In the past, entries made for certain publications which had been printed

but were not obtainable, have caused the various publishing bureaus endless annoyance, and it is to avoid this difficulty that the titles of such publications are omitted. These titles will, of course, appear in the Document catalogues.

The asterisk (\*) and a price indicate as formerly that the work can be purchased at this Office at the price named. In cases of distribution or sale by the publishing office an obelisk (†) will appear, indicating that application should be made direct to that office. Even in this way we will doubtless present many titles of books which, when called for, will not be sent on account of a limited edition or because a large edition has been exhausted; but we shall endeavor to give information which will lead to the procuring of a book rather than to useless correspondence.

The cover pages will be used for advertising purposes and will not be paged into the monthly issues, and the monthly issues will not be made up for volumes.

Some space will be devoted each month to book talks and notes of special interest, and it is hoped that in this way much valuable information relative to old and current publications may be circulated.

---

This issue of the catalogue contains entries of numerous valuable publications. The Yearbook of the Department of Agriculture for 1906 is now being distributed. The price fixed by this Office is a nominal charge for a volume containing many valuable articles (as will be seen by an examination of the list of contents included in the entry on the second page of the catalogue, under the heading "Agriculture Department") and which is substantially and neatly bound in durable blue cloth, profusely illustrated, and printed on first-class paper. The fact that 500,000 copies are annually printed under the law for distribution by Congress and the Agriculture Department is an indication of the popularity of the volume among farmers. It is extremely difficult for this Office to keep on hand for sale a sufficient stock to supply the constant demands.

---

Games of North American Indians, by Stewart Culin, is the title of an 846-page, large octavo volume which is stated on the title-page to be an "extract from the Twenty-fourth Annual Report of the Bureau of American Ethnology." It forms, in fact, the larger part of the Report volume. As the title indicates, the work is one of unusual interest, for the development of a nation is largely reflected in its games. Numerous plates and text figures add greatly to the interest of a work of this character, and the policy of the Bureau is to spare no time or labor in perfecting its illustrations.

On the back cover of this catalogue will be found some "Important Information," which will aid in ordering documents from this Office. We are somewhat hampered in our business intercourse by the usual and seemingly unavoidable red-tape, by restrictive legislation, and by ignorance of the functions of this Office by the library world and the general public. It is hoped that by continuing to publish these bits of "Important Information" we will avoid exasperating delays and perplexing complications.

### Geological Survey.

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply and irrigation papers, which are intended for free distribution; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

Publications of Geological Survey sold by superintendent of documents. [1907.] 54 p. narrow 12° (Documents Office. Price list 15.) \*

#### Topographic sheets—

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About three-tenths of the area of the country, excluding Alaska, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Northern and Northwestern Lakes Survey.**

NOTE.—Lake Survey charts may be obtained from U. S. Lake Survey Office, Detroit, Mich., or from U. S. Engineer Office, Buffalo, N. Y. Payments must be made before charts are sent, and if made by mail must be by postal or express money order payable to the order of U. S. Lake Survey Office if ordered from Detroit, or to the order of U. S. Engineer Office if ordered from Buffalo. These charts may also be obtained, for cash only, at U. S. Canal Office at Sault Ste. Marie, Mich. They will be sent by express, the express charges to be paid by the purchaser on receipt of the charts, or free by mail at the purchaser's risk. Purchasers should indicate, when ordering the charts, whether they wish them sent by express or mail. The latter will be used when no choice is indicated.

The bulletins and supplements of the Lake Survey may be obtained free upon application at U. S. Lake Survey Office, Detroit, Mich., and at the engineer offices in Duluth, Milwaukee, Chicago, Grand Rapids, Cleveland, Buffalo, and Oswego.

### Patent Office.

NOTE.—The Patent Office publishes specifications and drawings of patents, both in single copies and monthly volumes, the former at 5c. and the latter at \$5.00. The former are not enumerated in this catalogue. For certified copies of patents, including specification, drawing, certificate, and grant, the price is 80c. A variety of indexes, giving a complete view of the work of the Office from 1790 to date, are published at prices ranging from 25c. to \$10.00 per volume. The Rules of practice and pamphlet Patent laws are furnished free. The Patent Office issues coupon orders in packages of 20 at \$1.00 per package, or in books containing 100 coupons at \$5.00 per book. One coupon will procure a specification with drawings, and two coupons a copy of the Official gazette. They are good until used. Address Chief Clerk, Patent Office.

Official gazette, July 2-30, 1907; v. 129, nos. 1-5. 1907. c. t. o. [clx]+1-2078 p. il. large  $8^{\circ}$  [Weekly.] † Paper, 10c. single copy, \$5.00 a yr.

#### **Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special papers. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to designated public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world; may be had by purchase at cost from the Superintendent of Documents, and may also generally be obtained free of charge from the applicant's Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution. The annual reports are included in the Congressional set.

Smithsonian miscellaneous collections, quarterly issue, v. 4, pt. 1. Washington, Smithsonian Institution, 1907. c. t. o. p. 1-131, 29 [31] il. 14 pl. (Pub. 1703.) [Part of Smithsonian miscellaneous collections, v. 50.] †

## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

The July issue of the Monthly Catalogue, in its new arrangement and more attractive dress, was received by those to whom it is sent gratuitously with scarcely a word of either condemnation or praise. The letters of commendation received are so few that they are conspicuous. It would have been much more satisfactory to this Office had it received several hundred complaints, as it would have indicated that the librarians and others profiting by the generosity of the Government took at least enough interest in the publications they were receiving to protest against any change which they deemed unwise.

We are not asking for compliments, but a candid expression of opinion, favorable or otherwise, would be appreciated; whereas silence indicates a marked indifference as to what changes are made or what is attempted.

One of the criticisms which we received related to the omission of titles of publications not available, the writer fearing that their omission would seriously affect the librarians' knowledge of what publications should be received by designated depositories. Such fears are groundless, because of the fact that with each shipment sent to a designated depository a carefully prepared printed invoice is forwarded, which can now be relied upon as listing every publication printed at the Government Printing Office and "made for distribution" since the date of the previous invoice.

Prior to the carefully planned campaign which this Office has carried on in order to secure everything possible for the libraries, there was no one with any say in the matter who appreciated the advantages of printing everything possible for the libraries, and consequently many omissions occurred.

Such a state of affairs no longer exists. The officials of the Government Printing Office are earnestly working with us to supply everything which the law contemplates shall be sent to depositories, and it will be seldom that anything is overlooked in the future. Careful checking of these invoices and the filing of them for reference will insure first-class information as to the output of the Government Printing Office.

Not long ago a pamphlet was sent out to the depositories showing what annual and serial publications should regularly be sent them.

To quote from a note in the invoice under which this pamphlet

was distributed: "The list is arranged by Departments and publishing offices with the series stated briefly thereunder. No attempt was made to give exact titles, but their popular designations are entered with references to their position, either in the sheep-bound Congressional set or in the annual report volumes."

In order to make this list serve a double purpose, an explanation was attempted in the same invoice showing how it could be used in determining which publications would be, in the future, under the provisions of the new law of March 1, 1907, sent out unnumbered, although Congressional in character. The printer made the sentence read "numbered" instead of "unnumbered," and thereby lost the whole point of the paragraph. It is here reprinted in its correct form:

Commencing with the publications of the Sixtieth Congress, first session, the titles designated as "in the sheep-bound set" will be received *unnumbered* and bound in a manner "as directed by the Joint Committee on Printing." (Public No. 153, 59th Congress, 2d session, Session Laws, p. 1012.)

In this same invoice attention was called to the lack of interest in the publications of the Superintendent of Documents' Office manifested by the librarians, as follows:

"I am reminded that the returns from our question circulars would indicate that the librarians, and especially those of depository libraries, find the catalogues of this Office of no benefit to them, as not half of the libraries questioned reported, even though they were threatened with being dropped from the list if they failed to do so.

"None of the depositories were held under this ruling and all are still receiving catalogues, but it is a question as to whether the Government should continue to print and distribute, at an enormous expense, library aids which are not appreciated or desired."

The following able editorial, referring to the above, appears in the August number of the Library Journal:

"We were obliged last month to confess to ingratitude or carelessness on the part of librarians in failing to order certain books reprinted at A. L. A. request. We regret to record a still more discouraging instance. The new Superintendent of Documents, Mr. Post, is doing his best to give libraries what they need and want, and he has wisely asked that those librarians who wish the public documents catalogs should answer the circular inquiry which he has sent to the depositories. So large a proportion have failed to make any reply that he would be justified in inferring that the valuable catalogs of his Office are neither needed nor wanted. This would be far from the truth. Such lack of courtesy and appreciation is not creditable to librarians, and we hope this hint, in connection with Mr. Merrill's article elsewhere, will be a sufficient word to the wise."

The article by Mr. William Stetson Merrill referred to is entitled "Utilizing Government Documents," and mentions this lack of interest on the part of librarians and gives some good advice relative to the relations between the libraries and the Government.

In the course of his article he says:

"I can not conceive that any library should wish to have the Government catalogs of public documents discontinued or made less comprehensive than they are now, and it seems probable that the neglect of certain libraries to reply to the Superintendent's circulars was due rather to oversight than to deliberate disregard. None the less, many did not reply, and the Superintendent has drawn his own conclusions from that fact."

"At the Newberry Library we have found public documents of the utmost use in nearly every line of reference work, and the Government indexes to them are indispensable. The work which the Government is doing in indexing these publications is just so much labor and money saved to the libraries of this country. If there are librarians who find the Government indexes and catalogs of no use to them, this fact of itself proves that these librarians know little of the valuable matter that is contained in the Government publications or have never learned to use the guides which we now have to it. The time will come when they or their successors will appreciate what they are now neglecting. Should the work of the Government in this direction be discontinued or retrenched, we shall find it difficult to have it resumed after its loss has come to be appreciated, as it surely will be."

\* \* \* \* \*

"The neglect of the Government indexes referred to by the Superintendent discloses the fact that apparently librarians have not waked up to the value of public documents or have not bestirred themselves to render their contents available to the public."

\* \* \* \* \*

"Libraries in the past have been educational and recreational in their scope. Their function in the future is destined to embrace commerce, statesmanship, and applied science to a far greater degree than they have heretofore done, and in performing this service they can not afford to overlook the official publications of our country and of other countries."

It is very necessary that the librarians understand that the Government is not anxious to develop a subject unless it is desirable, nor will the ignorant or careless disregard of its efforts to make public documents useful, discourage or deter it from pursuing the course mapped out for its educational endeavors relative to the usefulness of public documents. But even Government officials, equipped with an extended knowledge of the subject of public documents and possessed of deadened sensibilities so that indifference and ingratitude go unnoticed, can accomplish little unless they have the cooperation of those through whom the work must be done to reach the general public.

The day is not far distant when librarians who now refuse to receive Government publications will follow in the lead of the progressive few and demand and retain all the Government literature they can procure; but in the meantime it would be well for the library world if they paid closer heed to what is transpiring in the Office of the Superintendent of Documents in Washington.

If you do not like the Monthly Catalogue, say so and say why; and if you are pleased with it in its new form, an expression of your opinion would be appreciated.

It is the privilege of every librarian to aid in popularizing Government publications in order to make available the facts and figures which annually cost over \$5,000,000 to publish, and possibly three times that amount to compile.

---

Through an error of judgment in the bindery, the July catalogues were stitched with a very fine wire which cut the paper and allowed the pages to drop out of the center. The mistake was discovered too late to make any change, but it will not occur again.

The Government Printing Office is turning out work which compares favorably with that of the best commercial shops, and it is the desire of the Public Printer that, with superior equipment and expert labor, the output may become a standard.

Such errors as the poor registration and uneven printing in the July catalogue, as well as the unfortunate mistake in stitching, are usually carefully guarded against and seldom occur.

---

The Government Printing Office employs at present in the work of actual printing and binding three thousand one hundred and eight (3,108) persons, and in the administrative divisions, including clerks, messengers, watchmen, etc., five hundred and seventy-one (571) persons. Of the latter number one hundred and twenty-six (126) are connected with the Office of the Superintendent of Documents, engaged in cataloguing, indexing, selling, shipping, and compiling public documents.

---

Ever since the issue, in 1903, of the "List of Publications of the Agriculture Department, 1862-1902," there has been a constant demand for the other departmental lists, of which series the Agriculture list was No. 1. Had it not been for the necessary reorganization of the Office of the Superintendent of Documents some of the other lists would have been issued before now, but as it is they are in comparatively the same incomplete state as they were a year and a half ago.

The work as outlined for these departmental lists involves the careful listing and indexing of all the publications of each of the Executive Departments and independent publishing offices, and the compilation and issuance of this information, arranged by Departments, and uniform in every respect with the Agriculture issue.

This plan will some day be carried out, and by degrees the necessary statistics are being gathered, but it is work of such magnitude that considerable time will be spent in the mere collection of material before it can be edited or published.

To satisfy the repeated demands of those interested in public documents for some sort of a list which will indicate what completes a certain set or what constitutes a collection of a given publishing office, it has been decided to issue a "Checklist" which shall contain entries in the simplest form for all the publications of the United States Government, arranged by (1) Departments, (2) bureaus, (3) series.

The old Checklist, issued in 1895, proved one of the most popular works ever published by this Office, and the edition was soon exhausted. A reprint would have been made but for the fact that a revised and elaborate edition was in contemplation.

It has been further determined to issue the Checklist in advance sheets, and their publication will begin in the near future. Each publishing office will be separately treated, and space will be left on the sheets to allow for corrections or additions. These sheets will be sent out to the libraries and publishing offices with the request that they give this Office the benefit of their criticism and supply it with any additional information which they may possess.

In this way a list should be evolved which, when finally issued, will be an authentic and complete bibliography of United States Government publications.

That the United States Government lacks a comprehensive catalogue of its many valuable publications is indeed deplorable, but that it does not possess anything like a complete collection of these records is certainly culpable.

The library in this Office, which contains the largest collection of United States Government publications in the world, lacks many volumes known to have been printed and doubtless many more which are unknown. Day by day, however, additions are being made, gathered from the enormous returns of the Departments and some libraries. This library is, of course, the basis of all the work connected with the compilation of catalogues and the distribution of public documents, and its collection and careful classification have made a comparatively complete list a possibility. It is hoped that all librarians will take up this matter and cooperate in an effort to compile a genuine "Checklist" of United States Government publications.

---

It has been supposed that Senate Document No. 119 of the Sixteenth Congress, second session, being a "Report of the Secretary of State on Weights and Measures," was never printed, and a statement to that effect was made on page 17 of the "Tables of, and Annotated Index to, the Congressional Series of United States Public Documents," issued by this Office in 1902.

A copy has since been found, dated February 22, 1821, and this Office has had it bound with Senate Document No. 118 of that session, which is assigned to Serial No. 45. Reference is also made to this document in the 1895 edition of the Checklist on page 20.

Several other important corrections to the "Tables and Index" have been found, notice of which will be published in the future.

# MONTHLY CATALOGUE

**Exports.** See Commerce.

**False Bay.** See Good Hope, Cape of.

**Farmers' bulletin.** See Agriculture Department.

**Finance.**

Comparative statement of receipts and expenditures of United States [for month of July, 1906 and 1907]. Aug. 1, 1907. 1 p. oblong 8° (Bookkeeping and Warrants Division.) [Monthly.] †

Statement of public debt and cash in Treasury, July, 1907. Aug. 1, 1907. 1 p. f° (Treasury Dept.) [Monthly.] †

Statement of Treasury, Aug. 1-31, 1907. Each 2 l. 4° (Bookkeeping and Warrants Division.) [Daily except Sundays and holidays.] †

**Firemen.** See Stokers.

**Fisheries Bureau.** Statistical bulletin 201; Statement of quantities and values of certain fishery products landed at Boston and Gloucester, Mass., by American fishing vessels, June, 1907. [1907.] 1 p. oblong 8° †

See also Albatross, fisheries steamer.

**Fishing vessels.** Lights and signals on fishing vessels. July 22, 1907. 2 p. 4° (Commerce and Labor Dept., Dept. circular 154; Bureau of Navigation.) †

**Flour.** Regulations concerning mixed flour under act approved June 13, 1898, as amended by act of Apr. 12, 1902. 1907. 24+ii p. (Internal Revenue Commissioner. Regulations no. 25, revised Aug. 1907.) \* Paper, 5c.

**Foreign Mail Service.** Schedule of steamers appointed to convey mails to foreign countries during Sept. 1907. Aug. 16, 1907. 1 p. narrow f° [Monthly.] \* Paper, 10c. single copy, \$1.00 a yr.

**Forest products.** Exports and imports of forest products, 1906; by R. S. Kellogg. Aug. 28, 1907. 28 p. (Forest Service. Circular 110.) \* Paper, 5c.

**Forest Service.**

Bulletin 70; Effect of moisture upon strength and stiffness of wood; by Harry Donald Tiemann. 1906 [reprint 1907]. 144 p. 25 il. 4 pl. \* Paper, 15c.

Circular 110; Exports and imports of forest products, 1906; by R. S. Kellogg. Aug. 28, 1907. 28 p. \* Paper, 5c.

Press bulletin 155-157; Aug. 1-[31], 1907. Each 1 p. f° †

See also Lumber and timber.

**Fortune Bay.** Fortune Bay, Newfoundland, south coast. Chapel Island to Harbor Breton, including Great Bay de l'Eau and St. Johns Bay, from British survey in 1882; chart 2408. Scale naut. m.=1.22 in. Washington, Hydrographic Office, July, 1907. 19.6×26.2 in. (Hydrographic Office.) † 20c.

**Foul brood.** See Bees.

**Fungicides.** See Insecticides.

**Game.** Game commissions and wardens, their appointment, powers, and duties; by R. W. Williams, jr. Aug. 1, 1907. 285 p. 7 pl. (incl. maps). (Biological Survey Bureau. Bulletin 28.) \* Paper, 35c. Agr 7-1969/2

**Gardeners.** Gardener (greenhouse work) [announcement of examination] Aug. 28, 1907. July 30, 1907. 1 p. 4° (Civil Service Commission.) †

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply and irrigation papers, which are intended for free distribution; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices

**Geological Survey—Continued.**

ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

Bulletin 317; Preliminary report on Santa Maria oil district, Santa Barbara County, Cal.; by Ralph Arnold and Robert Anderson. 1907. 69+vii p. 1 il. 2 pl. (maps, 1 in pocket).

\* Paper, 15c.

GS 7-1004

Professional paper 53; Geology and water resources of Bighorn basin, Wyo.; by Cassius A. Fisher. 1906 [1907]. vi+72+iv p. 1 il. 16 pl. (incl. maps, 1 in pocket), 4° \* Paper, 60c. GS 7-968

**Topographic sheets—**

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About three-tenths of the area of the country, excluding Alaska, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Water-supply and irrigation paper—**

195. Underground waters of Missouri, their geology and utilization; by Edward M. Shepard. 1907. x+224+vi p. 6 il. 6 pl. (incl. map). \* Paper, 30c. GS 7-1043

203. Surface water supply of Middle Atlantic States. 1906 (Susquehanna, Gunpowder, Patapsco, Potomac, James, Roanoke, and Yadkin River drainages). 1907. iv+100+ii p. 2 il. 4 pl. (incl. map). \* Paper, 20c. GS 7-1044

204. Surface water supply of southern Atlantic and eastern Gulf States, 1906 (Santee, Savannah, Ogeechee, and Altamaha rivers and eastern Gulf of Mexico drainages). 1907. v+110+ii p. 2 il. 3 pl. (incl. map). \* Paper, 20c. GS 7-1045

205. Surface water supply of Ohio and lower eastern Mississippi River drainages, 1906. 1907. 123+ii p. 2 il. 3 pl. (incl. map). \* Paper, 20c. GS 7-1046

**Patent Office.**

NOTE.—The Patent Office publishes specifications and drawings of patents, both in single copies and monthly volumes, the former at 5c. and the latter at \$5.00. The former are not enumerated in this catalogue. For certified copies of patents, including specification, drawing, certificate, and grant, the price is 80c. A variety of indexes, giving a complete view of the work of the Office from 1790 to date, are published at prices ranging from 25c. to \$10.00 per volume. The Rules of practice and pamphlet Patent laws are furnished free. The Patent Office issues coupon orders in packages of 20 at \$1.00 per package, or in books containing 100 coupons at \$5.00 per book. One coupon will procure a specification with drawings, and two coupons a copy of the Official gazette. They are good until used. Address Chief Clerk, Patent Office.

learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world; may be had by purchase at cost from the Superintendent of Documents, and may also generally be obtained free of charge from the applicant's Member of Congress." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution. The annual reports are included in the Congressional set.

## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

It is rather a common thing to hear public documents sneered at as useless lumber. Such sneering is done, however, by persons who know nothing of the subject, though sometimes they are persons who, because of their positions, should have the knowledge which they lack. This is the 153d number of the Monthly catalogue, and there has been no number issued which did not announce the publication of many documents of real practical usefulness to large numbers of citizens.

While this is true, it is also true that the present Catalogue announces a rather unusual number of such documents.

There is a new and revised print of the perennially popular "Horse book," of which Congress at its latest session ordered a quarter of a million additional copies, making a total issue of more than a million.

It is a little late to be printing the Census of 1790, the first census of the United States, but it is a fact that a very important part of it is now first printed. Synoptical tables were printed more than a hundred and ten years ago, but since the patriotic societies have stimulated the study of genealogy there has been a growing demand for the publication in full of the names and places of residence of the heads of families as taken by the United States marshals in 1790, and this is the publication which is now being made. The British in 1814 burned the records for several of the States, but the majority are still extant. Those now printed are for the States of New Hampshire, Vermont, and Maryland, and others will follow. The names for each State are printed in a separate book, each one having an alphabetical index. These books will be sold by the Census Bureau only, and there will be no free distribution, even to the depository libraries. Applications for them should be made directly to that Bureau.

Prisoners and juvenile delinquents in prisons is the title of another Census Bureau publication, a special report of interest to students of sociology. This one is sold by the Superintendent of Documents.

Since the passage of the free-alcohol law, bureaus of the Agriculture Department have been actively engaged in acquiring and disseminating information as to the production and use of the

cheap alcohol, from which great results are expected as an economical fuel. The title of this month's publication on the subject is: **Tests of internal-combustion engines on alcohol fuel.** It is a pamphlet of 89 pages, illustrated by 20 plates and 13 text figures. The conclusions of the board of scientists by which the tests were made are decidedly favorable to alcohol as a fuel in preference to gasoline.

These conclusions will interest all who have the automobile craze, and perhaps even more interesting will be found the new Special consular report on Motor machines. This gives information and opinions from American consuls the world over on the condition and prospects of the motor industry, boats as well as cars being reported on.

Part 4 of the Reports of American military observers attached to the armies in Manchuria during the Russo-Japanese War is an extensive medical report, fully illustrated. The mangling of men in great wars gives the healing profession its greatest opportunities for acquiring knowledge.

The Library of Congress issues a third and enlarged edition of its List of books relating to trusts.

The long-delayed Report of the Governor of Hawaii for 1906 contains nine new large-scale maps of the more important islands of the group. The engraving of these maps has caused the delay in the issuance of the report.

The Manufactures Bureau issues a special report on the English cotton industry. Though England produces no cotton, it produces over 90 per cent of the world's output of cotton cloth.

Congress at its latest session directed the Labor Bureau to prepare a report on woman and child labor in the United States. As a preliminary publication, the Bureau issues a compend of the laws of the several States on this important subject. It is brought up to the latest practicable date.

The Fisheries Bureau presents an interesting monograph on Utilized fishes and their relation to the fishery industry.

There is a newly revised edition of Dr. William Tindall's standard treatise on the Origin and government of the District of Columbia.

The four new Water-supply and irrigation papers of the Geological Survey treat quite fully the water resources of Georgia and the surface-water supply of the Great Lakes and St. Lawrence River, the Missouri River, and the New England watersheds for 1906. It may surprise some readers to know that the Survey rates water as the most important mineral resource of the United States.

The numerous publications of the bureaus of the Agriculture Department are always intensely practical. By no other organization at home or abroad are the results of scientific research so directly applied to the material good of the community.

The agricultural list for the month is notably strong and useful. Besides the bulletin from the Experiment Stations Office on alcohol-fuel already mentioned, there is a thick pamphlet from the Chemistry Bureau giving the methods of analysis of the National Association

of Official Agricultural Chemists; also, from the Biological Survey, a Compend of the game laws of the various States and Territories for 1907; also, from the Plant Industry Bureau, a complete and voluminous schedule of the American varieties of garden beans, which are very much more numerous than most people are aware of; also, from the same bureau, a bulletin on Cold storage of small fruits; also, from the Public Roads Bureau, a bulletin for which the material was collected by great labor, on Public-road mileage, revenue, and expenses in United States in 1904—the total mileage being given as 2,151,570 miles, or enough to go around the world almost 100 times, but of all these millions of miles of roads only about 150,000, or 7 per cent, are improved; also, from the Forest Service, circulars on Strength of wood as influenced by moisture and on Chemical methods of utilizing wood.

The caviler will find it difficult to put his finger on an unpractical or even an untimely title in these items selected from the September catalogue. A search of the whole catalogue would be equally unavailing.

---

Appendix G to the 16th annual report of the Interstate Commerce Commission (1902) was not issued with the report, but parts 4, 5, and 2 were separately issued in 1903 in the order here given. These parts were subsequently issued as Congressional documents, being parts 3, 5, and 6 of House document 253, 58th Congress, 2d session, the three parts bound together as volume 73, dated 1904. Parts 1 and 3 of Appendix G are listed for publication in the Congressional series as parts 2 and 4 of House document 253, 58th Congress, 2d session, to be bound as volume 72, but that volume has not yet been issued, and it is not known when it will be issued. Neither have parts 1 and 3 yet been issued in any other form.

---

February 1, 1904, in the 58th Congress, 2d session, an order was passed for printing the Journals of the Confederate Congress. It was estimated that the work would make eight volumes, and it was accordingly listed as Senate document 234, 8 parts, each part to make a volume—volumes 25-32 in the "sheep set." This estimate was carried into the Document index for the 58th Congress, 2d session. When document 234 was completed it was found to fill only seven volumes instead of eight. Consequently there is no part 8 of document 234, no volume 32 of Senate documents, 58th Congress, 2d session, and no serial number 4617. A "dummy" with an explanatory inscription is needed in the place of serial 4617 on the shelf, and a correction of the Document index (serial 4752) by striking out the entries for part 8 of Senate document 234 on pages 69, 385, and 489.

It is not at all surprising that this error should occur in the Index, for it was necessarily compiled and published long before document 234 had been printed.

In the same Index, at pages 101, 440, and 493, Fisheries bulletin, volume 23, 1903, is listed as one volume. It was subsequently issued in three volumes, and in the Public Documents Library its serial number, 4744, has been split into three and appears as 4744, v. 1; 4744, v. 2, and 4744, v. 3. This Office tries to foresee these incorrect estimates and changes of purpose of authors and publishing bureaus, but it is not possible to see very far into this kind of a millstone.

---

Those publications noted in the catalogue which are marked by an asterisk (\*) and for which a price is quoted are sold by the Superintendent of Documents. Those which are marked with an obelisk (†) are distributed by the offices which publish them, usually free of charge, but sometimes by sale.

Persons intending to do business with this Office will find it to their advantage to read "Important information" on the last page of the cover of this catalogue.

Scientific assistant, Department of Agriculture [announcement of examination] Oct. 16, 17, 1907. Sept. 23, 1907. 1 p. 4° (Civil Service Commission.) †

**Library.** Bulletin 64; Accessions to Department library, Apr.-June, 1907. Aug. 28, 1907. 75 p. [Quarterly.] \*Paper, 15c. 6-18608

See also Cattle—Nuts.

**Aids to navigation.** See Acetylene.

**Alabama.** Schedule of lands [in Alabama] under reclassification, (act Mar. 27, 1906) [Huntsville, Ala., meridian, townships 11-16 south, ranges 1-10 west, 3 east.] Aug. 17, 1907. 2 p. (Land Office, General.) †

**Alaska.** Harbors and bays, southwestern Alaska; chart 8821. Washington, Coast and Geodetic Survey. Sept. 1907. 33.1×35.4 in. (Coast and Geodetic Survey.) † 50c.

Afognak Bay, Afognak Island, from reconnaissance by Fish Commission in Aug. 1900. Scale 1:50,000. 12.3×11 in.

Anchorage Bay, Chignik Bay, from surveys by Coast Survey in 1874 and Fish Commission in 1897. Scale 1:80,000. 7.8×9 in.

Hanning Bay, Montague Island, Prince William Sound, surveyed in 1905. Scale 1:40,000. 6.9×6.2 in.

Isanotski Strait, southern part, Alaska Peninsula, from reconnaissance by Fish Commission in 1894. Scale naut. m.=1.5 in. 16.1×9.8 in.

Karluk Anchorage, Kodiak Island, from survey by Fish Commission in Aug. 1897. Scale 1:25,000. 6.4×11.7 in.

Larsen Bay, Kodiak Island, from survey by Fish Commission in Aug. 1897. Scale 1:25,000. 6.5×13.7 in.

Nateekin Bay, Unalaska Island, from British survey in 1904. Scale naut. m.=3.1 in. 6.5×8.2 in.

Shearwater Bay, Kodiak Island, from British survey in 1904. Scale naut. m.=5 in. 12.3×14.6 in.

**Alaska.** Harbors and bays, southwestern Alaska—Continued.

Uganik Bay, Kodiak Island, from survey by Fish Commission, Aug. 1897. Scale 1:80,000. 13.6×5.7 in.

Uyak Anchorage, Kodiak Island, from survey by Fish Commission in Aug. 1897. Scale 1:25,000. 9.9×9.8 in.

**Alcohol.**

Alcohol for denaturation deposited in storage tanks in distillery bonded warehouses. Aug. 26, 1907. 1 p. (Internal Revenue Commissioner.) [From Treasury decisions, v. 14, no. 9.] †

Denatured alcohol, authorizing formula for special denaturant for use in manufacture of surgical ligatures. Sept. 14, 1907. 1 p. (Internal Revenue Commissioner.) [From Treasury decisions, v. 14, no. 12.] †

Same, authorizing formula for use as alternative special denaturant in manufacture of sulphuric ether for anesthesia. Aug. 20, 1907. 1 p. (Internal Revenue Commissioner.) [From Treasury decisions, v. 14, no. 9.] †

Same [opinion]. Sept. 4, 1907. 1 p. (Internal Revenue Commissioner.) [From Treasury decisions, v. 14, no. 5.] †

Records and forms relating to denatured alcohol. Aug. 26, 1907. n. t. p. 3 p. (Internal Revenue Commissioner.) [From Treasury decisions, v. 14, no. 9.] †

See also Gas-engines.

**Alfalfa.** Alfalfa (*Medicago sativa*). [1907.] 1 p. narrow f° (Plant Industry Bureau.) †

**Alfalfa seed.** Alfalfa seed; by Edgar Brown. 1904 [reprint 1907]. 16 p. 8 il. (Plant Industry Bureau; Agriculture Dept., farmers' bulletin 194.) \* Paper, 5c. Agr 7-265/2

**Algeciras, Spain.** See Gibraltar Bay.

**Allotted lands.** See Indians.

**American Republics Bureau.**

NOTE.—This Bureau sells its own monthly bulletins, handbooks, etc., at prices usually ranging from 5c. to \$1.00. Address the Director of the Bureau.

Monthly bulletin, v. 25, no. 2, Aug. 1907, whole no. 167. 1907. viii+375-578+1 p. [3] por. [5] pl. [English, Spanish, Portuguese, and French.] † Paper, 25c. single copy, \$2.00 a yr.

**Analysis.** See Chemical analysis.

**Anatomists.**

Anatomist (male), Army Medical Museum [announcement of examination] Oct. 23, 24, 1907. Sept. 2, 1907. [2] p. 4° (Civil Service Commission.) †

Same [amended announcement of examination] Nov. 6, 7, 1907. Sept. 26, 1907. [2] p. 4° (Civil Service Commission.) †

**Animal Industry Bureau.** Bulletin 39 [pt. 19]; Index-catalogue of medical and veterinary zoology, pt. 19, authors, Mitschein-Myrepsus; by Ch. Wardell Stiles and Albert Hassall. Aug. 16, 1907. ii+1399-1492 p. \* Paper, 15c.

See also Horses—Meat inspection—Tuberculosis in animals.

**Anomura.** See Crabs.

**Anthracite.** See Coal.

**Antiseptics.** See Formalin.

**Apple juice.** See Cider.

**Appraisers.** Reappraisements of merchandise by general appraisers [on Aug. 22-Sept. 18, 1907]; Sept. 3-30, 1907. 4° (Appraisers. Reappraisal circulars 1666-80.) [Weekly.] †

**Army.** See Camps—Officers, Army.

**Army Medical Museum.** See Anatomists.

**Artillery.**

Journal of United States artillery, v. 27, [Jan.-June] 1907 [title-page, contents, and index]. Fort Monroe, Va., Artillery School Press, 1907. [iv]+313-318 p. (Artillery School, Fort Monroe.) [Included in price of Journal.]

Same, v. 28, no. 1, whole no. 86, July-Aug. 1907. Fort Monroe, Va., Artillery School Press, 1907. c. t. o. [ii]+1-104 p. [12] il. 1 pl. [3] tab. (Artillery School, Fort Monroe.) [Bimonthly.] † Paper, 50c. single copy, \$2.50 a yr.

**Artillery School, Fort Monroe.**

Index to current military literature, published with Journal U. S. artillery, v. 28, no. 1, July-Aug. 1907. Fort Monroe, Va., Artillery School Press, 1907. c. t. o. p. 1-37. [Included in price of Journal.]

Journal of United States artillery, v. 27, [Jan.-June] 1907 [title-page, contents, and index]. Fort Monroe, Va., Artillery School Press, 1907. [iv]+313-318 p. [Included in price of Journal.]

Same, v. 28, no. 1, whole no. 86, July-Aug. 1907. Fort Monroe, Va., Artillery School Press, 1907. c. t. o. [ii]+1-104 p. [12] il. 1 pl. [3] tab. [Bimonthly.] † Paper, 50c. single copy, \$2.50 a yr.

**Asbestos.** Production of asbestos, [calendar year] 1906; by J. S. Diller. 1907. 11 p. (Geological Survey.) [From Mineral resources, 1906.] †

**Asia.** See Crinoids.

**Asphalt.** Production of asphalt and bituminous rock, [calendar year] 1906; by Joseph A. Taff. 1907. 11 p. (Geological Survey.) [From Mineral resources, 1906.] †

**Assessments.** Regulations concerning assessments. 1907. 136 p. (Internal Revenue Commissioner. [Regulations] no. 1, revised Aug. 15, 1907.) \* Paper, 15c.

**Association of Official Agricultural Chemists.** See Chemical analysis.

**Atlantic Coast.** Surface water supply of New England, 1906, (Atlantic Coast of New England drainage). 1907. 120+ii p. 2 il. 5 pl. (incl. map). (Geological Survey. Water-supply and irrigation paper 201.) \* Paper, 25c. GS 7-1532/2

**Atlantic Ocean.** Pilot chart of north Atlantic Ocean, Sept. 1907; chart 1400. Scale 1° long.=0.27 in. Washington, Hydrographic Office, Aug. 29 [1907]. 21×32 in. (Hydrographic Office.) [Monthly.] † 10c.

**Attorney-General.** See Justice Department.

**Austria.** See Copyright.

**Automobiles.** Motor machines. 1907. 80 p. [2] il. (Manufactures Bureau. Special consular reports, v. 40; Dept. of Commerce and Labor doc. 79.) \* Paper, 15c. 7-35343

**Azimuth.** Azimuth tables, giving true bearings of the sun at intervals of 10 minutes between sunrise and sunset for parallels of latitude between 40° N. and 50° N., inclusive [by S. Schroeder and W. H. H. Southerland]; from publication 71. 1907. [48] p. [5] il. 4° (Hydrographic Office. [Publication] 106.) [For use on Great Lakes.] † Cloth, 50c.

**Baggage.** Notice to passengers [relative to making declaration, under oath, before customs officer]. [July 31, 1907.] n. t. p. 4 p. narrow 12° [Treasury Dept.] †

**Bats.** List of errata and corrections [to Bulletin 57 of National Museum]. [1907.] 1 p. (National Museum.) †

**Beans.** American varieties of garden beans; by W. W. Tracy, jr. Sept. 9, 1907. 173 p. 24 pl. (Plant Industry Bureau. Bulletin 109.) \* Paper, 25c. Agr 7-2171

**Bees.** Brood diseases of bees; by E. F. Phillips. July 29, 1907. n. t. p. 5 p. (Entomology Bureau. Circular 79.) \* Paper, 5c. Agr 6-1747/2

**Beet sugar.** Methods of reducing cost of producing beet sugar; by C. O. Townsend. 1907. ii+265-278 p. [2] il. [2] pl. (Plant Industry Bureau.) [From Yearbook, 1906.] \* Paper, 5c.

**Bellows Rock.** See Point de Galle, Ceylon.

**Bibliography Division,** Library of Congress. See Trusts.

**Biological Survey Bureau.** See Birds—Game—Game wardens.

**Birds.** Cage-bird traffic of United States; by Henry Oldys. 1907. iii+165-180 p. [2] pl. (Biological Survey Bureau.) [From Yearbook, 1906] \* Paper, 5c.

**Birmingham, Ala.** Alabama, Birmingham quadrangle, lat. 33° 30'-34°, lon. 86° 30'-87°. Scale 1:125,000, contour interval 50 ft. [Washington, Geological Survey] edition of Aug. 1907. 17.5×13.7 in. (Geological Survey. Topographic sheet.) † 5c.

**Bismarck, N. Dak.** North Dakota, Bismarck quadrangle, lat. 46° 30'-47°, long. 100° 30'-101°. Scale 1:125,000, contour interval 50 ft. [Washington, Geological Survey] edition of July, 1907. 17.5×12.1 in. (Geological Survey. Topographic sheet.) † 5c.

#### Blacksmiths.

Blacksmith and horseshoer [announcement of examination] Oct. 5, 1907. Aug. 30, 1907. 1 p. 4° (Civil Service Commission.) †

Blacksmith [announcement of examination] Oct. 5, 1907. Aug. 28, 1907. 1 p. 4° (Civil Service Commission.) †

**Blanchester, Ohio.** Ohio, Blanchester quadrangle, lat. 39° 15'-39° 30', long. 83° 45'-84°. Scale 1:62,500, contour interval 20 ft. [Washington, Geological Survey] edition of June, 1907. 17.5×13.6 in. (Geological Survey. Topographic sheet.) † 5c.

#### Bonds of United States.

Caveat list of United States registered bonds, July 1, 1907. 1 p. f° (Loans and Currency Division.) [Monthly.] †

Same, Sept. 1, 1907. 1 p. f° (Loans and Currency Division.) [Monthly.] †

Market prices and investment values of outstanding securities [Aug. 1907]. Sept. 3, 1907. 2 p. 4° (Treasury Dept., Dept. circular 57, 1907; Government Actuary.) †

Same [Sept. 1907]. Oct. 1, 1907. 2 p. 4° (Treasury Dept., Dept. circular 60, 1907; Government Actuary.) †

#### Bookkeeping and Warrants Division.

Comparative statement of receipts and expenditures of United States [for month and 11 months ending May, 1906 and 1907]. June 1, 1907. 1 p. oblong 8° [Monthly.] †

Same [for month and 2 months ending Aug. 1906 and 1907]. Sept. 3, 1907. 1 p. oblong 8° [Monthly.] †

Statement of Treasury, Sept. 3-30, 1907. Each 2 l. 4° [Daily except Sundays and holidays.] †

See also Finance.

**Bounty claims.** See Pensions.

**Brachyura.** See Crabs.

**Bristol, R. I.** Bristol Harbor and approaches. R. I.; chart 354<sup>1</sup>. Scale 1:20,000. Washington, Coast and Geodetic Survey, Sept. 1907. 26.7×14.2 in. (Coast and Geodetic Survey.) † 20c.

**British India.** See India.

**Brulé Reservation, Lower.** See Lower Brulé Reservation.

**Buoys.** See Lights.

**Bur-clover.** Bur clover (*Medicago arabica* and *Medicago denticulata*.) [1907.] 1 p. narrow large 8° (Plant Industry Bureau.) †

**Burgeo Islands.** Burgeo Islands, Newfoundland, south coast, from British survey in 1872; chart 2419. Scale naut. m.=3 in. Washington, Hydrographic Office, Aug. 1907. 26.9×33.5 in. (Hydrographic Office.) † 40c.

**Butter.** See Oleomargarin.

**Cactus.** Miscellaneous papers: 1. Summary of recent investigations of value of cacti as stock food, by David Griffiths and R. F. Hare; 2. Successful dairy farm, by L. C. Dodge; 3. Planning cropping system, by W. J. Spillman; 4. Application of vegetative propagation to leguminous forage plants, by J. M. Westgate and George W. Oliver; 5. Control of Texas root-rot of cotton, by C. L. Shear and George F. Miles; 6. History of cowpea and its introduction into America, by W. F. Wight; 7. New method for determination of nicotine in tobacco, by Wightman W. Garner. Sept. 9, 1907. 73 p. 3 il. 8 pl. (Plant Industry Bureau. Bulletin 102.) \* Paper, 15c.

Agr 7-2098-2100/3, Agr 7-2101/4, Agr 7-2102-04/3

**Cage-birds.** See Birds.

**Camps.** Extracts from reports of officers of Army, camps of instruction, 1906. Washington Barracks, D. C. Press of Engineer School, 1907. [1]+19 p. (Engineer School. Occasional papers 24.) \* Paper, 5c. 7-35334

**Canada.** See Acetylene.

**Canal record.** See Canal Zone, Isthmus of Panama.

**Canal Zone, Isthmus of Panama.**

Canal record, Sept. 4-25, 1907; v. 1, nos. 1-4. Ancon, Canal Zone. 4° [Weekly.] † 5c. 7-35328

NOTE.—The Canal record is issued free of charge, one copy each, to all employees of the Commission whose names are on the gold roll. Extra copies can be obtained from the news stands of the Panama Railway Company for 5c. each. Address all communications to The Canal Record, Ancon, Canal Zone, Isthmus of Panama.

Report of Department of Sanitation of Isthmian Canal Commission, July, 1907. 72 p. 12° [Monthly.] † 6-13939/3

**Canyon Diablo.** See Meteorites.

**Cass County, Mich.** Soil survey of Cass County, Mich.; by W. J. Geib. Sept. 14, 1907. 30 p. 1 il. map. (Soils Bureau.) [From Field operations, 1906.] †

**Cassava.** Cassava, its content of hydrocyanic acid and starch and other properties: by Charles C. Moore, in collaboration with Bureau of Plant Industry. Aug. 30, 1907. 30 p. (Chemistry Bureau. Bulletin 106.) \* Paper, 5c. Agr 7-2086/2

**Caterpillars.** See Span-worms.

**Cattle.** Bureau of Animal Industry order 143 [amendment 1]; (regulations of Secretary of Agriculture governing inspection, disinfection, certification, treatment, handling, and method and manner of delivery and shipment of live stock which is subject of interstate commerce). [Aug. 23, 1907.] 2 p. (Agriculture Dept.) †

**Cement.** Cement industry in United States, [calendar year] 1906; [including Advances in cement technology, 1906, by Edwin C. Eckel; and Statistics of cement industry in 1906, by L. L. Kimball]. 1907. 39 p. 1 il. (Geological Survey.) [From Mineral resources, 1906.] †

**Census, 1790.**

Heads of families at 1st census, 1790: Maryland. 1907. [1]+189 p. map, 4° (Census Bureau.) † Paper, \$1.00. 7-35273  
 Same: New Hampshire. 1907. [1]+146 p. map, 4° (Census Bureau.) † Paper, \$1.00. 7-35273  
 Same: Vermont. 1907. [1]+95 p. map, 4° (Census Bureau.) † Paper, \$1.00. 7-35273

**Census Bureau.**

Bulletin—

79. Census of manufactures, 1905: Printing and publishing; [by William S. Rossiter]. 1907. 133 p. [37] il. \* Paper, 20c. 4-19052

87. Census of manufactures, 1905: Tobacco. 1907. 33 p. 4° \* Paper, 10c. 4-19052

Special reports; Prisoners and juvenile delinquents in institutions, 1904; [by John Koren]. 1907. 295 p. 4° \* Cloth, 70c. 7-35349

See also Census, 1790—Vital statistics.

**Cereal products.** See Grain.

**Cereals.** See Grain.

**Channels.** See Rivers and harbors.

**Characinids.** Annotated list of Characin fishes in National Museum and museum of Indiana University, with descriptions of new species; by Carl H. Eigenmann and Fletcher Ogle. Sept. 10, 1907. [1]+1-36 p. 8 il. (National Museum.) [From Proceedings, v. 33; no. 1556.] †

**Chemical analysis.**

Cooperative work on unification of terms for reporting analytical results [recommendations of] committee of Association of Official Agricultural Chemists. Sept. 1, 1907. 1 p. (Chemistry Bureau.) †

Official and provisional methods of analysis, Association of Official Agricultural Chemists; edited by Harvey W. Wiley. Sept. 10, 1907. xxiii+230 p. 11 il. (Chemistry Bureau. Bulletin 107.) \* Paper, 20c. Agr 7-2096/3

See also Mineral waters.

**Chemistry Bureau.**

Bulletin—

13 [pt. 9]. Foods and food adulterants: pt. 9, Cereals and cereal products. 1898 [reprint 1907]. vii+1169-1374 p. 4 il. [7] pl. \* Paper, 15c.

84, pt. 2. Influence of food preservatives and artificial colors on digestion and health: 2, Salicylic acid and salicylates; by H. W. Wiley, with W. D. Bigelow, F. C. Weber, and others. 1906 [reprint 1907]. vi+479-760 p. 3 il. \* Paper, 30c. Agr 6-1828/10

91. Mineral waters of United States: 1, Classification and methods of analysis, 2, Commercial waters, 3, Saratoga waters sampled at source; by J. K. Haywood with B. H. Smith. Reprint, Aug. 1, 1907. 100 p. \* Paper, 10c. Agr 6-429/3

**Chemistry Bureau—Continued.****Bulletin—Continued.**

106. Cassava, its content of hydrocyanic acid and starch and other properties; by Charles C. Moore, in collaboration with Bureau of Plant Industry. Aug. 30, 1907. 30 p. \* Paper, 5c. Agr 7-2086/2

107. Official and provisional methods of analysis, Association of Official Agricultural Chemists; edited by Harvey W. Wiley. Sept. 10, 1907. xxiii+230 p. 11 il. \* Paper, 20c. Agr 7-2087

Circular 36; Chemical methods for utilizing wood, including destructive distillation, recovery of turpentine, rosin, and pulp, and preparation of alcohols and oxalic acid; by F. P. Veitch. Aug. 29, 1907. 47 p. 16 il. \* Paper, 5c. Agr 7-2087

Laboratory helper [Chemistry Bureau, announcement of examination] Oct. 23, 1907. Sept. 14, 1907. [2] p. 4° (Civil Service Commission.) †

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply and irrigation papers, which are intended for free distribution; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25 c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

**Topographic sheets.** See name of place under which sheet is issued.

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About three-tenths of the area of the country, excluding Alaska, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

[Washington, Geological Survey] edition of June, 1907.  $17.5 \times 14.5$  in. (Geological Survey. Topographic sheet.) † 5c.

**Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1. Contributions to knowledge; 2. Miscellaneous collections; 3. annual reports; 4. special publications. No sets of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to

**Smithsonian Institution—Continued.**

libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

Smithsonian miscellaneous collections, v. 49, pub. 1717; Report on Crustacea (Brachyura and Anomura) collected by North Pacific Exploring Expedition, 1853-56; by William Stimpson. Washington, Smithsonian Institution, 1907. 240 p. 26 pl. † Paper, 75c.

## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

This number of the Monthly catalogue will be sent to several hundred libraries which are not now on our regular mailing list. If librarians can make use of the Catalogue and desire to have their libraries supplied in the future, they should notify us at once, giving plainly their address.

Unless such a request is received, future issues will not be sent. This applies only to those libraries which are not now on the regular mailing list for the Monthly catalogue.

The edition is limited to 2,000 copies, and it is our desire that every copy be placed where it will be of the most service. Back numbers from July, 1907, will be furnished on application.

---

Several valuable suggestions have been received and incorporated in the Catalogue. It has been found impossible to comply with the requests in many instances, but the suggestions are none the less appreciated.

We are endeavoring to make the Monthly catalogue the medium for transmitting, to those interested, help in the study of United States Government publications.

---

For years the Library Commissions of the various States, as well as hundreds of the librarians themselves, have besought this Office to relieve them of their unused surplus of Government publications, for which they found no market, either by exchange or sale, and which they did not feel at liberty to destroy.

Limitation of storage space and lack of competent help to handle the documents properly compelled the Superintendent of Documents to accept only a small portion of these proffered returns. Even with repeated refusals and every attempt being made to discourage the librarians in this respect, over 3,000,000 books, pamphlets, and circulars have accumulated and are now occupying valuable storage space in this office.

At last, it is possible to throw wide the doors and invite the return of useless Government publications from all sources, and at the same time offer to the libraries of the country hundreds of useful

documents from the heaps upon heaps now used only as dust collectors.

Under date of October 1, 1907, the lists and circulars connected with this great clearing-house or exchange scheme were sent out to every library in the country, the name of which could be obtained.

Over 6,000 sets of these information circulars were disposed of, and the libraries were requested to fill up the blanks and return them as quickly as possible.

The returns so far are gratifying, although not as many have replied as were anticipated. Usually, when anything is offered free, there are plenty to demand the product. Perhaps many did not reply because the matter outlined entailed a little labor.

However, this campaign will succeed and in the end we will have the libraries of the country in possession of just those publications which they desire and can use to advantage, and those which to some are of little or no service will find their way into the proper fields.

It is necessary, in dealing with so large a number of libraries, to establish certain rules for supplying publications. In order to simplify the work in this Office, and at the same time provide a convenient and uniform blank for applications, the following form was adopted, which is printed 10 to a sheet, and made up into pads of 50 sheets each.

----- (Do not write on this line)	Library No. -----
Title: -----	
-----	
-----	
-----	
Series -----	
Issuing Office -----	
Ship as requested -----	

Accompanying these sheets were the following instructions, which it was hoped would insure the proper filling out of the "Library Wants," but which in many cases were not clearly understood:

#### INSTRUCTIONS FOR FILLING OUT "LIBRARY WANTS."

Enter on the blanks entitled "Library Wants" the titles of publications which are desired.

Enter but one title on a block, and do not run beyond the perforated lines.<sup>a</sup>

<sup>a</sup> By this is meant that a block when filled out should represent but one publication, whether it be an annual, a serial, or a titled publication of a miscellaneous nature. The entry should describe but a single publication, be it a year, or number, or title.

Duplicate copies of these "want" lists should be retained by the library for checking purposes, as no detailed invoice will be sent with shipments.

Great care should be taken in transcribing the titles. Be sure they are accurate.

Where possible use series titles only (such as Geological Survey bulletin, no. 203).

In the case of the Congressional series, the serial number is all that need be given.

Always return a full sheet, even though only one block is used.

Requests will be filled in the order of their receipt. No requests will be considered unless the lists are properly filled out *in every particular*.

Those books which can be furnished will be promptly forwarded, and the "want" slips for those not on hand will be filed for checking, and whenever any of the publications are received they will be forwarded.

In the future this form of request will be adopted for all "wants." This system will provide the libraries with a surer method of filling up gaps than previous spasmodic endeavors have developed.

No letter need accompany these "want" blanks, but the name of the library must appear at the top of the first sheet of a list, and the *library number must in every case be plainly stamped or written on each block* of a blank which is used.

Books sent out upon request of libraries are required by law to be for public use without charge, are always stamped "Property of the United States Government," and must not be destroyed, removed, or otherwise disposed of, except as this Office shall direct.

It will be of service to this Office if you carefully note your library number and refer to it in your future correspondence.

Address all communications:

SUPERINTENDENT OF DOCUMENTS,  
*Government Printing Office,*  
*Washington, D. C.*

On several other occasions we have attempted to write instructions or ask questions of the library world and have found that our use of the English language was not sufficiently in accord with library methods to gain the attention and comprehension which were desired.

In this instance some librarians have inquired if they should enter several publications in an annual or a numbered series on a block, although the instructions state clearly, "Enter but one title on a block." What should have been said? An explanation of the instructions seems to us like painting the lily. Is not the title of a book, even though it be issued annually, as distinct for each year as though it were worded differently?

The line "Ship as requested" is for the use of this Office and need not be taken into account by the librarians.

Perhaps a little more extended explanation of the use to which these slips are to be put will reveal the necessity of entering but *one title* or the request for *one publication* on a block.

Where it is found impossible to supply the publication requested, the want slip will be filed under its proper classification to await the receipt of the book, and these slips will be checked daily by the book receipts, and the "want" slips withdrawn and used as "order out blanks" when it becomes possible to supply the work desired.

These "library wants" blanks will be supplied on application, as will any of the other literature relative to the clearing-house proposition, and hereafter requests from those libraries which have received this notification will not be considered unless made on the proper forms. Attention to this ruling will save much time and avoid needless correspondence.

---

A shipment will soon be made to depository libraries. The receipt of books for this purpose has been slow for the past few months. The last shipment was made July 13, 1907, and the present invoice covers all books received since that time, except the Statutes at large, which will be sent as a special shipment as soon as Part 3 is received from the Printing Office.

---

Users of the Document catalogue will be glad to learn that the long-delayed Catalogue of the 58th Congress is at last ready for the press, and that the Catalogue for the 59th Congress is in a fair way towards completion. The reorganization of the Office, which took all the cataloguers away from their regular work, is responsible for the late issue of these publications.

---

Decidedly the most important and interesting public document of the month is the Twenty-fifth annual report of the Bureau of American Ethnology. Besides the usual administrative summary of the work of the Bureau for the fiscal year ended June 30, 1904, it contains two extensive and profusely illustrated memoirs by Dr. Jesse Walter Fewkes, one entitled "The aborigines of Porto Rico and neighboring islands," the other "Certain antiquities of eastern Mexico." The second paper is considered preliminary only, though it is indorsed by Professor Holmes, Chief of the Bureau of Ethnology, as "a very important contribution to our knowledge of the ancient culture of the Gulf States of Mexico." The first memoir is based upon personal research and collection in Porto Rico by the author during the years 1901, 1903, and 1904, enabling Professor Holmes to say that "the data for the report are drawn from the largest and most representative collection of Porto Rican archeological material in the world. \* \* \* Archeological objects are the main sources from which we may now hope to interpret aboriginal Porto Rican life in prehistoric and early historic times. Doctor Fewkes gives due prominence to this source in his report, bringing, when possible, pertinent ethnological and historical evidences to the support of the archeological data. By the use of these three methods he is able to present a picture of the characteristic culture of the aborigines of one of the most important of our insular possessions."

The ninth volume of the literal reprint of the "Journals of the Continental Congress" has just come off the press. This remarkable reproduction, critically edited and annotated in the Library of

Congress, illustrated with facsimiles of rare historical documents, and printed from special type on special paper, is sold by the Superintendent of Documents at the amazingly low price of \$1 a volume.

The Report of the Smithsonian Institution for 1906 was issued during the month. Like the preceding numbers for half a century, it gives, in its General appendix, a most valuable and interesting illustrated scientific miscellany of more than 400 pages.

The Census Bureau, in continuation of its publication of the results of the census of manufactures taken in 1905, has issued five new bulletins giving a statistical view of various industries. No. 81 relates to shipbuilding; no. 84, to carriages and wagons and the steam and street railroad car industry; no. 85, to pens and pencils, buttons, needles, pins, and hooks and eyes, oilcloth and linoleum, and turpentine and rosin; no. 86, to copper, lead, and zinc, smelting and refining; and no. 88, to power employed in manufactures. These bulletins are not altogether in figures. The statistics are also interestingly summarized in the text.

The Census Bureau issues also a special report of 372 pages on the 1905 statistics of cities of over 30,000 inhabitants. How many such cities are there now in the United States? Only 154. When the Government was formed, in 1789, there were two—Philadelphia and New York—Philadelphia being the larger, but hardly 40,000. As estimated in this special report, the 1905 population of New York was 4,000,403, and of Philadelphia 1,417,062. The report contains also an exhaustive monograph on a very important subject—Accounting, and especially governmental accounting.

Bulletin 101 of the Plant Industry Bureau is a contents table of and index to the preceding 100 bulletins of that industrious and useful bureau. An index to the mass of scientific material contained in the first 100 bulletins is something much to be desired, but it is also much to be desired that Government indexes should have a more modern and compact and convenient form. This index departs so widely from the accepted forms as to be almost grotesque. Still, any index is better than no index, and this one will no doubt be found to have a certain usefulness.

The Experiment Stations Office, Agriculture Department, has issued a small circular on a large subject. It is Circular 76, and its title is, "Swamp and overflowed lands in the United States, ownership and reclamation." It relates, however, only to the States east of the Rocky Mountains. In these States it is found, after an extensive canvass, that the swamp lands amount, approximately, to 77,000,000 acres. The question of draining these lands and making them available for tillage is not a whit less important than that of the irrigation of the arid lands. The subject of draining the swamp lands has taken a strong hold on the public mind, and early governmental action upon it seems to be rather confidently hoped for. Circular 76 is therefore timely, and the figures it gives of possible profit are fascinating.

The Geological Survey devotes its Bulletin 313, of 200 pages, to a description, both scientific and popular, of one of the chief assets of

the State of Maine, namely, its rock-bound coasts and granite ledges.

Land decisions, v. 35, is in the month's list.

The publications of the Experiment Stations Office relating to diet and nutrition have aroused about as much popular interest as any class of official documents. An interesting addition to the series is the one issued this month, Bulletin 193, giving the results of experiments made at the University of Illinois to determine which method of cooking makes meat most digestible. Like the former publications of the Experiment Stations Office, this one does little to bolster any current theory. So far as the new experiments may be held to determine the question, one kind of cooking is as good as another. Whether fried, broiled, roasted, or boiled, the meat was found to digest just about as well.

One of the most vital subjects nowadays is the purity of the milk supply. Animal Industry Circular 117 gives a useful new idea concerning it.

Many teachers and others will be glad to know that the Education Bureau has begun the issue of a series of bulletins on various phases of educational work. No. 2 of the series is a stout pamphlet of 140 pages, well indexed. Its subject is Agricultural education, including nature study and school gardens.

The commendable policy of getting the information gathered by Government investigators into the hands of the public at the earliest moment by issuing voluminous reports in piecemeal, that is, in separate pamphlet parts, is steadily pursued. The annual volume for the calendar year 1906, entitled "Mineral resources of the United States," can not be issued in full for some time yet, but we have this month three pamphlet parts of it, which show the 1906 production of salt, of slate, and of tin. From the still unissued report on the field operations of the Bureau of Soils for 1906 we have pamphlet parts describing and mapping the soil surveys of Blue Earth County, and of Crookston area, Minn., Greene County, Ind., and Ransom County, N. Dak.

These are but samples from the October list. Many others are of almost equal import and interest. Investigators in many lines may find aid in the October documents.

---

For several years certain notes of correction have been affixed to certain pages in the copy of volume 1 of the 1896 Report of the American Historical Association standing on the shelves of the Public Documents library. There is apparently no good reason why other copies in other libraries should not have the same corrections, and the most effective way to pass them along is to print them here. The first note is in reply to a paragraph on page 1112, which reads thus:

It is to be noted that Richardson, in his valuable Messages and Papers of the Presidents, which will be described later in volume 1, omits the proclamations, or, rather, notices, that assembled the

Senate in its special session of July 17 to 19, 1798, when Adams wished to secure the prompt confirmation of Washington to be lieutenant-general.

The note correcting the statement concerning General Washington is as follows :

This is a gross historical error. The nomination of Washington had been sent to the Senate July 2, 1798, and confirmed by unanimous vote July 3. July 7 President Adams wrote a notification to General Washington, which was delivered to him at Mount Vernon on the evening of the 11th by the Secretary of War (James McHenry, of Maryland). July 13 Washington wrote his acceptance, which was delivered to the President on the morning of July 17 by the Secretary, and on the 18th was sent to the Senate. On the 18th the President also sent in a message nominating Alexander Hamilton to be inspector-general with the rank of major-general, and several other general officers, Hamilton being thus made the ranking officer of the Army, second only to Washington. All of these nominations except one brigadier were confirmed July 19, 1798. The special (16th) session of the Senate which began July 17 and ended July 19, 1798, was not called by proclamation but by personal notice, dated July 16, to each Senator. These facts and dates are clearly set forth in the Executive Journals of the Senate, printed at Washington, 1828, by Duff Green, v. 1, pages 284, 289-293.

It is thus made plain that President Adams was not compelled to resort to a special session nor to any other special means to "secure" the confirmation of Washington's nomination as lieutenant-general and commander in chief to serve during the then expected war with France.

The second note is inserted opposite page 1113 and relates to the beginning of the practice of numbering the documents ordered printed in the Senate and the House in a continuous sequence during each session. In the article quoted from the Superintendent of Documents is sharply called to account for not beginning the general numbering of the bound volumes of documents with the Thirteenth Congress rather than with the Fifteenth Congress. Dr. John G. Ames, formerly superintendent of documents in the Department of the Interior, decided on the point of beginning, and, in fact, originated the scheme of a continuous whole number, but the writer in the American Historical Association report apparently did not know this and intended his criticism for the publisher of the second edition of the Ames Checklist of public documents, in which the volume numbers were first printed. The particular paragraph in page 1113 to which the note is intended as a reply is the following :

Recurring to the action of Congress itself, it may be said that it was not until the commencement of the Thirteenth Congress, in December, 1813, that the House of Representatives, which legislative branch publishes by far the larger number of documents and reports, realized sufficiently the growing importance and permanent value of its own transactions to impel it to introduce systematic methods of publication. The House then adopted a consecutive series of numbers, which was applied to its public documents, beginning anew at the commencement of each Congress and running uninterruptedly to the end of the last session of such Congress.

The note correcting the statements in this paragraph reads thus :

These remarks are highly erroneous and misleading. The Thirteenth Congress did not begin its term in December, 1813, nor did it

then first convene. Its second session began in the month named, on the 6th day; but at this session the House did not "adopt a consecutive series of numbers, which was applied to its public documents, beginning anew at the commencement of each Congress and running uninterruptedly to the end of the last session of such Congress." The action taken was, first, December 8, 1813, when, on motion of Timothy Pickering, of Massachusetts, it was ordered by the House that all those documents of the House "which \* \* \* shall be printed in octavo fold \* \* \* shall have their pages numbered in one continuous series of numbers, commencing and terminating with each session." This applied only to octavos, provided for consecutive paging, not numbering, and for a new series of page numbers, not for each Congress only, but for each session. Six days later, December 14, Mr. Pickering moved an order "that the documents which were the subject of the order of the House of the 8th instant" (that is, the octavos), "instead of having their pages numbered consecutively in one continuous series \* \* \* each session, shall be themselves numbered in a regular series in the order of time in which they shall be directed to be printed; the number of the document to appear on every page in addition to the page number." If all House documents had been octavos, it might have been possible to apply a system of serial numbering to the House documents at and after the second session of the Thirteenth Congress. But as a matter of fact the most important documents, the annual reports from the Executive Departments, were presented to Congress in folio form, already printed but not numbered. Even up to the end of the Fourteenth Congress this was the case. Not until the last day of that Congress, March 3, 1817, did both Houses adopt a joint resolution requiring that all Congressional documents should thereafter be printed in the octavo size. Thus it followed that at the beginning of the Fifteenth Congress for the first time did the rule requiring the numbering of octavo documents become applicable to all documents and the use of a serial system of numbering the bound volumes become feasible. The document numbering and the volume numbering have always been by sessional series, never by series of Congresses.

Libraries which have not a cloth copy of volume 1 of the American Historical Association Report for 1896 will find it in the "sheep set" as serial number 3550, v. 1.

**Gas.** See District of Columbia.

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply and irrigation papers, which are intended for free distribution; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

**Bulletin—**

313. Granites of Maine [with bibliographies], by T. Nelson Dale; with introduction, by George Otis Smith. 1907. 202+iv p. 39 il. 14 pl. (Incl. map in pocket). \* Paper, 35c. GS 7-1540

323. Experimental work conducted in chemical laboratory of United States fuel-testing plant at St. Louis, Mo., Jan. 1905-July, 1906; by N. W. Lord. 1907. 49+iii p. \* Paper, 10c. GS 7-1564

**Topographic sheets—**

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some promi-

**Geological Survey—Continued.****Topographic sheets—Continued.**

nent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About three-tenths of the area of the country, excluding Alaska, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Water-supply and irrigation paper—**

180. Turbine water-wheel tests and power tables [with bibliography]; by Robert E. Horton. 1906 [reprint 1907]. 134+ii p. 33 il. 2 pl. \* Paper, 20c. GS 6-1142/2

### Smithsonian Institution.

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

Annual report of regents for year ending June 30, 1906 [with report of acting secretary, etc., and appendix containing scientific papers]. 1907. li+546 p. [25] il. [41] pl. (incl. 28 p. of pl. por. maps). ([Publication 1742.]) \* Cloth, \$1.25.

CONTENTS.—Proceedings of regents.—Report of Executive Committee.—Acts of Congress.—Report of acting secretary.—Smithsonian Institution.—Modern theories of electricity and matter; by Madame [Marie] Curie.—Radioactivity; by Franz Himstedt.—Recent advances in wireless telegraphy; by Chevalier G. Marconi.—Revisions of theory of electrolysis; by Henry S. Carhart.—Recent progress in astronomical research; by C. G. Abbot.—Astronomy on Mont Blanc; by H. Radau.—Problem of metalliferous veins; by James Furman Kemp.—Iron-ores reserves; by Charles Kenneth Leith.—Geology of diamond and carbonado washings of Bahia, Brazil, by Orville A. Derby; translated by J. C. Branner.—Eruption of Vesuvius in Apr. 1906; by A. ## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

In response to the circulars requesting information and offering to receive duplicate and useless public documents or to supply any Government publications which are available, we have received a great number of replies, which as yet we have been unable to tabulate, owing to the fact that the convening of a new Congress is at hand and our work increased in consequence.

To all those who have returned their question circulars and requested documents or information not yet supplied, we would say that as soon as possible their wants will be carefully considered. To the libraries there is but one Documents Office; to the Documents Office there are many libraries.

---

Attention is again called to the "Important information" which always appears on the last page of the cover of each issue of the Monthly catalogue. If the information therein contained were read and digested, there would be fewer delays in supplying publications or information.

---

"Library wants" blanks will be supplied upon application. It would be well for every library which has occasion to make requests of this Office to have a supply of these blanks at hand, as in the future no requests for books will be considered unless made upon the proper forms. This is part of a scheme of cooperation which will eventually evolve a more harmonious condition of affairs than has existed heretofore. It will save a lot of unnecessary and thoroughly exasperating correspondence if all libraries will comply with the regulations outlined in the notes in last month's Catalogue.

---

The United States public document of greatest popular interest among those issued during November is probably the report of a group of experts on the San Francisco earthquake and fire of April, 1906, and their effects on structures and structural materials. Reinforced concrete is the material which best resisted the rocking action of the quake, and old brick walls, buttressed, or braced with band iron, came out much better than many new structures. "Weak and flimsy framing, insufficient bracing, and poor mortar," says the report, "were the cause of most of the failures in San

Francisco." The experts go into full detail in reporting upon the great disaster, and their facts and deductions must be of value to builders of structures upon which large sums are laid out with the purpose of securing permanence. Not even science can foresee what spot on the earth's surface will feel the next quake, and it is the part of wisdom to build in preparation for the worst.

The San Francisco report is printed as Bulletin 324 of the Geological Survey, and is illustrated by more than 50 photographic views and a map. The Survey makes a strong showing in this month's Catalogue, with six Water-supply papers and three Bulletins (about 1,700 pages of text), to say nothing of four atlases, several separates, and a hundred or more plates and maps.

The census of population of Oklahoma and Indian territories (now united in the State of Oklahoma) is printed as Bulletin 89 of the Census Bureau. This census was taken in record time last summer, and shows the official population of the new State to be 1,414,177.

Plant Industry Bulletin 111, part 3, furnishes a convincing argument for laws to prevent the importation of adulterated seeds. Legislation against adulterated seed is general throughout Europe, and, "as a natural result," says the Bulletin, "the United States has become the dumping ground for the poor seed of Canada and Europe." By plates showing high-grade and low-grade seeds magnified to nine times the natural size, the distinction between clean and adulterated seed is strikingly demonstrated. The farmer who pays for clover and alfalfa seed and unwittingly sows his land to noxious weeds would seem to be a proper subject for legislative protection.

For some years past the agricultural experiment stations have been supplying farmers with free lectures giving the scientific view of various farm problems. Now another step forward has been taken by fitting out the lecturer on tobacco growing with a set of 46 camera slides to illustrate his comments. A pamphlet from the Office of Experiment Stations gives a syllabus of the lecture and a list of the subjects of the slides.

Circular 115, Forest Service, is a second progress report on an important subject, the strength of structural timber, the result of four years' testing work in the laboratories of the Service.

A much-needed and welcome document (Publications Division Bulletin 8) is an index to the first 250 Farmers' bulletins of the Agriculture Department. The Farmers' bulletins are now so numerous and cover such a wide range of subjects that every library, as well as every progressive farmer, should have a full set of them, and they are difficult of complete use without an index.

Bulletin 30 of the Biological Survey is the first part of "Birds of California in relation to the fruit industry." It has a pretty colored frontispiece, showing the California bush-tit and its nest, and has also several other bird portraits. The conclusion of the biologists is that, with very few exceptions, the birds do more good by destroying noxious insects than they do harm by eating fruit.

Ticks (chiggers) may seem to the average reader a small subject for a formal public document, but it is estimated that they cost the Southern States no less than a hundred million dollars a year by their depredations upon cattle. The discovery of a remedy for this pest has long been an object of scientific research. The present opinion seems to be that the only sure remedy is the complete extermination of the cattle tick, and that this is possible. The latest experiments looking to this end are described and illustrated in *Entomology Bulletin 72*, now first published.

Barnacles in the public service are not unheard of, and now we have a document devoted exclusively to them. The particular barnacles treated of are found in the show-cases of the National Museum, and the series name and number of the pamphlet in which the illustrations and descriptions are found is *National Museum Bulletin 60*.

The Military Information Division of the War Department has epitomized the history of the Russo-Japanese War in a single volume, and not a large one at that. By means of 167 pages of text, an index, and a bunch of maps this great history is put into a nutshell, so to speak.

The second edition of the *American Ephemeris and Nautical Almanac* for 1908 is among the month's issues.

While November saw no monumental work come forth from the Government presses, there is much of interest and value to be found in the official publications of the month. And this is true of every month, the year round, and year after year.

---

As it is a current prediction that a bill for the creation of a National Board of Health will be introduced at the first session of the Sixtieth Congress, it may be of present interest to recall how the former National Board of Health was made to die a lingering death by slow starvation. The Board was created by an act approved March 3, 1879 (45th Cong., 3d sess., chap. 202), providing for the appointment by the President of seven members and the detail of one member each from the Army, the Navy, the Marine-Hospital Service, and the Justice Department. The duties assigned to it were to obtain information as to all matters affecting the public health, to advise the departments of the general Government and the Executives of the States on such matters, and to report a plan for a national public health organization. The act also requested and directed the National Academy of Sciences to cooperate with the Board. The new Board was organized April 2, 1879. By act of June 2, 1879 (46th Cong., 1st sess., chap. 11), an act of the preceding year which had established a national quarantine system under direction of the Marine-Hospital Service was repealed and the powers and duties which had been conferred by it were transferred to the National Board of Health, for whose work half a million dollars were appropriated, but the operation of the act was limited to a period of four years. The Board published Annual reports,

1879-85, seven in all, the first two for calendar years, the others for fiscal years. All were printed as numbered Congressional documents, and all but that for 1884 were also printed in a cloth edition without document number. In 1884 the Annual reports for 1880-83 were reprinted by order of Congress, 1,000 copies of each. The numerous appendixes to these reports were usually published also in separate pamphlets. The Board also made quarterly reports to the Secretary of the Treasury, and issued a weekly Bulletin in quarto form from July 5, 1879, to July 1, 1882. The final number was the first of volume 4. Publication was suspended at this point because the printing appropriation had given out, and it was never resumed. Sundry supplements to the Bulletin and a numbered series of circulars were also printed. The Board was composed of eminent men, but it failed to find favor with Congress and it was starved to death. For the first few years its annual appropriation was \$75,000, but by act of August 7, 1882, the Board was directed to confine its activities to cholera, smallpox, and yellow fever, and its support was limited to such part of an appropriation of \$50,000 in aid of State and local quarantine authorities as the Secretary of the Treasury might allot to it. March 3, 1883, \$10,000 was appropriated, but its expenditure was limited to the pay and personal expenses of members of the Board. March 3, 1885, there was a small appropriation for rent and employees for a term to end the same month. On the same date was granted \$5,000 for pay and expenses of members. August 4, 1886, a similar appropriation was made of \$60. March 2, 1889, the final appropriation was voted, \$1,004 for storage of books, records, and furniture to March 4, 1889, and for their transportation to the Office of the Surgeon-General of the Army, "where they shall hereafter be stored." The act of June 2, 1879, conferring extensive powers upon the Board, but limiting its operation to four years, was not repealed or renewed. The Board therefor virtually expired June 2, 1883.

---

The following order has been received from the Commerce and Labor Department, and, although it does not go into effect until the beginning of the new year, it has been thought well to publish it here for the information of those interested in the publications mentioned: "*Ordered*, That commencing with January 1, 1908, the Monthly notice to mariners, issued by the Coast and Geodetic Survey, be consolidated with and made a part of the Weekly notice to mariners, issued by the Light-House Board."

**Geologic atlas of United States.** See Geological Survey.

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply and irrigation papers, which are intended for free distribution; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

**Bulletin—**

277. Mineral resources of Kenai Peninsula, Alaska: Gold fields of Turnagain Arm Region, by Fred H. Moffit; Coal fields of Kachemak Bay Region, by Ralph W. Stone. [Revised edition.] 1907. 80+xi p. 5 il. 18 pl. (incl. maps, 1 in pocket). [Cover title bears imprint 1906.] \* Paper, 25c. GS 6-772/4
309. Santa Clara Valley, Puente Hills, and Los Angeles oil districts, southern California [with bibliography]. 1907. xi+266+vii p. 17 [163] il. 41 [24] pl. (incl. maps, 1 in pocket). \* Paper, 80c. GS 7-1563/4
318. Geology of oil and gas fields in Steubenville, Burgettstown, and Claysville quadrangles, Ohio, W. Va., and Pa.; by W. T. Griswold and M. J. Munn. 1907. 196+vii p. 13 pl. (3 in pocket, incl. maps, 6 in pocket). \* Paper, 75c. GS 7-1534/8
324. San Francisco earthquake and fire of Apr. 18, 1906, and their effects on structures and structural materials [with bibliography]. 1907. xii+170+i p. 2 il. 57 pl. (incl. maps). (Geological Survey. Bulletin 324.) \* Paper, 50c. GS 7-1565/7

CONTENTS.—Preface; by Joseph A. Holmes.—Earthquake as natural phenomenon; by G. K. Gilbert.—Effects of earthquake and fire on various structures and structural materials; by Richard L. Humphrey.—Effects of earthquake and fire on buildings, engineering structures, and structural materials; by John Stephen Sewell.—Earthquake and fire and their effects on structural steel and steel-frame buildings; by Frank Soulé.—List of papers relating to earthquake and fire.

**Geological Survey—Continued.**

Topographic sheets. See name of place under which sheet is issued.

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About three-tenths of the area of the country, excluding Alaska, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Water-supply and irrigation paper—**

198. Water resources of Kennebec River basin, Me., by H. K. Barrows; with section on Quality of Kennebec River water, by George C. Whipple. 1907. vi+235+iii p. 17 il. 7 pl. (incl. map). \* Paper, 30c. GS 7-1539/5

**Parks, National.** See National forests.

**Patent Office.**

NOTE.—The Patent Office publishes specifications and drawings of patents, both in single copies and monthly volumes, the former at 5c. and the latter at \$5.00. The former are not enumerated in this catalogue. For certified copies of patents, including specification, drawing, certificate, and grant, the price is 80c. A variety of indexes, giving a complete view of the work of the Office from 1790 to date, are published at prices ranging from 25c. to \$10.00 per volume. The Rules of practice and pamphlet Patent laws are furnished free. The Patent Office issues coupon orders in packages of 20 at \$1.00 per package, or in books containing 100 coupons at \$5.00 per book. One coupon will procure a specification with drawings, and two coupons a copy of the Official gazette. They are good until used. Address Chief Clerk, Patent Office.

Official gazette, Nov. 5-26, 1907; v. 131, nos. 1-4. 1907. c. t. o. [cxii]+1-1166 p. il. large 8° [Weekly.] † Paper, 10c. single copy, \$5.00 a yr.

**Patents.** Official gazette, Nov. 5-26, 1907; v. 131, nos. 1-4. 1907. c. t. o. [cxii]+1-1166 p. il. large 8° (Patent Office.) [Weekly.] † Paper, 10c. single copy, \$5.00 a yr.

**Patuxent River.** Patuxent folio, Md.-D. C. Washington, Geological Survey, 1907. c. t. o. 12 p. 2 il. 1 pl. [3] maps, large 4° (Geological Survey. Geologic atlas of United States, folio 152.) \* Paper, 25c. GS 7-1582

### Smithsonian Institution.

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

Proceedings of board of regents for year ending June 30, 1906, report of executive committee, acts and resolutions of Congress. 1907. [i]+xi-li p. ([Publication] 1743.) [From report, 1906.] †

## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

The "Notes of general interest" in the October issue of the Monthly catalogue contained the following paragraph:

"This number of the Monthly catalogue will be sent to several hundred libraries which are not now on our regular mailing list. If librarians can make use of the Catalogue and desire to have their libraries supplied in the future, they should notify us at once, giving plainly their address.

Unless such a request is received, future issues will not be sent. This applies only to those libraries which are not now on the regular mailing list for the Monthly catalogue.

The edition is limited to 2,000 copies, and it is our desire that every copy be placed where it will be of the most service. Back numbers from July, 1907, will be furnished on application."

Our library list was carefully scanned and a selection made of those libraries of importance which were considered as probably interested in public documents. Eight hundred and seventy-five such libraries were placed upon the list and the Catalogue forwarded accordingly. We have received replies from 35 of these libraries, indicating that either the Catalogue is not desired; or, what is more probable, that the library assistant into whose hands it fell did not read the notes. But we are not to be discouraged. This month a different list will be treated to a sample copy. We desire to place the Catalogue in the hands of those who can make use of it. If we can not interest the libraries, we will try the press.

Those libraries receiving the Monthly catalogue for the first time with this issue should let us know *at once* if they desire to receive future numbers.

---

Attention is called to the entries for private and public acts of Congress which appear under Congress only.

Owing to the number of laws passed during a session it has been deemed advisable to make an exception of this class of publications. They will be entered in full and arranged alphabetically according to subject. The only references in the main alphabet will be such general ones as "Acts of Congress," "Laws," "Public laws," etc., to Congress.

Only one law appears this month, Public joint resolution 1.

---

The Agriculture Department leads the procession this month with the great record of no fewer than 49 new publications for a single month's output—and all of practical value and current interest. First in rank and popular interest is the Annual report of Sec-

retary Wilson, which this year presents a wonderful picture of agricultural prosperity and progress. From the Secretary's office also issue four new Farmers' bulletins. The Animal Industry Bureau furnishes two publications; the Chemistry Bureau, two; the Entomology Bureau, four; the Experiment Stations Office, six; the Forest Service, twelve; the Plant Industry Bureau, eleven; the Publications Division, two; the Statistics Bureau, three; and the Weather Bureau, two. All of these, of course, have been made the subject of full descriptive entries in their proper alphabetical order in the body of the Catalogue.

That interesting reference manual, the Blue book, of which the actual title is "Official register of the United States," appears this year in new form. It is still blue, but blue cloth instead of blue leather, and it has shrunk very much since the last previous issue. This is due to the fact that the information contained is given in more condensed form. In the old form the Blue book had grown to most unwieldy and inconvenient proportions. Each odd-numbered year, beginning with 1817, the Register had been issued in blue leather. It will take a little time to get used to its unfamiliar look.

The Department of Commerce and Labor issues a digest of the inheritance-tax laws of Great Britain, France, and Germany, with an outline of inheritance taxation in this country and a collection of judicial decisions relating thereto. It appears from this compilation that the leading European countries now tax inheritances on the progressive principle, and also that both Congress and the States have recognized the same principle in legislation. Great Britain's finance act of 1894 was the first in Europe (except in Switzerland) to impose such duties at rates increasing with the size of the estate to high percentages. France carried the idea further still in 1901, and in the German law of 1906 the rates are so sharply progressive that inheritances exceeding 1,000,000 marks (\$200,000), going to distant relatives, are taxed 25 per cent. In Great Britain the finance act of 1907 raises the maximum of inheritance taxation to about 23 or 24 per cent. All United States laws bearing on the subject are cited, from the stamp act of 1797 to the war-revenue measure of 1898. The latter imposed a progressive legacy duty which was upheld by the Supreme Court. Reference to a large number of cases shows the point to be well established that taxes upon inheritances, whether proportional or progressive, do not violate the constitutional provisions requiring uniformity and equality of taxation.

The Annual report of the commissioner-general of immigration, which is listed this month, is always of interest to students of sociology and racial problems, and it is especially so this year, when the influx of new citizens has again exceeded all previous records. The interest is increased by the addition of several portraits of notable newcomers and families and of statistical diagrams graphically illustrating the prodigious growth of the immigration movement. There is also this month a new edition of the Immigration laws and regulations.

As long ago as November 8, 1902, the President instructed the commissioner of fish and fisheries to appoint a commission to investigate the salmon fisheries of Alaska. This of course was done, and the commission began work in 1903, and late in that year sent in a preliminary report, which was transmitted to Congress and under date of January 28, 1904, was ordered printed as House document 477, 58th Congress, 2d session. This was not reprinted in either of the series of publications of the Fisheries Bureau, but in the issue of the Bulletin for the same year appeared *Isopods from the Alaska salmon investigation*, by Harriet Richardson, being the first of a series of papers based on the collections made in the course of the work of the Alaska Salmon Commission. Nothing was published in relation to salmon, and nothing more of any kind from the commission, till the present month, when an elaborate and beautifully illustrated monograph, *Fishes of Alaska*, by B. W. Evermann and E. L. Goldsborough, was issued as Bureau of Fisheries document 624. This was speedily followed by Document 627, *Some observations on salmon and trout in Alaska*, by F. M. Chamberlain. Both of these are fruits of the salmon inquiries of 1903. The preliminary report of that year is and will be the only report from the Alaska Salmon Commission as a body.

The Annual report and the Bulletin of the Fisheries Bureau are no longer issued in bound volumes for distribution. All of the publications of the Bureau are issued in paper-covered pamphlets, numbered as documents in one series. All of these which are parts of the annual Bulletin are so designated on the title-page and are paged continuously. A volume title-page, table of contents, list of illustrations, and index for each volume of the Bulletin will be sent to every address to which all the separate parts of such volume have been sent.

---

In the Schedule of volumes of the documents and reports of the 59th Congress, 2d session, entered in this catalogue, the following foot-note appears:

"No. 5058 is assigned to the Senate Journal, and No. 5059 to the House Journal, 59th Congress, 2d session. Nos. 5058, 5059, and 5060 were originally assigned to the Document catalogue, 59th Congress, 1st session, and the Senate and House Journals, 59th Congress, 2d session, respectively. The change was made because the Document catalogue is to cover both sessions and appear as no. 5215. There will therefore be no House document no. 944, 59th Congress, 1st session."

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply and irrigation papers, which are intended for free distribution; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

28th annual report of director, fiscal year 1907. 1907. iv+80 p. 1 pl. (map). \* Paper, 10c. 4-18125/7

**Bulletin—**

325. Study of 400 steaming tests [of coal] made at fuel-testing plant, St. Louis, Mo., 1904-06 [with bibliography], by Lester P. Breckenridge; [and introduction, by Walter T. Ray]. 1907. 196+iii p. 76 il. \* Paper, 20c. GS 8-2/3

333. Coal-mine accidents, their causes and prevention, preliminary statistical report, by Clarence Hall and Walter O. Snelling; with introduction, by Joseph A. Holmes. 1907. 21+[1] p. \* Paper, 5c. GS 8-3/2

**Topographic sheets—**

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1: 62,500, 1: 125,000, and 1: 250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About three-tenths of the area of the country, excluding Alaska, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

Water-supply and irrigation paper 216; Geology and water resources of Republican River Valley and adjacent areas, Nebr.; by G. E. Condra. 1907. 71+x p. 3 il. 13 pl. (incl. maps.) \* Paper, 15c. GS 8-1/3

**Northern and Northwestern Lakes Survey.**

NOTE.—Lake Survey charts may be obtained from U. S. Lake Survey Office, Detroit, Mich., or from U. S. Engineer Office, Buffalo, N. Y. Payments must be made before charts are sent, and if made by mail must be by postal or express money order payable to the order of U. S. Lake Survey Office if ordered from Detroit, or to the order of U. S. Engineer Office if ordered from Buffalo. These charts may also be obtained, for cash only, at U. S. Canal Office at Sault Ste. Marie, Mich. They will be sent by express, the express charges to be paid by the purchaser on receipt of the charts, or free by mail at the purchaser's risk. Purchasers should indicate, when ordering the charts, whether they wish them sent by express or mail. The latter will be used when no choice is indicated.

The bulletins and supplements of the Lake Survey may be obtained free upon application at U. S. Lake Survey Office, Detroit, Mich., and at the engineer offices in Duluth, Milwaukee, Chicago, Grand Rapids, Cleveland, Buffalo, and Oswego.

- Patent Office.**

NOTE.—The Patent Office publishes specifications and drawings of patents, both in single copies and monthly volumes, the former at 5c. and the latter at \$5.00. The former are not enumerated in this catalogue. For certified copies of patents, including specification, drawing, certificate, and grant, the price is 80c. A variety of indexes, giving a complete view of the work of the Office from 1790 to date, are published at prices ranging from 25c. to \$10.00 per volume. The Rules of practice and pamphlet Patent laws are furnished free. The Patent Office issues coupon orders in packages of 20 at \$1.00 per package, or in books containing 100 coupons at \$5.00 per book. One coupon will procure a specification with drawings, and two coupons a copy of the Official gazette. They are good until used. Address Chief Clerk, Patent Office.

Official gazette, Dec. 3-31, 1907; v. 131, nos. 5-9. 1907. c. t. o. [cxlvii]+1167-2422 p. il. large 8° [Weekly.] † Paper, 10c. single copy, \$5.00 a yr.

**Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

Immediate delivery to Designated Depository Libraries of departmental, annuals and serials, and all numbered Congressional publications.

The delay in delivery, by the Superintendent of Documents, of those annual reports, serials, and other valuable departmental publications, which by law are also issued as publications of Congress, has been for years a much-discussed topic among librarians.

The reason for this delay, as has been stated and restated, is that the numbering of the departmental publications into the Congressional Series makes it necessary to hold them for many months until they can be arranged in suitable volumes for binding.

The departmental editions, not being subject to such restrictions, can be bound and delivered as soon as printed, and are therefore available for immediate distribution.

Libraries desiring the books promptly and not being able to obtain their copies from this office for months, or possibly years, after issue, have become regular applicants at the publishing offices, and their needs are usually supplied.

The cause of the recent complaints is that many of the publishing offices have learned that a list of libraries is maintained in this office to which are sent, by operation of law, a copy of each and every document issued, and in order to avoid duplication they have called upon us for the names of these designated libraries that they might strike them off their mailing lists. Thus the depositories are compelled to wait for the sheep-bound reserve.

The complained-of delay in delivery by this office, and its consequent evils, can only be remedied by the removal of these annuals and serials from the Congressional Series entirely, or the delivery of them to depository libraries in their department editions instead of as Congressional documents; the first proposition being the more desirable.

In a report on needed document legislation made by me to the Public Printer under date of March 26, 1906, this matter of omitting the Congressional document number from these classes of publications was fully discussed, and the reasons therefor made plain.

A copy of this report was forwarded to the clerk of the Joint Committee on Printing of Congress, and the matters therein were by him brought to the attention of the Printing Investigation Com-

mission which was then at work upon a bill embodying provisions to remedy some of the glaring defects in the printing act of January 12, 1895.

In a modified form, after a thorough investigation of the subject, the Commission reported a clause in their bill embodying the suggestions made, as follows:

Publications ordered printed by Congress, or either House thereof, shall be in four series, namely, one series of reports made by committees of the Senate, to be known as Senate reports; one series of reports made by the committees of the House of Representatives, to be known as House reports; one series of documents, other than reports of committees, the orders for printing which originate in the Senate, to be known as Senate documents, and one series of documents, other than committee reports, the order for printing which originate in the House of Representatives, to be known as House documents. The publications in each series shall be consecutively numbered in the order in which they are received, the numbers of each series continuing in unbroken sequence throughout the entire term of Congress; but these provisions shall not apply to documents printed in confidence for the use of the Senate in executive session, or to confidential hearings of committees. If the publication so ordered be an annual report or serial publication originating in or prepared by an Executive Department, bureau, office, commission, or board, it shall not be numbered in the document or report series of either House of Congress, but shall be designated by title as hereinafter provided. Of all Department reports required by law to be printed the usual number shall be printed concurrently with the departmental edition.

In the binding of Congressional numbered documents and reports every publication of sufficient size on any one subject shall hereafter be bound separately, and receive the title suggested by the subject of the volume; and the others shall be arranged in convenient volumes and bound in a manner as directed by the Joint Committee on Printing.

In submitting the resolution the Printing Investigation Commission had this to say regarding its provisions (59th Congress, 2d session, H. Doc. 736):

One of the complaints reaching the commission from librarians and others having custody and frequent use of public documents, Congressional and departmental publications, has been on the score of duplication of and vagueness in titles. Since the opening of the Fifteenth Congress, in 1817, all documents and reports printed by order of Congress have been numbered in series, presumably for convenience of identification. The question of consecutive numbering seems to have overshadowed both the importance of either title or classification, and that which may have been, in the early stages of our history a convenience, has become not only an inconvenience, but grotesquely confusing.

It is conceivable that the present system was applicable to conditions existing at the time of its adoption, when but 647 documents and reports were printed during the entire term of a Congress, but when applied to present conditions, which involve the issuance of from 10,000 to 12,000 publications during the term of one Congress, the number in the Fifty-eighth Congress having been 11,189, with prospects of greater increase as the operations of the Government are amplified, it is apparent that some alteration of practice should follow.

Under prevailing practices, a multiplication of designations, necessitating the employment of six different terms to describe a document without even then disclosing its title, has resulted, as in the case of "Fifty-first Congress, second session, vol. 16 of House Executive Document," which is "part 2 of vol. 5 of part 5 of No. 1 of part 2 of vol. 16."

To exclude from the numbered series all but strictly Congressional documents would obviate the confusion above noted, working no hardship

upon any one, depriving no Senator or Member of any part of his quota, but meeting the enthusiastic approval of every librarian charged with the custody of public documents.

The remedy contemplated by the Commission would further enable the superintendent of documents to supply to designated depository departmental publications while the same were of current interest, instead of withholding such publications until they can receive their document number in the Congressional series. By reason of the delay in supplying the depositories due to the present practice, these depositories secure, through Department officials or through Senators and Representatives, copies of the departmental editions of current publications. In due course of time, but in many instances after such documents and reports are no longer current, these depositories are supplied with duplicate copies of the same publications under the regular depository distribution. The original copy is then returned to the superintendent of documents, who must find some other outlet of distribution for a document out of date; and, as a result, hundreds of tons of such documents returned from various depositories are lying in the warehouses of the Government, with no one willing to receive them. The expense of the unnecessary mail transportation alone is an item of which Congress may well take cognizance.

But more important than all other considerations, from the standpoint of expense, is the unnecessary cost of putting every departmental publication, including all the annual and the more important bureau reports, to press for a second time. It should be understood that before these publications are transmitted to Congress they are printed as departmental publications, and printed copies rather than manuscript copies constitute the report officially transmitted. These publications are then reprinted in the Congressional numbered series. The proposal of the Commission cures this glaring evil.

The remedial provision proposed by the Commission contemplates the exclusion from the numbered Congressional series of all departmental publications and provides for their designation by title. It will also afford to the superintendent of documents, whose duty it is to compile these publications for purposes of binding and distribution, authority to classify them by subjects instead of as now, arbitrarily, by consecutive numbers, such numbers and arrangement being governed only by the date of their transmittal to Congress.

The arrangement suggested in the proposed legislation has been presented to the Librarian of Congress, as well as to many of the other important libraries of the country, and, without exception, it has met with their approval. In fact, the criticism of the present method and the suggestion of the proposed reform emanated from the librarians, and the importance of its adoption has been frequently urged by the American Library Association. The Commission has yet to hear of a single objection urged by any librarian or public official charged with the custody or frequent use of Government publications to this proposed plan, and it has been freely and widely discussed.

This legislation was finally enacted without amendment and became a law, March 1, 1907 (34 Stat. L., 1014), to the gratification of this office and of all the librarians of the country, especially those of designated depositories, but what seemed unobjectionable in theory, in actual practice was found to work a hardship at that point where complications could least be tolerated.

The files, as well as the entire scheme for quick handling of these publications in the Document Rooms and Libraries of the Senate and House of Representatives, were found not to be susceptible of change from a system by numbers to one by titles. The first deliveries, therefore, of such unnumbered publications as were formerly included in the regular numbered series were met with protest.

A meeting of all the Congressional distributors and the Superintendent of Documents was called by the Printing Investigation Commission to consider the matter, and it was decided to make a thorough investigation and draw up such legislation as might be necessary to relieve the situation with as little embarrassment as possible to those interests which the law of March 1, 1907, had so acceptably served.

As a result of this cooperative effort, a resolution was reported on the third day of the present Congress, December 4, 1907, and after considerable unnecessary delay, caused by parliamentary prerogatives, wielded for party purposes and not from an opposition to the resolution, this resolution, as slightly amended in the House, became a law on January 15, 1908.

The resolution in full as passed is as follows:

[PUBLIC RESOLUTION No. 3]

Joint Resolution Amending an Act relative to the public printing and binding, approved March first, nineteen hundred and seven.

*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,* That publications ordered printed by Congress, or either House thereof, shall be in four series, namely: One series of reports made by the committees of the Senate, to be known as Senate reports; one series of reports made by the committees of the House of Representatives, to be known as House reports; one series of documents other than reports of committees, the orders for printing which originate in the Senate, to be known as Senate documents, and one series of documents other than committee reports, the orders for printing which originate in the House of Representatives, to be known as House documents. The publications in each series shall be consecutively numbered, the numbers in each series continuing in unbroken sequence throughout the entire term of a Congress, but the foregoing provisions shall not apply to the documents printed for the use of the Senate in executive session: *Provided*, That of the "usual number," the copies which are intended for distribution to State and Territorial libraries and other designated depositories of all annual or serial publications originating in or prepared by an Executive Department, bureau, office, commission, or board shall not be numbered in the document or report series of either House of Congress, but shall be designated by title and bound as hereinafter provided, and the departmental edition, if any, shall be printed concurrently with the "usual number:" *And provided further*, That hearings of committees may be printed as Congressional documents only when specifically ordered by Congress or either House thereof.

SEC. 2. That in the binding of Congressional documents and reports for distribution by the superintendent of documents to State and Territorial libraries and other designated depositories, every publication of sufficient size on any one subject shall hereafter be bound separately and receive the title suggested by the subject of the volume and the others shall be distributed in unbound form as soon as printed. The Public Printer shall supply the superintendent of documents sufficient copies of those publications distributed in unbound form, to be bound and distributed to the State and Territorial libraries and other designated depositories for their permanent files. The library edition, as well as all other bound sets of Congressional numbered documents and reports, shall be arranged in volumes and bound in the manner directed by the Joint Committee on Printing.

SEC. 3. That section two of an Act to amend an Act providing for the public printing and binding, and so forth, approved March first, nineteen hundred and seven, is hereby repealed.

Approved, January 15, 1908.

As a matter of record and information the report on this resolution (60th Cong., 1st sess., Senate report No. 1) is herewith reproduced.

REPORT SUBMITTED BY MR. PLATT, FROM THE COMMITTEE ON PRINTING, TO ACCOMPANY S. R. 1, AND ORDERED TO BE PRINTED DECEMBER 4, 1907.

The Committee on Printing having had under consideration a resolution suggested by the Printing Investigation Commission amendatory of an act relating to the public printing and binding, and so forth, approved March 1, 1907, being chapter 2284 of volume 34 of the United States Statutes at Large, reports the accompanying joint resolution with the recommendation that it be passed.

A report from the Printing Investigation Commission recommending this proposed legislation is submitted herewith and made a part of this report.

WASHINGTON, December 3, 1907.

The following report and recommendation has been approved by the Printing Investigation Commission, with direction that it be referred to the Committee on Printing of the United States Senate for its information and such action as may be deemed proper.

T. C. PLATT, *Chairman.*

WASHINGTON, December 2, 1907.

Hon. T. C. PLATT,

*Chairman Printing Investigation Commission,*

*United States Senate.*

SIR: There was reported to Congress in the second session of the Fifty-ninth Congress, from the Printing Investigation Commission, a bill amending in several particulars the act of January 12, 1895, providing for the public printing and binding. The bill thus reported was enacted into law and was approved March 1, 1907. Among the several provisions of this act was one, contained in section 2, eliminating from the numbered series of Congressional documents the annual and serial publications of the Executive Departments. The recommendation for this amendment of the law was based upon representations repeatedly made by the superintendent of documents, librarians in charge of depository libraries, and by members and officers of the American Library Association.

The objections to the law as it stood were numerous:

First, the Government had provided for the placing of file copies of its publications in every State and Territorial library and in one library located in each Congressional district. Under this partnership arrangement between the Government and the libraries the Government publications remained the property of the Government, and were so marked. They were not intended for circulation and were not permitted to be removed from the various library buildings. The copies intended for distribution to these depository libraries were withheld for periods ranging from six months to more than two years.

Second, as a result of these delays the libraries, having need for the more important publications of the Government, obtained them through various channels from the document rooms and folding rooms of the Senate and House of Representatives and from the Departments, the copies provided for them by law remaining in the meantime in the office of the superintendent of documents, awaiting completion of the scheme of arrangement and binding of the Congressional set. Thousands, and probably millions, of these duplicate copies first obtained by the libraries are now stored in various depository libraries. Large numbers of them have been returned to the superintendent of documents and other quantities he has not been able to receive for want of storage room. Many of them, except for the purposes of a file, are of little, if any, value, and, aside from the original cost of these publications, the cost of carriage by the Government, variously

estimated by the Post-Office Department at from 5 to 8 cents per pound, is a considerable item.

Third, under the arrangement heretofore in effect the Congressional documents were bound in the order of their numbers, without reference to related subjects, the position of each document in the set being arbitrarily determined by its number, so that a report, for instance, on the seal fisheries of Alaska might be found under the same cover with a report on submarine vessels, or a report on forestry bound together with reports on The Hague conference, the extinction of the American bison, or the propagation of the Alaskan reindeer.

Fourth, putting back to press of publications for the printing of copies which might properly be printed concurrently with the Congressional edition.

Fifth, expensive and important duplication of entries in cataloguing due to the printing of identical publications in what constituted, under all rules of cataloguing, separate editions.

The superintendent of documents was invited to formulate a plan and suggest proper amendment of the law under which such plan could be put into operation. This he did and his suggestions were submitted to the superintendents of the document rooms of the Senate and House, who jointly recommended an amendment narrowing their scope to include only the annual and serial publications of the Executive Departments, which constitute, in bulk, three-fourths of the entire Congressional set and in numbers less than 5 per cent of documents and reports, these annual and serial publications to be taken from the numbered series and to be designated by title alone. The superintendents of the Congressional document rooms represented that this would place some additional labor upon their offices, but expressed the belief that it would work no serious hardship or confusion.

The officials of the document rooms and libraries of both the Senate and the House have, since this provision became operative, expressed the belief that it would lead to delay, if not confusion, in their offices, and in the light of this expression the subcommittee is of the opinion that this change should not be inaugurated as it applies to these offices.

By direction of the subcommittee a conference of the officials of the libraries and document rooms of the Senate and House with the superintendent of documents was held on November 16, and a modification of the provisions of section 2 of the act of March 1, 1907, as it relates to the numbering of the annual and serial publications of the Executive Departments was agreed upon, which will, if adopted, leave to the Congressional offices, undisturbed, the system heretofore in vogue, and will at the same time conserve four out of the five points of economy and advantage sought to be obtained by the operation of this section, the single advantage waived being that relating to cataloguing. The restoration of the document numbers to the annual and serial publications delivered to Congress will make necessary a continuance of the duplication of entries in cataloguing. It will, however, leave to the document rooms their former system undisturbed, and, by supplying new title-pages to less than twenty documents at this time, the documents of the present Congress will be uniform with those of the past.

The plan, as outlined at the conference referred to, was submitted to the chairman of the committee of the American Library Association on relations with the Federal and State governments, and a letter from that officer (Dr. Bernard C. Steiner), hereto appended, expresses the belief that the plan will afford to the depository libraries relief from the conditions of which they have heretofore complained.

The subcommittee is of the opinion that there should not be the slightest risk of delay or confusion in either the filing or distribution of the documents intended for Congress, and if, in their efforts toward cooperation in the work of the Commission, any officer of Congress has acquiesced in or approved the inauguration of conditions that are difficult to administer, it is thought that the Commission can ill afford to be less magnanimous by failing to recommend prompt and immediate relief.

\* \* \* \* \*

The following correspondence is made a part of this report:

PRINTING INVESTIGATION COMMISSION,  
Washington, November 30, 1907.

Mr. WM. L. POST,

*Superintendent of Documents, Washington, D. C.*

SIR: I am transmitting herewith draft of a proposed joint resolution in modification of the provisions of section 2 of an act approved March 1, 1907 (Public—No. 153), as it relates to the numbering of annual and serial publications of the Executive Departments.

For the information of the Printing Investigation Commission will you kindly state whether, in your opinion, this proposed amendment will still enable your office to supply to the depository libraries the publications heretofore included in the library or depository reserve promptly as issued, and afford the opportunity for classification by related subjects?

Very respectfully,

C. B. LANDIS,  
*Chairman Subcommittee, etc.*

OFFICE OF SUPERINTENDENT OF DOCUMENTS,  
Washington, December 2, 1907.

DEAR SIR: Replying to your letter of November 30, transmitting draft of a proposed joint resolution in modification of the provisions of section 2 of an act approved March 1, 1907 (Public—No. 153), as it relates to the numbering of annual and serial publications of the Executive Departments or other independent publishing offices in the numbered series of Congressional publications, I would state that the draft seems to cover the ground completely and, in my opinion, will readjust matters to the satisfaction of the libraries and document rooms of the House and Senate and at the same time not interfere with the more logical distribution to designated depository libraries.

In consideration of the careful investigation made by the Commission before submitting Public—No. 153 for legislative action, it seems strange that the difficulties which are now discovered in the handling of unnumbered publications in the document rooms and libraries of the Senate and House should have been underestimated, but, after a further investigation of the subject personally, I am convinced that the request of these officers for the reinstatement of the numbering of those publications which were excluded by the act of March 1, 1907, is just, and the only possible solution to insure that quick service which is demanded of them during the sessions of the respective bodies to which they are attached.

Besides replacing the numbers on the "up number," and thus doing away with any dissatisfaction among Congressional officers, the joint resolution as drafted provides for the designated depositories a distribution which has long been desired in that it supplies them with the publications as soon as issued and while they are of the greatest value.

The removal of the annuals and serials from the Congressional numbered series in the library edition permits of the immediate delivery to the libraries of nearly 75 per cent of what was formerly the sheep-bound reserve when considered as to the number of pages and volumes, or less than 5 per cent when considered as to the number of documents and reports. Of the remainder, about one-fourth would be large enough to bind separately and deliver immediately, as provided by law, and the remaining three-fourths would necessarily be held to be bound in miscellaneous volumes and distributed as formerly.

For the Fifty-eighth Congress, third session, the Senate reports numbered 601, aggregating 2,105 pages, and the House reports numbered 1,098, aggregating 2,560 pages, or a total of 1,699, aggregating 4,665 pages. Of these reports 139 were "of a general public character," and aggregated 1,305 pages, and under the law as it stands at present would be held and bound "as directed by the Joint Committee on Printing" and the remainder would be forwarded to the libraries in unbound form.

The purpose of this enactment was to supply the libraries with everything printed and still not compel them to lumber up their shelves with

a lot of material which would never be referred to. While this is commendable, it does not serve the purpose to a "designated depository," as it has always been the intention that complete sets of Government publications should be preserved in these depositories.

The law is also weak in that it provides quick delivery of the very publications which are of no particular value, being considered "not of a general public character," while it compels the superintendent of documents to hold for binding the publications which are of the most interest.

It would not, however, be advisable to distribute those publications which are of "a general public character" in unbound form as soon as printed unless the libraries were to be supplied in the future with bound volumes to replace the unbound copies.

For years the cry of the librarians has been for the immediate delivery of all Congressional documents, and the resolution provides for this important distribution which will be appreciated by the librarians. The duplication of the material, as will be seen by the figures given above, would not be great and the cost not much over \$1 a session for each depository.

Such legislation will not only provide the libraries with material while it is of the most value, but will enable this office to devise a means of binding for their permanent files the valuable documents and reports in such a manner that they may be easily available and subject to better classification on the library shelves.

Very truly, yours,

WILLIAM L. POST,  
*Superintendent of Documents.*

Hon. CHARLES B. LANDIS,  
*Chairman Subcommittee,  
Printing Investigation Commission,  
The United States Capitol.*

(Letter from Doctor Steiner, chairman committee on relations with the Federal and State governments, A. L. A.)

THE ENOCH PRATT FREE LIBRARY OF BALTIMORE CITY,  
*November 26, 1907.*

Hon. WILLIAM PINKNEY WHYTE,  
*104 E. Lexington Street, Baltimore.*

MY DEAR SENATOR WHYTE: It was my pleasure this morning to have a full conference with Mr. Ricketts, secretary of the Congressional Printing Investigation Commission, and the plan which he then outlined to me in my opinion is quite a satisfactory one for the distribution of public documents, inasmuch as it provides for the supplying to depository libraries of the copies provided for them promptly when issued; the avoidance of duplication, which has resulted from failure to do so; the possibility of classification of documents by related subjects.

Yours, very truly,

BERNARD C. STEINER.

---

UNITED STATES SENATE,  
OFFICE OF THE SECRETARY, LIBRARY,  
*November 21, 1907.*

Mr. VICTOR L. RICKETTS,  
*Secretary Printing Investigation Commission.*

DEAR SIR: In response to your invitation that I suggest such amendment of the act of March 1, 1907 (Public—No. 153), as the uses of the Senate seem to me to require, I beg leave to say that I trust this library may continue to receive copies of all public documents, numbered and bound, as provided by law before the said act of March 1, 1907.

The words—

"If the publication so ordered be an annual report or serial publication originating in or prepared by an Executive Department, bureau, office, commission, or board, it shall not be numbered in the document or report series of either house of Congress"

should be repealed, as especially detrimental to the usefulness of these volumes for the purposes of the Senate.

I am quite sure the Secretary of the Senate would approve of the above suggestion.

Very truly, yours,

EDWARD C. GOODWIN,  
*Librarian, U. S. Senate.*

Respectfully submitted.

C. B. LANDIS,  
WILLIAM PINKNEY WHYTE,  
J. B. PERKINS,  
*Subcommittee.*

The necessary replacing of the Congressional numbering on "usual number" of the annuals and serials is to be deplored, as two editions of these publications are thereby perpetuated, but the privilege of arranging the material comprised in the Congressional Series into more logical volumes is a great gain, while the sending of the annuals and serials to libraries in the departmental editions removes all the obstacles which distributing them as Congressional documents entailed.

In making a concession to the needs of the Congressional officials, so far as the numbering was concerned, this office gained for the libraries the immediate delivery of all Congressional documents and reports.

Under this new enactment, which goes into effect at once, those Congressional documents and reports which are of sufficient size and importance will be bound separately and immediately forwarded, and the remainder will be sent out unbound as issued.

The unbound copies will not be stamped "Property of the U. S. Government," nor will the libraries be charged with them. They will be at liberty to destroy what they do not care to keep, but *in no instance does this office desire the return of any of this unbound Congressional material at any time.*

Bound volumes for the permanent files, including duplicate copies of every document or report sent out in unbound form, will be distributed eventually, after being arranged and bound "in manner directed by the Joint Committee on Printing."

When these bound volumes are substituted for the unbound, the unbound may be disposed of in any way the library deems advisable, except that they *must not be returned* to this office.

When the Printing Committee reaches its decisions as to the binding to be applied to Congressional documents in the future, those annuals which have accumulated so far this Congress will be forwarded, and hereafter all annuals will be sent out concurrently with those of the department quota.

No longer will the librarians be compelled to beg for books which by law are theirs, as the prompt delivery by this office will obviate the necessity of obtaining duplicates from the publishing offices, and thus will one of the most vexing problems in public documentology be solved.

No list nor invoice will be sent, nor will the documents or reports be received in strict consecutive order. They will, however, be forwarded as quickly as issued and this office will keep track of the

numbers so that all will eventually be supplied. It will not be necessary for librarians to make requests for certain numbers unless to replace copies mutilated or lost, or which they can make use of in duplicate.

We would be glad of an expression from the librarians, as experience warrants, of the advantages or disadvantages which this new system entails; not so much for personal gratification, as a matter of record which should be carefully noted as we make rapid strides toward better methods in document production and distribution.

---

This is the month of annual reports. Though a newspaper story attributes to Secretary Taft the statement that when he has anything he wishes to conceal he puts it in his annual report, this may be regarded as only a graphic way of expressing his opinion that legislators and others do not read the annual reports of the Executive Departments and bureaus so much as they ought. Certain it is that the readiest and surest way to gain a good understanding of the vast and complex work the Government is doing is to read the annual reports. Nobody can read all of them, but everybody should be interested in one or more of them. The annual reports which are listed in this number of the Monthly catalogue are those proceeding from the

Adjutant-General	Governor of New Mexico
Animal Industry Bureau	Insular Affairs Bureau
Architect of Treasury	Light-House Board
Attorney-General	Mint Bureau
Auditor for War Department	Mount Rainier National Park
Biological Survey Bureau	Naval Observatory
California Military Department	Navigation Bureau, Commerce
Charities Board, D. C.	and Labor Dept.
Chemistry Bureau	Patent Office
Chief of artillery	Plant Industry Bureau
Chief of staff	Provisional governor of Cuba
Commissioners, D. C.	Public Roads Office
Comptroller of Treasury	Reform School, D. C.
Conference of State Health Offi-	Soils Bureau
cers with Public Health and	Steamboat Inspection Service
Marine-Hospital Service	
First assistant Postmaster-Gen-	
eral	

Here are only 29 all told, and the wise citizen who reads the whole list will surely know more of the interior workings of his Government than he ever knew before. It is true the majority of them are minor reports, issued by bureaus and boards instead of Departments. There is in fact but one Department report in the list. But it is from the bureau reports that the facts are taken for the Department reports. The more minor a report is the nearer it

gets to the actual work, and there is none of them from which facts at once interesting and significant may not be gathered by the student of Government methods.

The 39th annual list of merchant vessels of the United States, for the year ended June 30, 1907, has been issued. It is a complete guide to the merchant marine, showing the official number, the signal letters, the rig, the name, the gross and the net tonnage, the length, breadth, and depth, the number of the crew, the year when built, the place where built, and the home port of every bark, brig, barkentine, brigantine, catboat, cutter, catamaran, lugger, lateen, pilot boat, ship, schooner, sloop, yacht, steamship, steamer (whether screw, sidewheeler, or sternwheeler), barge, steam canal-boat, steam catamaran, gasoline, electric, naphtha, or alcohol motor-boat (whether screw, sidewheel, or sternwheel). In relation to the power boats and their service, the list tells whether they are used for passenger business or for freight, towing, ferrying, fishing, lightering, oyster-catching, whaling, dredging, piledriving, prospecting, or wrecking, and whether they are fire boats, pilot boats, police boats, tenders, or yachts. In addition to all this detail in relation to merchant vessels, the list gives similar particulars as to the vessels of the Navy and of the Quartermaster's Department of the Army, the Engineer Department of the Army, the Ordnance Department of the Army, the Revenue-Cutter Service, the Light-House Establishment, the Coast and Geodetic Survey, the Bureau of Fisheries, the Public Health and Marine-Hospital Service, and the Bureau of Immigration, for each of these Government establishments maintains a fleet of greater or less magnitude. This extended note on the contents of the Annual list of merchant vessels is given by way of illustrating the thoroughness with which the Government records are usually made and published.

Education Bureau Bulletin 3, series of 1907, is a translation of six lectures on the auxiliary schools of Germany for defective and backward children. This is a subject of great interest to teachers and to all humanely-minded persons, and it has been more maturely and thoroughly worked out in Germany than in the United States.

The long-expected memorial volume concerning John Paul Jones, the world-famous exemplar of desperate bravery in sea-fighting, has at last appeared and is found to be a very thorough-going piece of work. The occasion for its publication is the memorial exercises at Annapolis in April, 1906, but it contains much more than a report of those exercises. The official reports concerning the discovery and identification of the Admiral's body are printed in extenso, and they seem sufficient to set at rest all cavil as to the question of identity. Jones's personal report of his greatest sea-fight and other Jones papers of almost equal interest, a chronology of the events of his eventful life, and a most notable series of illustrations, including a round dozen portraits of the hero, give the book distinction and value. Though not formally a biography, it contains an amount of biographical material that will give it

place in the front rank of the Government's biographical publications. It is, indeed, unique, for never before in all history has a man 113 years buried been exhumed to be photographed and memorialized.

The Commerce and Labor Department issues a pamphlet announcing the organization in December last of the National Council of Commerce and outlining its composition and purposes.

Part 2 of Geological Survey Bulletin 316, being the annual report for 1906 on Contributions to economic geology, contains, among many other useful things, material information as to the new cheap fuel, "producer gas."

Part 2 of the Report of the commissioner of corporations is a very meaty and weighty document of a thousand pages. Its character may be judged from the fact that in his letter of submittal the commissioner makes the unqualified statement that the report definitely disproves the claim of the Standard Oil Company that it has reduced the price of oil and has been a benefit to the consumer. On the contrary, says the letter, the Standard has consistently used its power to raise prices, which would have been lower under normal competitive conditions. The commissioner adds that in view of the Government's suits against the Standard "some of the more detailed evidence regarding price discriminations is at present withheld from publication; and the same is true of evidence regarding other unfair practices, the most important of which are the maintenance of bogus independent companies, espionage over the business of competitors (especially by bribing railway employees to disclose their shipments), and deception as to the quality of oils sold." Surely, public documents are becoming refreshingly outspoken.

**Generic types.** See Type genera.

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply and irrigation papers, which are intended for free distribution; and maps, Monographs, and folios of the Geologic atlas and

**Geological Survey—Continued.**

the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

**Bulletin—**

316. Contributions to economic geology. [calendar year] 1906; pt. 2, Coal, lignite, and peat [with bibliography]; Marius R. Campbell, geologist in charge. 1907. 543+v p. 6 il. 23 pl. (incl. maps). \* Paper, 70c. GS 5-748/4
321. Geology and oil resources of Summerland district, Santa Barbara County, Cal.; by Ralph Arnold. 1907. 93 (87 and 88 omitted) +vii p. 3 il. 17 pl. (incl. maps). \* Paper, 25c. GS 7-1570/3
322. Geology and oil resources of Santa Maria oil district, Santa Barbara County, Cal.; by Ralph Arnold and Robert Anderson. 1907. 161+vii p. [106] il. 26 [12] pl. (incl. maps, 1 in pocket). \* Paper, 50c. GS 8-4/4

**Topographic sheets—**

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About three-tenths of the area of the country, excluding outlying possessions, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Water-supply and irrigation paper—**

93. Proceedings of 1st conference of engineers of Reclamation Service [Ogden, Utah, Sept. 15-18, 1903], with accompanying papers; by F. H. Newell. 1904 [reprint 1908]. 361+[i] p. 1 il. \* Paper, 25c. GS 4-137/3
94. Hydrographic manual of Geological Survey; by Edward C. Murphy, John C. Hoyt, and George B. Hollister. 1904 [reprint 1908]. 76+[i] p. 10 il. 3 pl. \* Paper, 10c. GS 5-30/4
95. Accuracy of stream measurements; by Edward Charles Murphy. 2d edition. 1904 [reprint 1908]. 169+[i] p. 59 il. 6 pl. \* Paper, 15c. GS 4-141/2
96. Destructive floods in United States in 1903; by E. C. Murphy. 1904 [reprint 1908]. 81+[i] p. 2 il. 13 pl. (incl. maps). \* Paper, 15c. GS 6-773/3

**Northern and Northwestern Lakes Survey.**

NOTE.—Lake Survey charts may be obtained from U. S. Lake Survey Office, Detroit, Mich., or from U. S. Engineer Office, Buffalo, N. Y. Payments must be made before charts are sent, and if made by mail must be by postal or express money order payable to the order of U. S. Lake Survey Office if ordered from Detroit, or to the order of U. S. Engineer Office if ordered from Buffalo. These charts may also be obtained, for cash only, at U. S. Canal Office at Sault Ste. Marie, Mich. They will be sent by express, the express charges to be paid by the purchaser on receipt of the charts, or free by mail at the purchaser's risk. Purchasers should indicate, when ordering the charts, whether they wish them sent by express or mail. The latter will be used when no choice is indicated.

**Northern and Northwestern Lakes Survey—Continued.**

The bulletins and supplements of the Lake Survey may be obtained free upon application at U. S. Lake Survey Office, Detroit, Mich., and at the engineer offices in Duluth, Milwaukee, Chicago, Grand Rapids, Cleveland, Buffalo, and Oswego.

See Great Lakes.

**Signals.** See Navigation signals.

**Silkworms.** See Mulberry trees.

**Silver.** See Gold.

**Slip laws.** See Congress.

**Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

Notes [including Publications of Smithsonian Institution continued from list in quarterly issue, v. 4, pt. 2]. Jan. 16, 1908. n. t. p. p. 415-418. ([Publication] 1779.) [From Smithsonian miscellaneous collections, v. 50, pt. 3.] †

**Topographer, Post-Office Dept.**

NOTE.—Post-route maps corrected to the 1st of those months are distributed in March, June, September, and December to the postal service. Only new maps and those newly lithographed on account of change in scale, etc., are catalogued in full in the Monthly catalogue. For a list of the maps composing the set, with prices, see below. Orders for the maps should be addressed to the Disbursing Clerk, Post-Office Department, and money orders should be made payable to him.

**Post route map of—**

## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

# NOTES OF GENERAL INTEREST

There are more annual reports this month, and perhaps chief among them is that of the Secretary of the Interior, which describes the extensive reorganization that has been made in that extensive Department.

The volume of Mineral resources for the calendar year 1906, just issued, reveals a most remarkable development of the great mineral supplies of the country. In 1880 the annual production of minerals aggregated about \$365,000,000 in value. For 1906 the value is almost \$2,000,000,000. In the twenty-six years the output has multiplied about five and one-fourth times. It is not likely that there will be any sagging back in the mineral production. A continuous increase for many years to come may reasonably be expected.

Farmers' bulletin 314 describes the only method which has yet been devised for outwitting the Mexican cotton-boll weevil. It is that of planting early varieties of cotton, and planting them so early that they will be too far advanced to be damaged before the spring crop of weevils reaches the destructive stage. This insect pest is immune from the poisonous sprays which check the San José scale and the tent worm, because the weevil works in the heart of the cotton boll, where the spray can not reach him.

The Manufactures Bureau continues its Tariff series by publishing translations of the Commercial agreement between the United States and France and the Customs tariff of the German Customs Union.

The Department of the Interior is looking after the antiquities and natural wonders which abound in the western country, as is shown by this month's report on the Wind Cave, Crater Lake, Sullys Hill, Platt, Mesa Verde, and Casa Grande Ruin national parks.

Geological Survey Bulletin 339 tells of buying coal on the basis of its heating value. Will the time come when everybody can do that?

This year the annual classified statement of the expenditures of the Agriculture Department, of which for many years the "usual number" has been printed, being somewhere from ten to twenty times as many copies as were needed, was not printed at all, but a sufficient number of copies were produced at the Department by a duplicating process, saving, it is asserted, several thousand dollars. It was done at the suggestion of Mr. Littlefield, chairman of the House Committee on Expenditures in the Department of Agriculture, and it is told of in the annual report of the Department's Accounts and Disbursements Division. Which overprinted document will be the next to go off the list?

Document 630 of the Fisheries Bureau gives the statistics of the distribution of fish eggs, fry, fingerlings, yearlings, and adults by the Bureau during the fiscal year 1907. Most bureaus are content to deal in millions, but the Fisheries people run into billions. Thirty-five species they propagated and distributed, and the grand total is expressed in 10 figures, thus: 2,511,597,377.

Talking of examinations and questions, how is this for an easy one? "What apparatus is used in making a turk's head?" It is question 1 in the pamphlet entitled "Questions and answers for use in instruction of torpedo companies," and the answer is easy when you know it.

Forest Service Circular 140, of 31 pages, has the title "What forestry has done," and its information comes from foreign lands as well as from our own. No publication of more timely interest is in this month's list.

The latest of many editions of Doctor Tindall's standard work, *Origin and government of the District of Columbia*, is one of the February issues of the Government press.

Other titles, attractive to various classes of readers, are: Examination papers of the Naval Academy; Organization lists of agricultural colleges and experiment stations; Report on trade conditions in Australasia, and the same for Ecuador; the Public Printer's annual report; volume 4 of the War Department's annual report, in which the militia, the military schools, and the military parks are considered; the Annual report of the Public Health and Marine-Hospital Service, which is the national health officer; Treasury decisions on tariff questions from July 1 to Dec. 1, 1907; Decisions of the Comptroller of the Treasury on law questions, Oct. 1 to Dec. 31, 1907; Diplomatic and consular service, corrected to Feb. 19, 1908; Report of the proceedings of the National Association of Railway Commissioners at the meeting of Oct., 1907; with many more of equal value and interest.

---

Attention is called to the following preface which appears in the Advance sheets of 3d edition of Checklist of United States public documents which is entered in this issue of the Monthly catalogue:

Ever since the Checklist of public documents was issued in 1895, an effort has been made to gather statistics for a revised edition, and up to the present time a large amount of material has been collected which it is our purpose to first publish in the form of advance sheets, and invite thereto additions and corrections, that the final volume of the Checklist when issued may be a complete and accurate reference work.

This Advance sheet, including a list of all the publications known to have been published by the Office of the Secretary of Agriculture, will be followed as rapidly as possible by other Advance sheets, each one of which will cover the publications of a separate publishing office, until distinct checklists of all Government offices which have issued publications are in the hands of those interested.

These Advance sheets will be arranged according to the scheme adopted with such success in Department list 1, *List of publications of the Agriculture Department, 1862-1902*, issued in 1904. This reference work was arranged according to the classification numbers assigned to the publica-

tions in the Public Documents Library of this Office; or, in other words, it was a print of the shelf-list, elaborated and supplemented by a full analytical index referring to these library symbols as a short means of identification.

In order that the lists may be used to the best advantage, an abbreviated explanation of the classification follows, which should be carefully preserved for reference, as no other Advance sheet will contain it.

A full description of the classification can be found in the Agriculture Department list mentioned above, but that list being practically out of print it was thought best to print a short explanation with the Advance sheets for the benefit of those who have not and who can not now be supplied with the full outline.

#### CLASSIFICATION EXPLAINED

The classification is by Government authors: first, by Departments or independent publishing offices; second, by bureaus, offices, or divisions of such Departments or independent publishing offices; third, by series; fourth, by book numbers.

##### *Department symbol, first term in classification number*

The first letter of the distinctive word in the name of each of the nine Executive Departments is used to designate the Department:

- A = Agriculture Department.
- C = Commerce and Labor Department.
- I = Interior Department.
- J = Justice Department.
- N = Navy Department.
- P = Post-Office Department.
- S = State Department.
- T = Treasury Department.
- W = War Department.

Two letters are used for independent publishing offices:

- AR = American Republics Bureau.
- CS = Civil Service Commission.
- DC = District of Columbia.
- FC = Fish Commission.
- FS = Freedman's Savings and Trust Company.
- GB = Geographic Board.
- GP = Government Printing Office.
- IC = Interstate Commerce Commission.
- Ju = Judiciary (United States courts, etc.).
- La = Labor Department.
- LC = Library of Congress.
- NA = National Academy of Sciences.
- NH = National Home for Disabled Volunteer Soldiers.
- Pr = President of the United States.
- SI = Smithsonian Institution.

Other Department symbols are:

- X = Proceedings of Congress.
- Y = Miscellaneous publications of Congress.
- Z = Papers of Revolutionary period and first fourteen Congresses.

This list gives all the Department symbols as yet required for the use of the Public Documents Library of this Office. The arrangement on the shelves should be strictly alphabetical by symbol, not by the word for which the symbol stands; that is, Commerce and Labor Department publications precede Civil Service Commission publications, because C precedes CS.

When bureaus, offices, divisions, etc., are transferred from one Executive Department to another, or when independent publishing offices become subordinate to an Executive Department, the old classification is retained for earlier issues and a new one assigned to publications issued after the transfer, double cross references being used.

*Bureau, office, or division symbol, second term in classification number*

The figure 1 following the Department symbol represents always the Secretary of the Executive Department or the chief executive officer of the independent publishing office.

Beginning with figure 2, the numbers are applied in numerical order to the various publishing bureaus, offices, and divisions, these having been arranged alphabetically when the classification was first applied. New offices are added at the end of the list of the Department and assigned the next number. This provides for a distinctive symbol for each without limit, though the alphabetical arrangement of new bureaus can not be kept up.

A point is placed after the bureau symbol to separate the Department and bureau notation from the rest of the classification number.

*Examples :*

- A1. =Agriculture Department, Secretary.
- A2. =Agriculture Department, Accounts and Disbursements Division.
- A3. =Agriculture Department, Agrostology Division.
- GP1.=Government Printing Office, Public Printer.
- GP2.=Government Printing Office, Library.
- GP3.=Government Printing Office, Documents Office.

*Series symbol, third term in classification number*

Figures 1, 2, 3, and 4, when written after the point as the third term in the classification number, are used exclusively for the following series of publications emanating from the various publishing offices :

- .1=Annual reports.
- .2=General publications.
- .3=Bulletins.
- .4=Circulars.

These four numbers are always assigned for these particular series, even though the bureau may not have issued any publications belonging there. "General publications" are publications of a miscellaneous character, which are not numbered or volumed in any series.

Beginning with figure 5 after the point, the various series are arranged alphabetically as far as possible, and are assigned numbers. New series are added at the end of the list. They take the next unused number.

A colon is placed after the series symbol to separate it from the individual book number.

*Book number, fourth term in the classification number*

The book number follows the colon.

In the case of annual or periodical publications, the date is used as the book number, as :906. For a volumed series, the volume number is used, as :8. For a numbered series, the number is used, as :8. General publications and similar classes are arranged in alphabetical order under the most significant words of their titles, or under their subjects, the book numbers being assigned from the 2-figure Cutter Author table, as :B39, in which case B39 stands for Beet sugar, the distinctive word of the title.

In these Advance sheets of the Checklist and in the Checklist itself to follow, individual book numbers are given for everything arranged by book numbers taken from the Cutter Author table, except for separates, which are not entered at all, and for which the arrangement by book numbers is only indicated, as :(CT). Individual book numbers are not given in certain series arranged by dates or by numbers, but in every such case the arrangement is indicated, as :(dates), or :(v. nos.), or :(nos.).

The superior letter (s) always designates "separates," that is, excerpts from the publication bearing the same notation without the (s). These separates are arranged in classes by themselves, immediately following the series from which they are taken.

The superior figures (1-9) are used to differentiate between two publications which may of necessity be assigned the same symbol in the alphabetical classification, and also to distinguish between the various editions of the same serial or numbered publication.

## SERIAL NUMBERS

When a document appears both as a bureau edition and as a Congressional document, the bureau edition is entered in these Advance sheets and the serial number and Congressional document number are both added, thus [2309-269], the first being the serial number and the second the document number in the sheep-bound set. The serial numbers are those assigned in the 2d edition of the Checklist of public documents, issued by this Office in 1895, and continued in our Document catalogues and Document indexes. The following table has been prepared to show where in our office publications lists of such serial numbers, with titles, etc., may be found:

Table showing where serial numbers may be found

Serial nos.	Con- gress.	Ses- sion.	Congres- sional docu- ments, tables, and index.	Check- list of public docu- ments, 2d edition, 1895.	Document catalogue.	Document index.	Schedule of volumes.

<sup>a</sup> No. 3142<sup>2</sup> is assigned to a volume of Senate miscellaneous documents of the 53d Congress, special session, Senate.

<sup>b</sup> On page 104 of Checklist of public documents, 2d edition, 1895, insert 3343, House miscellaneous documents, v. 17; insert 3344, House miscellaneous documents, v. 18; for 3343 as printed, read 3345; for 3344 as printed, read 3346.

<sup>c</sup> When "a" follows serial number, it is used for the Senate journals, to which no separate numbers are assigned.

<sup>d</sup> No. 5058 is assigned to the Senate journal, and no. 5059 to the House journal, 59th Congress, 2d session. Nos. 5058, 5059, and 5060 were originally assigned to the Document catalogue, 59th Congress, 1st session, and the Senate and House journals, 59th Congress, 2d session, respectively. The change was made because the Document catalogue is to cover both sessions and appear as a document of the 2d session. There will therefore be no House document 944, 59th Congress, 1st session.

The hearty cooperation of those in charge of the various Government publishing offices and of all librarians and individuals who are interested in public documents is earnestly requested, for without their aid nothing like a complete Checklist can be compiled.

At the present day the common test of a public document of the United States is the imprint of the Government Printing Office, and to this test there are few exceptions. Some Government publishing offices have made the mistake of inducing the Government Printing Office to omit its imprint from their publications, but fortunately these instances are not numerous. So far as they go, they confuse the record and put an additional embarrassment in the way of the libraries which are doing an invaluable service to our own and

future times by trying to preserve with accuracy and completeness the official publications of the Government. Small Government presses are placed at Weather Bureau stations, at the headquarters of military departments, and at military schools, and from them bulletins, orders, textbooks, and annual reports are issued, but their output is so slight a fraction of the general mass that by most librarians and collectors it need not be taken into consideration. An active printing bureau has also been set up at Manila, but its productions need not necessarily be considered United States public documents.

The Government Printing Office test can not be applied to imprints prior to 1861, for until that year there was no official printing plant. In the earlier years the printing of Congress was done by contract, but not necessarily by the lowest bidder. A rate not to be exceeded was usually fixed by resolution, and the secretary or clerk of the Senate or the House was instructed with whom to contract at the fixed rate. The printing was considered a plum for partisan editors, and often the choice of a printer was the most exciting event of a session of Congress, and sometimes delayed its proceedings for days or even weeks. When the documents of either branch of Congress for any session bear the imprint of Gales & Seaton, it may be assumed that that body at that session had an Adams or Whig majority, and the imprint of Duff Green or Blair & Rives as clearly indicates a Democratic or Democratic-Republican majority. The numerous less-known printers for Congress whose names are found in the documents usually owed their selection to like reasons.

Various publications of private publishers other than the printers to Congress are considered to have become public documents by the action of Congress in buying copies or editions of them for free distribution to or by Members of Congress or other officials or to colleges and libraries. Often the publication of important volumes or series of volumes would not have been possible without the order of Congress for numerous copies or entire editions in advance of publication. The first legal definition of a public document was given in section 13 of chapter 63 of the laws of the Twenty-ninth Congress, second session, approved March 3, 1847, in these words:

Such publications or books as have been or may be published, procured, or purchased by order of either House of Congress, or a joint resolution of the two Houses, shall be considered as public documents.

After the Government Printing Office had been established this comprehensive and sweeping definition was somewhat limited in a new enactment by excluding books "procured or purchased." This is found in section 13 of chapter 456 of the laws of the Forty-third Congress, first session, approved June 23, 1874, and runs thus:

The term "public document" is hereby defined to be all publications printed by order of Congress or either House thereof.

The practice in the early Congresses of supplying newly elected Members with reference books grew until the volumes supplied to each Member amounted to a small library. It is not easy to trace

just what these supplies were. The House in the Thirty-second Congress (Aug. 31, 1852) voted to supply to those of its Members who had not already had them the same books that had been supplied to the Members of the Twenty-eighth, Twenty-ninth, Thirtieth, and Thirty-first Congresses. Turning to the records of the Twenty-eighth Congress, one finds that it voted itself the same books that had been given to Members of the Twenty-sixth and Twenty-seventh Congresses, adding only the latest volumes of the American archives, the Congressional globe, the Register of debates, and Schoolcraft's History of the Indian tribes. In most of the following Congresses something was added, so that when the whole list was voted in a single succeeding Congress it became something formidable. In the Thirty-second Congress the book supply for new Representatives cost \$122,000, but the titles of the free books are not given. In the House of the Thirty-fourth Congress (1855) the cost was \$138,000, and the following list of titles is embodied in the appropriation act: Annals of Congress (42 vols.), Congressional globe (42 vols.), Diplomatic correspondence (1783-1789, 3 vols.), Elliot's Debates (5 vols.), Finance reports (7 vols.), Hickey's Constitution (1 vol.), Instructions and opinions (not identified), Life and works of John Adams (10 vols.), Mayo and Moulton's Pension laws (1 vol.), Opinions of Attorney-General (5 vols.), Public land laws (2 vols.), Register of debates (29 vols.), Writings of Thomas Jefferson (9 vols.); the total is 153 volumes, though the list does not mention several of the large series that were at various times voted to Members.

There was always strong opposition in Congress to the creation of public documents by voting book subsidies to Members, and the subsidy resolutions seldom got through without a sharp debate and one or more roll calls. The usual plan in the House was the passage of a simple resolution directing the clerk to supply the books. Later on provision would appear in an appropriation bill for reimbursing the clerk. As early as the Twenty-fifth Congress (1837) an amendment was offered, but unsuccessfully, providing that Members receiving free books should at the close of their service deposit them in the Library of Congress, to be used by their successors. In the Thirty-fourth Congress, where the 153 volumes were voted, the Members did not get away with the books, for the appropriation act, passed on the last day of the session, provided that the \$138,000 should be paid only on condition that the books be sent to a public library in each Member's district, and that such sending should not be intrusted to the Members, but to the clerk of the House. The same Congress passed an act to regulate the compensation of Members, in which it is provided that if any Member shall receive books by virtue of a simple or concurrent resolution the cost of them shall be deducted from his pay. This seems drastic, but it could not prevent Congress voting itself books by act or joint resolution.

There is no occasion to make a complete list of those publications, not included in the numbered set of Congressional documents or not

issued from the Government Printing Office, which have come to be considered public documents because authorized by Congress or bought by Government appropriations, and if there were such occasion the making would certainly be difficult and probably impossible. Among the important documents of this kind, in addition to those already mentioned in this note, are the following: Commercial regulations of foreign countries, first edition, 1819, 1 vol.; same, second edition, 1833-1836, 3 vols.; Duff Green's State papers, 1834, 5 vols.; Duff Green's Register of debates, 1834, 2 vols.; Elliot's Diplomatic code, first edition, 1827, 1 vol.; same, second edition, 1834, 2 vols.; Espy's Meteorological reports, 1843, 1 vol. (there are 3 vols., but the second and third are numbered documents); Executive journals of the Senate, first 20 Congresses, 1828 [29], 3 vols.; Force's American archives, 1837-1853, 9 vols.; Gales & Seaton's American state papers, 1833-1861, 38 vols.; Intercontinental Railway Commission Report, 1891-1898, 10 vols.; Joseph Gales's (senior) Debates and proceedings of Congress, old series, 1834, 2 vols.; Journals of Continental Congress (reprint), 1823, 4 vols.; Journals of House of Representatives, first 13 Congresses (reprint), 1826, 9 vols.; Journals of Senate, first 13 Congresses (reprint), 1820-21, 5 vols.; Madison papers, 1840, 3 vols.; Margry's Découvertes et établissements des Français dans l'ouest et dans le sud de l'Amérique Septentrionale, 1876-1886, 6 vols.; Mayo's History of the Treasury Department, 1847, 2 vols.; Nicaragua Canal Commission Report, 1899, 2 vols.; Secret journals of the Continental Congress, 1821, 4 vols.; Sparks's Diplomatic correspondence of the Revolution, 1829-30, 12 vols.; Wait's State papers, first edition, 1815, 8 vols.; same, second edition, 1817, 10 vols.; same, third edition, 1819, 12 vols.; Wilkes's Expedition, not complete, 16 vols.; Works of Alexander Hamilton, 1850-51, 7 vols.; and of single volume works, Clarke and Hall's Cases of contested elections in Congress, 1789-1834; Greenhow's History of Oregon and California, 1845; Lanman's Dictionary of Congress, first edition, 1859; Jedidiah Morse's Report on Indian affairs, 1822; Pitkin's Statistical view, first edition, 1816; same, second edition, 1817; same, third edition, 1835; Seybert's Statistical annals, 1818.

# MONTHLY CATALOGUE

No. 158

FEBRUARY

1908

**Accounts.** Certification of reimbursement vouchers. Feb. 17, 1908. 2 p. 4° (Commerce and Labor Dept. Dept. circular 161.) [Supersedes Dept. circular 153, June 27, 1907.] †

**Accounts and Disbursements Division.** Report of chief, [fiscal year] 1907; by A. Zappone. Feb. 15, 1908. 38 p. [From Annual reports of Agriculture Dept. 1907.] †

**Acts of Congress.** See Congress.

**Adjutant-General's Department.** Army list and directory, officers of Army, Feb. 20, 1908; [no.] 99. 1908. 112 p. large 8° [Monthly.] \* Paper, 15c. single copy, \$1.50 a yr.

See also Lieutenants, Army.

**Adulterations.** See Alfalfa seed.

## Africa, Western.

West coast of Africa, Grand Bassam to Cape Coast Castel, from latest information; chart 2348. Scale naut. m.=0.4 in. Washington Hydrographic Office, Jan. 1908. 29.3×40.5 in. (Hydrographic Office.) † 50c.

West coast of Africa, Sierra Leone River to Cape Mount Bay, from latest information; chart 2344. Scale 1° lat.=15.13 in. Washington, Hydrographic Office, Jan. 1908. 29.9×41 in. (Hydrographic Office.) † 60c.

**Agricultural colleges.** Organization lists of agricultural colleges and experiment stations in United States; [by Marie T. Spethmann and Mary A. Agnew]. Feb. 13, 1908. 108 p. (Experiment Stations Office. Bulletin 197.) \* Paper, 15c.

**Agricultural experiment stations.** List of station publications received by Office of Experiment Stations during Jan. 1908. Feb. 12, 1908. n. t. p. 5 p. (Experiment Stations Office. [Publication] 1073.) [Monthly.] †

**Agricultural implements.** Minneapolis Threshing Machine Company v. Chicago, Rock Island & Pacific Railway Company; submitted Dec. 20, 1907, decided Feb. 10, 1908; report of [Interstate Commerce] Commission. 1908. c. t. o. p. 128-130. (Interstate Commerce Commission.) [From Report, v. 13.] †

See also Lumber and timber.

## Agriculture.

Experiment station record, v. 19, no. 5; Jan. 1908. 1908. c. t. o. ix+401-500 p. (Experiment Stations Office.) \* Paper, \$1.50 a vol. (12 nos. and index).

Experiment station work, v. 3, no. 4. Feb. 18, 1908. iv+85-112 p. [4] il. (Experiment Stations Office. [Publication] 1070.) [Same as Farmers' bulletin 316.] \* Paper, 5c. Agr 6-305/3

See also Plant Industry Bureau.

**Agriculture Department.**

Circular 26; Adulteration and misbranding of alfalfa, red clover, and grass seeds; [by B. T. Galloway]. Feb. 15, 1908. n. t. p. 6 p. (Plant Industry Bureau.) \* Paper, 5c. Agr 8-290/2

**Farmers' bulletin—**

104. Notes on frost; by E. B. Garriott. Revised Jan. 1908. Feb. 14, 1908. 31 p. (Weather Bureau.) \* Paper, 5c. Agr 7-183/2

159. Scab in sheep; by D. E. Salmon and Ch. Wardell Stiles. 1903 [reprint 1908]. 45+ii p. 17 il. (Animal Industry Bureau.) \* Paper, 5c. Agr 7-235/4

287. Poultry management; by G. Arthur Bell. June 29, 1907 [reprint 1908]. 48 p. 14 il. (Animal Industry Bureau.) \* Paper, 5c. Agr 7-1921/2

314. Method of breeding early cotton to escape boll-weevil damage; by R. L. Bennett. Feb. 7, 1908. 30 p. 16 il. (Plant Industry Bureau.) \* Paper, 5c. Agr 8-233/3

Monthly list of publications [of Department], Dec. 1907 and Jan. 1908. Jan. 31, 1908. n. t. p. 4 p. (Publications Division. [Publication] 591.) †

Same [for foreign distribution], Jan. 1908. Jan. 31, 1908. n. t. p. 4 p. (Publications Division. [Publication] 592.) †

See also Appalachian Mountains—Cattle—Public documents.

**Alaska.** [Alaska] north west coast of America, Dixon Entrance to Cape St. Elias; chart 8000. Scale 1:1,200,000. Washington, Coast and Geodetic Survey, Feb. 1908, first published 1868. 25.9×34.4 in. (Coast and Geodetic Survey.) † 50c.

**Alcohol.**

Denatured alcohol, authorizing formula for alternative special denaturant for use in manufacture of fulminate of mercury. Feb. 17, 1908. 1 p. (Internal Revenue Commissioner. [Treasury decision] 1317.) [From Treasury decisions, v. 15, no. 8.] †

Denatured alcohol, authorizing formula 1 as special denaturant for use in manufacture of solid and powdered medicinal extracts. Jan. 30, 1908. 1 p. (Internal Revenue Commissioner. [Treasury decision] 1301.) [From Treasury decisions, v. 15, no. 6.] †

Denatured alcohol, authorizing formula 1 for use as alternative special denaturant in manufacture of transparent soap. Jan. 31, 1908. 1 p. (Internal Revenue Commissioner. [Treasury decision] 1302.) [From Treasury decisions, v. 15, no. 6.] †

Denatured alcohol, authorizing formula 14 as alternative special denaturant for use in manufacture of ethyl chloride for anesthesia. Feb. 18, 1908. 1 p. (Internal Revenue Commissioner. [Treasury decision] 1319.) [From Treasury decisions, v. 15, no. 8.] †

See also Beverages.

**Alfalfa.**

Alfalfa (*Medicago sativa*). Jan. 1908. 1 p. narrow f° (Plant Industry Bureau.) †

Alfalfa (*Medicago sativa*). Jan. 1908. 1 p. narrow large 8° (Plant Industry Bureau.) †

**Alfalfa seed.** Adulteration and misbranding of alfalfa, red clover, and grass seeds; [by B. T. Galloway]. Feb. 15, 1908. n. t. p. 6 p. (Plant Industry Bureau; Agriculture Dept., Circular 26.) \* Paper, 5c. Agr 8-290/2

**Aliens.**

Amendments to rules 6 and 20 of immigration regulations of July 1, 1907, relating to physical disabilities of aliens. Feb. 7, 1908. 2 p. 4° (Commerce and Labor Dept., Dept. circular 160; Bureau of Immigration and Naturalization.) †

Amendments to rules 10, 11, and 13, immigration regulations of July 1, 1907, regarding hospital treatment of aliens. Jan. 31, 1908. n. t. p. 3 p. 4° (Commerce and Labor Dept., Dept. circular 159; Bureau of Immigration and Naturalization.) †

**Almanacs.** See American nautical almanac.

**American Historical Association.** Annual report, 1905. 1907 [1908]. v. 2, 1374 p. \*Cloth, \$1.00. 4-18261/3

**American nautical almanac** for [calendar] year 1908. 2d edition. [Reprint] 1908. viii+272 p. 2 il. (Nautical Almanac Office.) \*Paper, 30c. 7-35404

**American Republics Bureau.**

NOTE.—This Bureau sells its own Monthly bulletins, handbooks, etc., at prices usually ranging from 5c. to \$1.00. Address the Director of the Bureau.

Monthly bulletin, v. 26, no. 1, Jan. 1908, whole no. 172. 1908. xiii+1-250+xlvi p. 1 por. [6] pl. [English, Spanish, Portuguese, and French.] † Paper, 25c. single copy, \$2.00 a yr.

**Americana**, public documents sold by superintendent of documents. [1908.] 12 p. narrow 12° (Documents Office. Price list 13, 2d edition.) †

**Anæsthesia.** See Alcohol.

**Animal Industry Bureau.**

Circular—

23, 3d revision. Direcciones para el uso de la vacuna contra la morriña negra; por Victor A. Nørgaard, revisado por John R. Möhler, traducido por Manuel Fraile. Feb. 21, 1908. n. t. p. 9 p. 3 il. \*Paper, 5c.

121. Osteoporosis or bighead of horse; by John R. Mohler. Feb. 15, 1908. n. t. p. 8 p. 5 il. [From 23d report, 1906.] \*Paper, 5c. Agr 8-287/2

122. Epizootic cerebro-spinal meningitis of horses; by R. W. Hickman. 1908. n. t. p. 8 p. [From 23d report, 1906.] \*Paper, 5c. Agr 8-234/2

123. Instructions for preparing and shipping pathological specimens for diagnosis; by George H. Hart. 1908. n. t. p. 10 p. [From 23d report, 1906.] \*Paper, 5c. Agr 8-235/2

124. Suggestions for horse and mule raising in the South; by George M. Rommel. 1908. n. t. p. 15 p. [From 23d report, 1906.] \*Paper, 5c. Agr 8-238/3

128. White diarrhea of chicks, with notes on coccidiosis in birds; by Geo. Byron Morse. Feb. 21, 1908. n. t. p. 7 p. \*Paper, 5c. Agr 8-289/2

See also Bacteria—Cattle—Dairying—Hogs—Meat inspection—Poultry—Sheep scab—Tuberculosis in animals.

**Ann Arbor**, Mich. Ann Arbor folio, Mich. Washington, Geological Survey, 1908. c. t. o. 15 p. 13 il. [3] maps, large 4° (Geological Survey. Geologic atlas of United States, folio 155.) \*Paper, 25c. GS 8-17/3

**Annapolis**, Md. See Naval Academy.

**Appalachian Mountains.** Report of Secretary of Agriculture on southern Appalachian and White Mountain watersheds, commercial importance, area, condition, advisability of their purchase for national forests, and probable cost. 1908. 39 p. 2 maps. (Agriculture Dept.) \*Paper, 10c. Agr 8-229/4

- Appointments.** Absolute appointment of employees. Feb. 3, 1908. 1 p. 4° (Treasury Dept., Dept. circular 10, 1908; Division of Appointments.) †
- Appraisers.** Reappraisements of merchandise by general appraisers [on Jan. 23-Feb. 19, 1908]; Feb. 3-24, 1908. 4° (Reappraisement circulars 1756-70.) [Weekly.] †
- Army.** See Officers, Army.
- Army list and directory.** See Adjutant-General's Department.
- Arsenic.** Sources of arsenic in certain samples of dried hops; by W. W. Stockberger. Feb. 21, 1908. ii + 41-46 p. (Plant Industry Bureau. Bulletin 121, pt. 4.) \* Paper, 5c.
- Assay offices.** See Mints.
- Atlantic Fleet.** Men on board ships of Atlantic Fleet bound for the Pacific, Dec. 16, 1907. 1908. 42 p. (Navigation Bureau, Navy Dept.) †
- Atlantic Ocean.** Pilot chart of north Atlantic Ocean, Mar. 1908; chart 1400. Scale 1° long.=0.27 in. Washington, Hydrographic Office, Feb. 27, 1908. 21×32 in. (Hydrographic Office.) [Monthly.] † 10c.
- Australasia.** Report on trade conditions in Australasia; by Harry R. Burrill. 1908. 48 p. (Manufactures Bureau.) \* Paper, 10c. 8-35112
- Avalo, Caleta.** See Cochinos Bay.
- Bacilli.** See Bacteria.
- Bacteria.** Susceptibility of tubercle bacilli to modification [with bibliography]; by John R. Mohler and Henry J. Washburn. 1908. iv+113-163 p. [4] pl. (Animal Industry Bureau.) [From 23d report, 1906.] \* Paper, 15c.
- Bag-worms.** Bagworm (*Thyridopteryx ephemeraeformis* Haw.); by L. O. Howard and F. H. Chittenden. Feb. 6, 1908. n. t. p. 10 p. 11 il. (Entomology Bureau. Circular 97.) \* Paper, 5c. Agr 8-236/3
- Banks and banking.** See Postal savings-banks.
- Bark diseases.** See Chestnut-trees.
- Barnacles.** Hawaiian Cirripedia [by Henry A. Pilsbry]; Cirripedia from Pacific Coast of North America [with bibliography, by Henry A. Pilsbry]. June 29, 1907 [published 1908]. [1]+179-204+i p. [8] il. [8] pl. large 8° (Fisheries Bureau.) [From Bulletin, v. 26, 1906.] \* Paper, 15c. 8-35170
- Bata, French Kongo.** Approaches to Bata, Bight of Biafra, west coast of Africa, from French survey in 1890; chart 2455. Scale naut. m.=4 in. Washington, Hydrographic Office, Jan. 1908. 19.9×17.8 in. (Hydrographic Office.) † 20c.
- Battle-ships.** See Atlantic Fleet.
- Beans.** See Moth beans.

**Gas-engines.** See Coal.

**Gaya Island.** See Borneo.

**Geologic atlas of United States.** See Geological Survey.

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply and Irrigation papers, which are intended for free distribution; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

**Bulletin—**

334. Burning of coal without smoke in boiler plants, preliminary report [with bibliography]; by D. T. Randall. 1908. 26+i p. \* Paper, 5c. GS 8-7/3

339. Purchase of coal under Government and commercial specifications on basis of its heating value, with analyses of coal delivered under Government contracts [with bibliography]; by D. T. Randall. 1908. 27+i p. \* Paper, 5c. GS 8-8/3

**Geologic atlas of United States, folio—**

154. Winslow folio, Ark.-Ind. T. Washington, Geological Survey, 1907[1908]. c. t. o. 6 p. 4 il. 1 pl. [2] maps. \* Paper, 25c. GSS-5/3

Geological Survey, list of publications supplemental to those noted in Price list 15 [for sale by superintendent of documents]. [Dec. 1907, published 1908.] n. t. p. 4 p. narrow 12° (Documents Office. Leaflet 9.) †

**Topographic sheets. See names of places.**

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About one-third of the area of the country, excluding outlying possessions, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Shoers.** See Blacksmiths.

**Signal Office.** Roster and stations of officers of Signal Corps, Dec. 31, 1907. [1908.] 8 p. †

**Slip laws.** See Congress.

**Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

# NOTES OF GENERAL INTEREST

By the time this catalogue is distributed the librarians of designated depository libraries will have received copies of the long deferred 13th annual report of the Superintendent of Documents for the fiscal year ended June 30, 1907, the keynote of which is contained in the following excerpt:

## PUBLIC DOCUMENTS—OUR SPECIALTY.

Were I asked to write a motto for this office it would consist of the words "Public documents—Our specialty," and were I to define our interests the definition would embrace the subject of public documents from the inception of each publication as a publication to its final delivery after completion. In other words, we are interested in public documents as to their uniform make-up and mechanical perfection, comprehensive cataloguing, logical distribution, and proper appreciation by the public at large. To these ends we are endeavoring systematically to arrange them and editorially supervise their production, in the hope of eliminating many of the unexplainable eccentricities heretofore complained of; to expend our best efforts in consistently cataloguing them, as a sure means of promoting their use; to quickly distribute them, that they may be available contemporaneously with the interest in their contents, and to advertise them so extensively that their existence and value will be known to all who contribute the means for their production.

The report contains an historical résumé and complete statement of the present organization and work of the office, as also outlines of the plans for its future development. A studious perusal of this report will give a clear understanding of the duties of the Superintendent of Documents and his ideas regarding the necessary improvements affecting matters of cataloguing, indexing, and distribution of Government publications.

A correct estimate of these matters will contribute greatly to the harmonious intercourse between the libraries and the Documents Office.

---

Will all the librarians who intend to send in "want" slips for publications contained in Free list no. 1, do so at once, as we are desirous of getting in all requests for these surplus books in order to determine what portion of them can be disposed of otherwise than by distribution. The lack of storage space and the continued returns from the libraries make immediate action in this direction necessary.

The orders already on hand are being filled as rapidly as possible. Much clerical labor has been expended on the slips on account of lack of attention to instructions, and many carelessly drawn slips

have been returned as "improperly drawn." Considerable labor and wasted time could have been avoided and shipments made more promptly if the entries on the slips had been made according to instructions.

Librarians should provide themselves with these slips and always use them in requesting books, following instructions carefully in filling them out.

---

The use, in correspondence, of the "library numbers" which were assigned when Circular 18 was sent out last fall, would greatly facilitate the work of this office.

Hereafter in addressing communications to libraries the name will be immediately followed by its number, in curves. In addressing this office it is requested that this same form be followed by the libraries instead of stating their number in the body of their letters or in a corner of the sheet, far removed from the name of the library.

---

Many librarians, following their established custom, forward postal acknowledgments for books or other printed matter sent them by this office. This trouble and expense is entirely unnecessary, and but helps to swell our already bulky daily mail. Will the librarians please discontinue this practice? It would be saving to them as well as to us.

---

Bulletin 41 of the Hygienic Laboratory of the Public Health and Marine-Hospital Service is somewhat obscured by the magnitude of the series title under which it staggers, but it has in addition a proper title of its own, revealing instead of concealing its real subject matter. It is Milk and its relation to the public health. This is a topic of first-class importance, and it is fully treated in a generously illustrated book of 758 pages. It is one of the most notable publications in the March list.

Another March publication of imposing size and fundamental value is The data of geochemistry, officially described as Bulletin 330 of the United States Geological Survey. It informs us (among many other things) that the known chemical elements are now held to be about 80 in number, and it is probable that all which have any large importance in the economy of nature are known.

Forest Service Circular 143, The relation of the southern Appalachian Mountains to inland water navigation, is a most timely publication, in view of the great convention of Governors and other dignitaries which is to be held in Washington, May 13-15, 1908, to consider the conservation of the natural resources of the United States.

Forest Service Bulletin 77 was produced by the collaboration of the Forest Service and the Census Bureau. It is an exhibit of the forest products of the United States for 1906, by species and by

States, in lumber, shingles, laths, crossties, slack cooperage, tight cooperage, pulpwood, tanbark, poles, distillation, veneer, firewood, and "other products," in which term are included such unspecified items as spools, matches, buttons, etc., that seem like trifles but eat up wood at an amazing rate. The returns as to firewood are not exact, and the return of its use in 1906, given at 100,000,000 cords, is admitted to be an estimate. As to the other items, however, an approach to accuracy is claimed, and the grand total value of forest products for the year thus arrived at is \$1,200,000,000. It is the belief of the Service that this great sum marks the climax of forest production, and that this total not only has not been exceeded, but it is improbable that it will be.

The Interstate Commerce Commission issues a brief pamphlet giving administrative rulings on the act to promote the safety of employees and travelers by limiting the hours of service. Pains and penalties do not attach to employees who work beyond the prohibited limit, but to those who direct that such work be done.

Secretary Taft's special report on his latest visit to the Philippines, including his address to the Philippine Legislative Assembly on the opening of its interesting and really momentous experiment in self government, is a publication of more than ephemeral consequence.

Geological Survey Bulletin 340 will be the issue for 1907 of the annual entitled Contributions to economic geology. Pending the issue of the complete volume, the chapters on Phosphates, Sulphur and pyrite, Building stones, and Miscellaneous nonmetallic products have been separately issued.

Other March titles are Report of the Assay Commission, 1908; the annual navy register; the annual army register; Work and publications of the drainage investigations; a Forest Service Circular on wood paving; a report on the meat-inspection service, with 15 pictures; Information for immigrants, a short and simple leaflet of fundamental knowledge for would-be citizens, prepared by the patriotic order of the Sons of the American Revolution; the Statement of Herbert Knox Smith, commissioner of corporations, in reply to the Standard Oil Company.

The March public document list is both long and strong.

#### GALES AND SEATON'S STATE PAPERS

The compilation in 38 volumes folio known as American state papers is made up of selections from the printed and manuscript documents of the early Congresses. It was originally planned by Gales and Seaton to include only the more important documents of the first 13 Congresses under the Constitution, and it was on that basis that the first order for 750 sets was voted by Congress, March 2, 1831. This plan contemplated 13 volumes, but its execution had hardly begun before Congress passed a resolution (March 2, 1833) authorizing 8 additional volumes, or 21 in all. It was supposed this number would permit the republication of Congressional documents

to be brought down to March 3, 1829, the close of the 20th Congress, but the limitation proved too narrow.

Congress entrusted the selection and preparation of the documents to be printed to the Secretary of the Senate and the Clerk of the House, who when the work began in 1831 were Walter Lowrie and Matthew St. Clair Clarke. In 1832 these two signed a joint report setting forth the arrangement of the documents in 10 classes and announcing the beginning of the work of publication. When, in 1837, a report was published announcing the completion of the 21 volumes, the signatures of the Secretary and the Clerk had changed to Asbury Dickins and Walter S. Franklin. It appeared by their report that in but one of the 10 classes, the postal service, had the printing been brought down beyond 1827, while in most of them it stopped several years earlier. The Post-Office documents were printed down to March, 1833, the close of the 22d Congress. There is a strong probability that both of the reports mentioned were written by Gen. William Hickey.

From 1837 to 1858 no action was taken toward issuing further volumes. June 12, 1858, an appropriation was made to buy 2,000 copies of each volume of a continuation of the series down to March 3, 1859, the close of the 35th Congress. The limit of cost was fixed at \$340,000, and it was thought that 34 volumes might be issued. The full design was not carried out, only 17 additional volumes having been printed, and the record was not brought down in any class beyond 1838 and in some classes not beyond 1823. The latest imprint date in any volume is 1861. Presumably this project, like many others, was interrupted by the Civil War, and after the war the chief movers were gone, Mr. Gales having died in 1860 and Mr. Seaton and Gen. William Hickey in 1866. The latter was beyond reasonable doubt the chief compiler of the whole series. He was the only man who was in either of the offices to which the work was entrusted continuously from the passing of the first appropriation in 1831 to the printing of the last volume in 1861, a period during which there were two secretaries of the Senate and nine clerks of the House. He was the only man in those offices who was known as a student of the public documents and an authority upon them. When the final series was authorized in 1858 he was chief clerk in the office of the Secretary of the Senate and was directly in charge of the work of selection and compilation. In a report in that capacity made Jan. 25, 1859, he claims also "a large share in the selection and compilation of the first series," which can hardly be taken to mean less than that he carried the chief burden of the work. His sons, two of whom are still living, remember their father's service in compiling the State papers, the eldest having been employed as his assistant in that work.

The American state papers supply the only readily accessible text of documents of the first 14 Congresses. It is, however, difficult to compare or identify them with the originals, because of the fact that in reprinting all title-pages were omitted and headings manufactured by the compiler were substituted. Numbers consecutive for each

volume were also given to all the documents; if they had been numbered before, the old numbers were dropped and different ones substituted. The Congresses and sessions during which the reprinted documents were originally printed are given, but no distinction is made between Senate and House documents or between reports of committees and other series of numbered documents. The 38 volumes of State papers are not included in the series of numbered Congressional documents.

#### FORCE'S AMERICAN ARCHIVES

The public document in 9 huge folios known to librarians and historians as "American archives," by Peter Force, was authorized by Congress under the title "Documentary history of the American Revolution." The first appropriation for its publication was made in 1833, the last in 1852. Congress was from the first restive because of the extent of the work, which threatened to exceed 30 volumes, and its cost, which was about \$25,000 a volume.

The appropriation of Mar. 3, 1843, was accompanied by three provisos: (1) That the work should not exceed 20 volumes; (2) that it should not cost more than \$20,400 per volume; (3) that the material for each volume should be submitted to the Secretary of State and approved by him before publication, and the publishers, Matthew St. Clair Clarke and Peter Force, were required to sign an agreement embodying these stipulations.

Mr. Force's plan called for 6 series of volumes, covering the history of the country from its discovery to the final ratification of the Constitution in 1790, a period of about 300 years. The incomplete work when discontinued in 1853 had covered less than three years, or only a hundredth part of the original design. The publication began with the 4th series, which was completed in 6 volumes, covering the period from Mar. 7, 1774, to July 4, 1776. The 5th series, designed to reproduce the documents and other material of the Revolutionary period, from the Declaration in 1776 to the treaty of peace in 1783, was abruptly terminated at the 3d volume by the refusal of a newly-incoming Secretary of State in 1853 to approve further publication. How abrupt the termination was is shown by the fact that the last words of the final volume are "Adjourned to ten o'clock tomorrow," the final date being Dec. 31, 1776.

The vast quantity of unused material which Mr. Force had been collecting for 40 years was bought by Congress in 1867 for \$100,000 and deposited in the Library of Congress, where (1908) it remains unpublished. Senate mis. doc. 34, 46th Cong. 1st sess., being a report by the Librarian of Congress, dated May 15, 1879, in response to a Senate resolution calling for information as to the Force papers, with a view to their publication, gives a discouraging account of the incompleteness and confused condition of the collection and of the probable cost of completing it and editing it for publication. This report also states that "Six folio volumes, known as the 4th series, and three folio volumes of the 5th series \* \* \* were published during the years 1837 to 1844,

when the work was stopped by the discontinuance of appropriations on the part of Congress." These statements are surprisingly inaccurate, but whether or not the Joint Committee on the Library, to which the report was made, detected the inaccuracies does not appear. The imprint dates show that the 9 volumes were published 1837-1853, a period nine years longer than stated in document 34. So far from Congress having discontinued appropriations for this work in 1844, several appropriations were made of later date, the final one, for publication of 2d and 3d volumes, 5th series, by Act approved July 21, 1852 (32d Cong. 1st sess., chap. 66, Stat. L. v. 10, p. 21), and several appropriations for the purchase of additional copies were made at even later dates.

In the Atlantic monthly for May, 1898 (vol. 81, p. 678), Dr. A. R. Spofford states that the work was discontinued because Secretary W. L. Marcy, who was called to the State Department by President Pierce in March, 1853, refused to approve for publication the contents of a volume submitted to him in that year by Mr. Force, who made no effort to secure the approval of later Secretaries. This statement harmonizes with the known facts and has been generally accepted as adequate.

The 9 folio volumes of American archives were not published as numbered Congressional documents, but 1,500 sets were supplied to Congress for distribution.

CORRECTIONS OF PRINTERS' ERRORS IN JANUARY, 1908, MONTHLY  
CATALOGUE

**Entomology Bureau.**

**Geochemistry.** Data of geochemistry [with bibliography on water analyses]; by Frank Wigglesworth Clarke. 1908. 716 + iii p. (Geological Survey. Bulletin 330.) \* Paper, 60c. GS 8-38/2

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers, formerly Water-supply and irrigation papers; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

**Bulletin—**

330. Data of geochemistry [with bibliography on water analyses]; by Frank Wigglesworth Clarke. 1908. 716 + iii p. \* Paper, 60c. GS 8-38/2

**Geological Survey—Continued.****Bulletin—Continued.**

331. Portland cement mortars and their constituent materials, results of tests made at structural-materials testing laboratories, St. Louis, Mo., 1905-07, by Richard L. Humphrey and William Jordan, jr.; [and introduction, by Joseph A. Holmes]. 1908. vii + 130 + i p. 22 il. 20 pl. \* Paper, 25c. GS 8-39/4

**Topographic sheets. See names of places.**

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1 : 62,500, 1 : 125,000, and 1 : 250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About one-third of the area of the country, excluding outlying possessions, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Water-supply paper—**

215. Geology and water resources of portion of Missouri River Valley in northeastern Nebraska; by G. E. Condra. 1908. 59 p. 11 pl. (1 in pocket, incl. maps, 2 in pocket). \* Paper, 40c. GS 8-91/3

**Light-House Board.**

NOTE.—Beginning with Jan. 1, 1908, the monthly Notice to mariners, issued by the Coast and Geodetic Survey, was consolidated with and made a part of the Weekly notice to mariners, issued by the Light-House Board, thus making it a joint publication. The List of lights and fog signals, the List of lights, buoys, and day marks, and the Weekly notice to mariners can be obtained, free of charge, on application to the office of the Board at Washington, the inspectors and engineers of the several lighthouse districts, the United States custom-houses, the principal agencies of the Coast and Geodetic Survey, the Hydrographic Office, the branch hydrographic offices, and United States consulates in foreign ports.

Weekly notice to mariners, changes in aids to navigation and chart corrections affecting publications of Light-House Board and Coast and Geodetic Survey, nos. 10-13, Mar. 6-27, 1908. 1908. †

**Lincoln national forest.** Lincoln national forest, N. Mex. (5th proclamation). [Mar. 3, 1908.] [2] p. map, f° (President of United States.) †

**Liquor cresolis compositus.** Germicidal value of liquor cresolis compositus (U. S. P.); by C. N. McBryde. May 31, 1907 [reprint 1908]. 24 p. (Animal Industry Bureau. Bulletin 100.) \* Paper, 5c. Agr 7-1671/2

**Live stock.** See Cattle.

**Lizards.** See Flying-lizards.

**Loans and Currency Division.**

Caveat list of United States registered bonds, Mar. 2, 1908. 1 p. f° [Monthly.] †

Circulation statement, Mar. 2, 1908. Mar. 2, 1908. 1 p. oblong 8° [Monthly.] †

**Loggers.** Logger [announcement of examination] May 6, 1908. Mar. 27, 1908. 1 p. 4° (Civil Service Commission.) †

**Lumber and timber.**

Experiments on strength of treated timber; by W. Kendrick Hatt. 1906 [1908]. 31 p. 2 il. (Forest Service. Circular 39, 2d edition.) \* Paper, 5c. Agr 6-1626/2

F. J. Gentry v. Atchison, Topeka & Santa Fe Railway Company et al.; submitted Feb. 17, 1908, decided Mar. 9, 1908; report of [Interstate Commerce] Commission. 1908. c. t. o. p. 171, 172. (Interstate Commerce Commission.) [From Report, v. 13.] †

Timber, elementary discussion of characteristics and properties of wood; by Filibert Roth. 1895 [reprint 1908]. 88 p. 49 [50] il. (Forest Service. Bulletin 10.) \* Paper, 10c.

Wholesale lumber prices, 1886-1908. [1908.] 1 p. oblong f° (Forest Service.) †

**Maasin, P. I.** See Leyte.

**Magnetism.** See Terrestrial magnetism.

**Mail contracts.** See Chicago, Ill.—Postal service.

**Mails, Foreign.** Schedule of steamers appointed to convey mails to foreign countries during Apr. 1908. Mar. 17, 1908. 1 p. narrow f° (Foreign Mail Service.) [Monthly.] \* Paper, 10c. single copy, \$1.00 a yr.

**Malta.** Malta and Gozo islands, Mediterranean Sea, from British surveys between 1863 and 1894; chart 2467. Scale naut. m. = 1.15 in. Washington, Hydrographic Office, Feb. 1908. 25.1 × 37.5 in. (Hydrographic Office.) † 40c.

**Manganese.** See Iron.

**Manufactures Bureau.**

Daily consular and trade reports, nos. 3113-38; Mar. 2-31, 1908.  
1 il. [Daily except Sundays and holidays.] †

Monthly consular and trade reports, Mar. 1908; no. 330. 1908.  
264 p. [2] il. \* Paper, 25c. 6-35356/4

See also Cotton.

**Manufactures, etc.** Manufactures, 1905: pt. 3, Special reports on selected industries. 1908. xxi + 946 p. [40] il. [5] pl. 4° (Census Bureau. [Special reports.]) \* Cloth, \$1.30. 7-35271/3

**Manure.**

Economize, cut down expenses of farm [by use of home fertilizers; by S. A. Knapp]. [Mar. 4, 1908.] n. t. p. 5 p. (Plant Industry Bureau.) \* Paper, 5c.

Fertility of soils as affected by manures; by Frank D. Gardner. Mar. 21, 1908. 59 p. 5 il. (Soils Bureau. Bulletin 48.)  
\* Paper, 10c. Agr 8-408

**Maps.** See Engravers.

**Marine Corps.** See Officers, Navy.

**Marine hospitals.** Official list of commissioned and noncommissioned officers of Public Health and Marine-Hospital Service, also list of marine hospitals, quarantine stations and quarantine vessels. Jan. 1908. 33 p. (Public Health and Marine-Hospital Service.) [Semiannual.] † 6-40500/2

**Meat inspection.**

Bureau of Animal Industry order 150; regulations governing meat inspection of Department of Agriculture. 1908. 48 p. (Agriculture Dept.) \* Paper, 10c.

Federal meat-inspection service; by A. D. Melvin. Feb. 28, 1908. 40 p. 1 il. 15 pl. (Animal Industry Bureau. Circular 125.) [From 23d report, 1906.] \* Paper, 10c. Agr 8-294/3

**Mechanic arts, Colleges of.** See Agricultural colleges.

**Mechanics.** See Engineering.

**Meigs County, Ohio.** Soil survey of Meigs County, Ohio; by F. N. Meeker and G. W. Tailby, jr. Mar. 25, 1908. 32 p. 1 il. map. (Soils Bureau.) [From Field operations, 1906.] †

**Merchandise.** See Commerce.

**Metals.** Investigations relating to rare metals by Geological Survey in 1907 [with bibliographies; articles] by F. L. Hess, G. B. Richardson, H. S. Gale, F. B. Weeks, D. B. Sterrett, and A. J. Collier. 1908. 79 p. [7] il. (Geological Survey.) [From Bulletin 340.] †

**Meteorology.**

Monthly weather review, v. 35, no. 12; Dec. 1907. Washington, Weather Bureau, Mar. 11, 1908. c. t. o. p. 557-606, [13] il, 4 pl. on 4 p. 8 charts on 8 p. 4° (Weather Bureau.) \* Paper, 20c. single copy, \$2.50 a yr.

National monthly weather bulletin, Feb. 1908; no. 2 [1908]. Mar. 2, 1908. 24 × 19 in. (Weather Bureau.) [Weekly, Apr.-Sept., monthly remainder of year.] \* Paper, 25c. a yr.

Weather map, Mar. 1-31, 1908. 19 × 24 in. (Weather Bureau.) [Daily.] \* Edition issued at Washington, D. C., 25c. a month, \$2.50 a yr.; editions issued at 100 stations throughout United States, 20c. a month, \$2.00 a yr.

**Mice.** See Fleas.

**Microscopy Division.** See Agriculture Department.

- Military art.** Index to current military literature, published with Journal U. S. artillery, v. 29, no. 1, Jan.-Feb. 1908. Fort Monroe, Va., Artillery School Press, 1908. c. t. o. p. 1-23. (Artillery School, Fort Monroe.) [Included in price of Journal.]  
6-13361/7
- Military law.** Military laws of United States, 4th edition, by George B. Davis; with Supplement showing changes to Mar. 4, 1907, and appendices, by John Biddle Porter. 1908. 1361 p. (War Dept. doc. 311; Judge-Advocate-General's Dept., Army.)  
\* Half-sheep, \$1.50. 8-35250
- Militia.** See Coast defense.
- Milk.** Milk and its relation to public health [with bibliographies]. Jan. 1908. 758 p. [20] il. [34] pl. (Hygienic Laboratory. Bulletin 41.) \* Paper, 75c.
- Milo.** Milo (form of *Andropogon sorghum*). Mar. 12, 1908. 1 p. narrow large 8° (Plant Industry Bureau.) †
- Mindoro.** Mindoro and adjacent coasts. P. L. from United States and Spanish sources; chart 4714. Mercator projection. Washington, Coast and Geodetic Survey, Feb. 1908, first published 1902. 30.9 × 38.9 in. (Coast and Geodetic Survey.) † 50c.
- Minerals.** Investigations relating to miscellaneous nonmetallic products by Geological Survey in 1907 [with bibliography; articles] by C. W. Hayes, W. C. Phalen, and D. B. Sterrett. 1908. 19 p. 1 il. (Geological Survey.) [From Bulletin 340.] †
- Minnetonka Beach,** Minn. Minnesota, Minnetonka quadrangle, lat. 44° 45'-45°, long. 93° 30'-93° 45'. Scale 1:62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Nov. 1907. 17.5 × 12.5 in. (Geological Survey. Topographic sheet.) † 5c.
- Mints.**  
Apprentice, mint and assay service [amended announcement of examination] May 6, 1908. Mar. 16, 1908. 1 p. 4° (Civil Service Commission.) †  
Regulations governing appointments to and promotions and transfers in mints and assay offices, approved Feb. 28, 1908. Mar. 17, 1908. n. t. p. 4 p. 4° (Treasury Dept., Dept. circular 15, 1908; Division of Appointments.) †
- Missouri Valley.** Geology and water resources of portion of Missouri River Valley in northeastern Nebraska; by G. E. Condra. 1908. 59 p. 11 pl. (1 in pocket, incl. maps, 2 in pocket). (Geological Survey. Water-supply paper 215.) \* Paper, 40c.  
GS 8-91/3
- Mollusks.** See Snail.

**Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1. Contributions to knowledge; 2. Miscellaneous collections; 3. annual reports; 4. special publications. No sets of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports

**Smithsonian Institution**—(Continued.)

are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested.' The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

Notes [including Publications of Institution continued from list in quarterly issue, v. 4, pt. 3]. Mar. 18, 1908. n. t. p. p. 548-552. ([Publication] 1788.) [From Smithsonian miscellaneous collections, v. 50, pt. 4.] †

## Size

 When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

The Agriculture Department during the month of April made large contributions to the cause of agricultural education—and no cause is more vital to the national prosperity.

Animal Industry Bureau issued Circulars 126, 127, and 129. The first named describes a simple method of keeping creamery accounts. Number 127 presents evidence relative to the infection of butter by the bacillus of tuberculosis (consumption). Number 129 demonstrates that rabies (hydrophobia) is becoming increasingly prevalent. Theoretically it is one of the most easily eradicated of contagious diseases. All that is required for its extermination is that all dogs shall be kept muzzled for a few years. This has been demonstrated in several European countries. Whether this remedy can be effectively applied in this country is considered very doubtful, and in view of this doubt the Bureau believes the widest publicity should be given to the information found in Circular 129.

Chemistry Bureau offers, in its Bulletin 108, chemical and microscopical examinations of the commercial feeding stuffs of the United States. The pamphlet is well illustrated and supplies information of prime value to all classes of stock growers. From the same Bureau we have also Part 1 of Bulletin 112, which when completed will be a compilation of the food laws of the United States and of all the individual States and Territories enacted during the year ended June 30, 1907. Part 1 contains the Federal laws and those of the States in alphabetical order, Alabama to New Hampshire, inclusive.

Entomology Bureau supplies a second revision of Circular 37, on the use of hydrocyanic-acid gas for fumigating greenhouses and cold frames. Also, Part 1 of Technical series 16, entitled The national collection of Coccidæ (scale insects). This collection is said to be the most complete and valuable of its kind.

Experiment Stations Office, in its Bulletin 199, reports the proceedings of the 12th annual meeting of the American Association of Farmers' Institute Workers, held in this city last October. The members of this association are agricultural experts and their proceedings are of corresponding value to agricultural readers. The 46th number in the series called Experiment station work, is issued as Farmers' bulletin 320. It contains a round dozen fresh articles on farm topics.

Farmers' bulletins for the month (besides 320 and 321, mentioned elsewhere) are numbers 318 and 319, the first on that great southern crop, the cowpea, especially as to cheapening the cost of seed peas, and the second entitled Demonstration work in coöperation with

southern farmers. This describes one of the most successful methods of agricultural education yet put in practice by the Government. It is that of sending expert agents right to the farms to demonstrate to the farmers on their own premises the most modern and improved methods of cultivation. It began as a part of the fight against the cotton-boll weevil, and has since been extended to other kinds of farming. There is also a second revision of Bulletin 127, the standard publication on insecticides. Also an unrevised reprint of a 1905 Bulletin, no. 231, Spraying for cucumber and melon diseases, with the date changed to 1908.

Forest Service issues Circular 145, Forest planting on the northern prairies, and Circular 148, Practical results in basket willow culture. Also the large new forest map, in four sheets, which when put together make a handsome and striking wall map, showing the original forested regions in varying shades of red, the prairie regions uncolored, the waters in blue, and the national forests in bright green. The map presents not only the continental United States, but also all the outlying possessions. It is entirely new and shows the lines as they are to-day. For copies of the complete map, in four sections, remit 50c. to the Superintendent of Documents. There will be no free distribution of this map, not even to Designated depository libraries.

Plant Industry Bureau offers Bulletins 121, a collection of Miscellaneous papers; 123, Decay of oranges while in transit from California; 125, Dry-land olive culture in northern Africa; and 127, The improvement of mountain meadows. The same Bureau, which hitherto has issued all its educational publications as numbered bulletins, has now begun a series of numbered circulars, which are pamphlets of smaller size than the bulletins, but similar in character and purpose. The numbers thus far issued are 1 and 5. The title of no. 1 is Self-boiled lime-sulphur mixture as a promising fungicide. No. 5 is Barley culture in the northern Great Plains. Numbers 2, 3, and 4 are not yet through the press. Plant Industry Bureau gives us also one of those Familiar talks on farming which are helping the division of Farmers' Coöperative Demonstration Work to put new life into southern agriculture, and a leaflet, Cultural directions for bamboo, in aid of the effort which the Department is making to naturalize in the United States that most useful of oriental plants.

Public Roads Office publishes Circular 89, Progress reports of experiments with dust preventives. The advent of the automobile has made the dust question an even more serious and pressing one with road-builders than it was before. Recognizing that the self-moving vehicles are a permanency and that their use is sure to become more and more general, road engineers are directing every energy toward producing road surfaces which can withstand the action of the swift autos. The Public Roads Office has also supplied Farmers' bulletin 321, The use of the split-log drag on earth roads. The split-log drag is a very simple and cheap road-making

implement, with which remarkable results have been secured. It has been made the subject of a speech and a picture in the Congressional record.

Publications Division issues a new print of its Circular 1, revised to Jan. 1, 1908, sketching the organization of the Agriculture Department at that date. To such dimensions has this great Department grown that 41 closely packed pages are required merely to give a skeleton outline of its organization.

Soils Bureau issues Soil survey of Merrimack County, N. H., with map. These county surveys do not gain general circulation, but for the residents of the counties which are surveyed and described they are about the most entertaining and useful publication they can get hold of. From this Bureau we have also Bulletin 51, Absorption of vapors and gases by soils.

Weather Bureau issues the second part of a new quarterly periodical, Bulletin of the Mount Weather Observatory, in which record will be made of the results of the research work done at Mount Weather.

The Department as a whole issues this month the collected annual reports of Secretary Wilson and his Bureau chiefs for the fiscal year 1907, setting forth the year's extensive work in a compact manner, yet filling more than 800 pages in doing so.

The Light-House Board is out with its List of lights, buoys, and daymarks on the northern lakes and rivers, corrected to the opening of navigation, 1908. The navigation of the Great Lakes and their connecting and tributary rivers is difficult at best, but without this book it would be virtually impossible.

From the Music Division of the Library of Congress we have in the class of Dramatic music a Catalogue of full scores, now in the Library and mainly the accretion of the five years last past. The catalogue fills 170 pages and shows a remarkable growth in this important department of the great national library. There are still notable gaps in the collection, their existence being explained in a prefatory note. A supplementary catalogue, which is promised in a few years, will no doubt show most of the gaps satisfactorily closed, as well as further large accessions.

The Interstate Commerce Commission—very active in publishing these days—begins this month a new series of publications with Special report 1, Intercompany relationships of railways in the United States, as of June 30, 1906, compiled by the Statistics and Accounts Division. Also we have the 12th volume of Interstate Commerce Commission Reports, which are the reported decisions of the Commission on the weighty subjects with which it deals. Hitherto the series of Reports has been issued by a private publishing house. With volume 12 it becomes a public document, published and sold by the Government.

The General Land Office supplies a useful little pamphlet bearing the title Suggestions to homesteaders and persons desiring to make homestead entries. Also an important volume of tables showing

the land grants made by Congress in aid of railroads, wagon roads, canals, and internal improvements.

The first edition of the American nautical almanac for 1911 is out in excellent season.

Manufactures Bureau, Commerce and Labor Department, brings out no. 1 of a new numbered series of Consular reports, called the Annual series. This series will present in pamphlet form the contents of the well-known annual, Commercial relations of the United States with foreign countries, in advance of the issue of the completed volume and the returns from each country in a separate pamphlet. How very much earlier this information will be supplied by the new plan is well illustrated in this number of the Monthly catalogue, which notes the issue of the volume of Commercial relations for the fiscal year 1906, and also, in the new series, no. 1, the similar returns for Turkey for the year 1907. Thus those interested receive the statistics of our trade with the Turkish Empire for 1906 and for 1907 at the same time. No comment is needed to demonstrate the value of the new plan of publication.

#### NATIONAL MONUMENTS

The President issued, April 16th, a proclamation establishing Natural Bridges national monument, in southeastern Utah. This is the fourteenth national monument established by the President under the authority of section 2 of An act for the preservation of American antiquities, approved June 8, 1906. Little popular interest has apparently been aroused by this new series of proclamations, supplementary to the National park series, but the establishment of these national monuments is certainly a notable step in the advancement of the country along the lines of archeological and esthetic education. By the terms of the proclamations the national monuments are placed under the protection of the Government and everybody is warned not to appropriate, injure, or destroy them. So much of the surrounding land as may be needed for their proper protection is withdrawn from entry or sale. The national monuments thus far established are:

Chaco Canyon, New Mexico: extensive prehistoric ruins.

Cinder Cone, California: an illustration of volcanic activity.

Devils Tower, Wyoming: an extraordinary example of the effects of erosion.

El Morro, New Mexico: remarkable rocks, known as El Morro and Inscription Rock.

Gila Cliff Dwellings, New Mexico: the best representative of the cliff-dwellers' remains.

Grand Canyon, Arizona: this is the Grand Canyon of the Colorado River, the greatest eroded canyon in the national domain.

Jewel Cave, South Dakota: a Black Hills cavern whose walls are encrusted with crystal.

Lassen Peak, California: an extinct volcano.

Montezuma Castle, Arizona: a prehistoric structure.

Muir Woods, California: an extensive growth of redwood big trees (*Sequoia sempervirens*).

Natural Bridges, Utah: the highest and largest natural bridges known; extraordinary examples of stream erosion.

Petrified Forest, Arizona: mineralized remains of mesozoic forests.

Pinnacles, California: natural formations of peaks and caves.

Tonto, Arizona: two prehistoric ruins of cliff dwellings.

#### LEWIS AND CLARK

It is not an uncommon experience for the Documents Office to receive inquiries concerning the Government report of the famous expedition under command of Captain Meriwether Lewis and Captain William Clark, which crossed the continent 1803-06 and was the first expedition to do so. Such inquirers are much surprised when told that there is no Government report of this expedition, and probably sometimes think that the Documents Office doesn't know half as much about Lewis and Clark as it should know or as it pretends to know. Undoubtedly there should have been a Government report of this very famous and important expedition, and probably there would have been one had not the sudden and somewhat mysterious death of Meriwether Lewis in 1809 cut short President Jefferson's design. The Biddle-Allen narrative (2 v. Philadelphia, 1814), which was for many years the only authentic one, carries on its title-pages the words, "By order of the Government of the United States," but it was in fact issued by private publishers, without Government subsidy, and was copyrighted in the name of Captain Clark. Thus it remains that, to the best of our knowledge and belief, the following brief memoranda reveal the whereabouts of all the material concerning the Lewis and Clark expedition which is to be found in the public documents.

Poore, p. 62. 9th Congress, 1st session. Feb. 19, 1806. A message from President Jefferson transmitting a letter from Meriwether Lewis dated Fort Mandan, April, 1805. This letter, and an accompanying memorandum of information as to certain Indian tribes, are the only documents supplied by any member of the expedition and relating to the history of the expedition that were ever printed by the Government. The message and accompanying papers are reprinted in Gales and Seaton's American state papers, Indian affairs, volume 1, page 705.

Poore, p. 67. 9th Congress, 2d session. Jan. 23, 1807. This is a letter from Henry Dearborn, Secretary of War, transmitting a communication from Captain Meriwether Lewis giving his views as to the compensation, above the ordinary pay, that should be awarded to the men of his command for their services on the expedition. He gives a list of the men and notes on their conduct and characteristics. This document is reproduced in American state papers, Military affairs, volume 1, page 207.

President Jefferson commends the expedition very briefly in his 6th annual message, Dec. 2, 1806.

Hayden's Survey, Bulletins, volume 1, number 6. An account, by Dr. Elliot Coues, of the various editions of histories of the expedition that had been issued up to 1876.

American Historical Association, Annual report, 1903, volume 1. Story of Lewis and Clark's journals, by R. G. Thwaites. This brings the record of publications 27 years nearer to date, and tells of remarkable finds of unpublished material.

## MONTHLY SUMMARY

The familiar statistical publication, now known as Monthly summary of commerce and finance, has gone through many changes. When the Bureau of Statistics, Treasury Department, was created, by act of July 28, 1866, one of the duties imposed upon it was the issue of a monthly report of imports, exports, etc. The first number bears date Nov. 15, 1866, and gives statistics for the months July–October, 1866. The second number was issued Jan. 15, 1867, with statistics for July–December, 1866. The title assumed was “Monthly report of the Director of the Bureau of Statistics.” With the third number appeared on the back leaf a sort of filing title, “Statistical tables, no. 3,” which was continued until no. 20, issued Aug. 22, 1868, and containing statistics for the year ended June 30, 1868. At this point the Director of the Bureau of Statistics disappears from the scene, his office and title having been abolished by act of Congress. The Bureau was left intact, and the Special Commissioner of Revenue was authorized to appoint a deputy and assign him to control of the Bureau. Because of these changes the issue of the monthly report was suspended for five months, the Deputy Special Commissioner of the Revenue issuing his first number Jan. 26, 1869, containing the statistics for July, 1868. He retained the queer filing title on the back, but changed it to read “Commerce and navigation.” He continued the numerical series without break, his first monthly issue being no. 21. After no. 24 the date of publication was not given. No. 28 gave the statistics for June, 1869, and for the fiscal year 1869. No. 29 gave a new version of the statistics for 1868 which had been previously given by the Director of statistics in no. 20. With the beginning of a new fiscal year (1870) a new plan of numbering, the same which is now in use, was begun. The monthly numbers for the fiscal year are numbered 1 to 12, and with each year a new set of numbers begins. The last number issued by the Deputy Special Commissioner was that for Sept. 1869 (no. 3 of fiscal year 1870). Nos. 4–7 of that year were still called “Monthly report of the Deputy Special Commissioner of the Revenue,” but they were issued by a clerk “in charge of the Bureau of Statistics.” No. 8 (Feb.) of the fiscal year 1870 was the first Monthly report of the Chief of the Bureau of Statistics, who has since been the editor and publisher of the monthly report or summary in all its various phases. The Chief retained the filing title “Commerce and navigation” on the back leaf until June 30, the end of the fiscal year 1875. With the beginning of the fiscal year 1876 (July, 1875) the title was changed to “Summary statement of imports and exports,” the filing title on the back leaf and the numbering were dropped, and the size of the publication was cut down to eight pages a month. With no. 8 (Feb.) of the fiscal year 1879 numbering began again, and continued till no. 10 (April) of the fiscal year 1884, when publication was suspended altogether, the size having meantime grown to 14 pages. In June, 1885, publication was resumed and the back numbers were issued, thus mak-

ing the series continuous. By June 30, 1885, when the May number was issued, arrears had been made up and regular issues resumed. The bound volume for 1894 received the title "Monthly summary of imports and exports, new series, vol. 1." For the first time the volume then had table of contents and index. The monthly issue for Nov. 1894 (no. 5 of fiscal year 1895), was erroneously numbered 4. With the issue for January, 1895 (no. 7 of fiscal year 1895), the monthly title was changed to "Finance, commerce, and immigration of the U. S.," but the title of the annual volume, 1895, remained as before. January, 1896 (no. 7 of fiscal year 1896), the monthly title became "Monthly summary of finance and commerce," but the annual title remained as before. Part 2 of the number for April, 1897 (no. 10 of fiscal year 1897), is "Comparison based upon H. R. 379" (Dingley tariff), 413 pages. In the bound volume it is interposed between pages 1820 and 1821. This volume shows a marked growth from the 96-page volume of 1876, the aggregate number of pages being 2573, besides many maps and plates. For 1898, the volume title was changed to "Monthly summary of finance and commerce, new series, vol. 5." At the beginning of the fiscal year 1899 the monthly title was changed to "Monthly summary of commerce and finance," and the annual title to "Monthly summary of commerce and finance, new series, vol. 6." Important special papers have appeared in many of the recent numbers, and these have also been printed separately. Beginning with November, 1895 (54th Congress, 1st session), and continuing until June, 1907 (59th Congress, 2d session), the Monthly summary was printed also as a numbered House document.

---

One of the "Notes of General Interest" in the February, 1908, number of the Monthly catalogue was this:

This year the annual classified statement of the expenditures of the Agriculture Department, of which for many years the "usual number" has been printed, being somewhere from ten to twenty times as many copies as were needed, was not printed at all, but a sufficient number of copies were produced at the Department by a duplicating process, saving, it is asserted, several thousand dollars. It was done at the suggestion of Mr. Littlefield, chairman of the House Committee on Expenditures in the Department of Agriculture, and it is told of in the annual report of the Department's Accounts and Disbursements Division. Which overprinted documents will be the next to go off the list?

This paragraph was and is quite true, but since it was written something else has happened. It happened in the Senate April 7. At that time the Agricultural appropriation bill was under consideration, and the typewritten or duplicated copy of the Statement of expenditures came to light. The Senate did not approve of it in that form, and it was ordered printed. Accordingly it has been printed, and is: 60th Congress, 1st session, Senate document 425. Quite a sizable document it is, too, filling 391 pages.

ers; by S. A. Knapp. Apr. 6, 1908. 22 + ii p. (Plant  
Industry Bureau.) \* Paper, 5c. Agr 8-415/2

320. Experiment station work 46; Mar. 1908. Apr. 8, 1908.  
32 p. (Experiment Stations Office.) \* Paper, 5c.  
Agr 6-305

321. Use of split-log drag on earth roads; by D. Ward King.  
Apr. 18, 1908. 14 + ii p. 5 il. (Public Roads Office.)  
\* Paper, 5c. Agr 8-416/3

**Agriculture Department—Continued.**

Farmers' bulletins [available for distribution]. Apr. 3, 1908. n. t. p. 3 p. (Publications Division. [Publication] 599.) †

Monthly list of publications [of Department], Feb.–Mar. 1908. Mar. 31, 1908. n. t. p. 4 p. (Publications Division. [Publication] 600.) †

Organization of Department of Agriculture, 1908; revised to Jan. 1, 1908. Jan 28, 1908. n. t. p. 41 p. (Publications Division. Circular 1.) \* Paper, 5c.

See also Bamboo—Cattle—Meat inspection—Tallow-tree.

**Alaska.** Fisheries of Alaska in 1907; [by Millard C. Marsh and John N. Cobb]. 1908. 64 p. (Bureau of Fisheries doc. 632; Fisheries Bureau.) \* Paper, 10c. 7-35263/5

See also Matanuska Valley—Schizopods.

**Alcohol.** [Circular] amending Regulations 30, relating to casking and storing of denatured alcohol on denaturing bonded warehouse premises. Apr. 21, 1908. 1 p. 4° (Internal Revenue Commissioner, [Circular] 720; Treasury Dept., Dept. circular 27, 1908.) †

See also Gas-engines.

**Alkali lands.**

Alkali soils of United States, review of literature and summary of present information [with bibliography]; by Clarence W. Dorsey. 1906 [reprint 1908]. 196 p. 13 il. (Soils Bureau. Bulletin 35.) \* Paper, 25c. Agr 6-1625/2

Reclamation of alkali lands in Egypt as adapted to similar work in United States; by Thos. H. Means. 1903 [reprint 1908]. 48 p. 6 il. 8 pl. (Soils Bureau. Bulletin 21.) [Prepared in co-operation with Plant Industry Bureau.] \* Paper, 15c.

See also Plants.

**Allen Gardiner Bay.** Allen Gardiner Bay and adjacent anchorages, Teknika Bay, Tierra del Fuego, Chile, from Chilean survey in 1901; chart 2486. Scale naut. m.=2.89 in. Washington, Hydrographic Office, Mar. 1908. 18.8 × 26.8 in. (Hydrographic Office.) † 20c.

**Almanacs.** See American nautical almanac.

**American Association of Farmers' Institute Workers.** Proceedings of 12th annual meeting of association, Washington, D. C., Oct. 23, 24, 1907; edited by W. H. Beal and John Hamilton. Apr. 9, 1908. 79 p. (Experiment Stations Office. Bulletin 199.) \* Paper, 15c. Apr. 6-593

**American citizens.** See Citizens of United States.

**American nautical almanac** for [calendar] year 1911. 1st edition. Washington, Bureau of Equipment, 1907 [1908]. viii + 272 p. [2] il. (Nautical Almanac Office.) \* Paper, 40c. 7-35404

**American Republics Bureau.**

NOTE.—This Bureau sells its own Monthly bulletins, handbooks, etc., at prices usually ranging from 5c. to \$1.00. Address the Director of the Bureau.

Bulletin [v. 26, no. 4] Apr. 1908. [1908.] xii + 737-962 p. 1 por. 1 pl. [16] p. of pl. (incl. por.). [English, Spanish, Portuguese, and French. Monthly.] † Paper, 25c. single copy, \$2.00 a yr.

NOTE.—Beginning with this number the title of the publication is changed from Monthly bulletin to Bulletin.

Monthly bulletin, v. 26, no. 3, Mar. 1908, whole no. 174. 1908. xii + 485-736 p. [3] por. [5] pl. [English, Spanish, Portuguese, and French.] † Paper, 25c. single copy, \$2.00 a yr.

See also Commerce—South America.

**Amphipoda.** Descriptions of 4 new species of amphipodous Crustacea from Gulf of Mexico; by Arthur S. Pearse. Apr. 6, 1908. [1]+27-32 p. 4 il. (National Museum.) [From Proceedings, v. 34; no. 1594.] †

**Animal Industry Bureau.**

Bulletin 102; further experiments concerning production of immunity from hog cholera; by M. Dorset, C. N. McBride, and W. B. Niles. Jan. 18, 1908 [reprint]. 96 p. \* Paper, 15c.  
Agr 8-225/4

**Circular—**

126. Simple method of keeping creamery records; by B. D. White. Mar. 30, 1908. n. t. p. 12 p. \* Paper, 5c.

Agr 8-417/2

127. Tubercle bacilli in butter, their occurrence, vitality, and significance; by E. C. Schroeder and W. E. Cotton. Apr. 4, 1908. 23 p. \* Paper, 5c.

Agr 8-410/2

129. Rabies and its increasing prevalence [with bibliography]; by George H. Hart. Apr. 16, 1908. 26 p. 1 il. \* Paper, 5c.

Agr 8-418/2

Laboratory inspector (male), Bureau of Animal Industry [announcement of examination] June 3, 1908. Apr. 25, 1908. [2] p. 4° (Civil Service Commission.) †

See also Cattle—Meat inspection.

**Animal products.** See Agriculture.

**Appalachian Mountains.** See Agriculture Department.

**Apple-trees.** See Milk-sickness.

**Appraisers.** Reappraisements of merchandise by general appraisers [on Mar. 26–Apr. 22, 1908]; Apr. 6–27, 1908. [1908.] 4° (Reappraisement circulars 1789–1803.) [Weekly.] †

**Arbitration.** Convention between United States and France, arbitration; signed Washington, Feb. 10, 1908, proclaimed Mar. 14, 1908. 1908. 5 p. (State Dept.) [English and French.] †

8-35382

**Arkansas.** Arkansas coal field, by Arthur J. Collier; with reports on paleontology, by David White and G. H. Girty. 1907 [1908]. vi + 158 + viii p. 29 il. 6 pl. (incl. map in pocket). (Geological Survey. Bulletin 326.) \* Paper, 25c.

GS 8-86

**Army list and directory.** See Adjutant-General's Department.

**Arsenic.** Sources of arsenic in certain samples of dried hops; by W. W. Stockberger. Feb. 21, 1908 [reprint]. ii + 41–46 p. (Plant Industry Bureau. Bulletin 121, pt. 4.) \* Paper, 5c.

Agr 8-432/3

See also Milk-sickness.

**Artesian wells.** See Water.

**Ashtabula, Ohio.** Ashtabula Harbor, Ohio. Scale 1 : 5000. [Washington, Northern and Northwestern Lakes Survey] Mar. 10, 1908. 32.3 × 20.4 in. (Northern and Northwestern Lakes Survey.) † 15c.

**Assay offices.** See Coins.

**Association of Official Agricultural Chemists.** Methods of analysis adopted by Association of Official Agricultural Chemists, Nov. 11–14, 1898; edited by Harvey W. Wiley. 1899 [reprint 1908]. 86 p. 4 il. (Chemistry Bureau. Bulletin 46, revised edition.) \* Paper, 5c.

See also Chemical analysis.

**Astrophysical Observatory.** Annals; by C. G. Abbot and F. E. Fowle, jr. 1908. v. 2, xi + 245 p. 1 il. 29 [30] pl. f° \* Paper, \$1.25. 7-29548/3

CONTENTS.—Preface.—Introduction.—Determination of intensity of solar radiation outside earth's atmosphere, otherwise termed solar constant of radiation.—Radiation and terrestrial temperature.—Radiation of different parts of sun's disk.—Summary and conclusion.

**Atlantic Coast.** Statement of quantities and values of certain fishery products landed at Boston and Gloucester, Mass., by American vessels, Mar. 1908. [1908.] 1 p. oblong 8° (Fisheries Bureau. Statistical bulletin 212.) †

GS 8-97

**Fungicides.** See Lime-sulphur wash.

**Galatia, Ill.** Illinois, Galatia quadrangle, lat. 37° 45'–38°, long. 88° 30'–88° 45'. Scale 1:62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Mar. 1908. 17.5 × 13.9 in. (Geological Survey. Topographic sheet.) † 5c.

**Gas.** See Petroleum.

**Gas-engines.** Tests of internal-combustion engines on alcohol fuel; by Charles Edward Lucke and S. M. Woodward. Sept. 14, 1907 [reprint 1908]. 89 p. 13 il. 20 pl. (Experiment Stations Office. Bulletin 191.) \* Paper, 20c. Agr 7-2165/3

**Gases.** Absorption of vapors and gases by soils; by Harrison E. Patten and Francis E. Gallagher. Apr. 17, 1908. 50 p. 19 il. (Soils Bureau. Bulletin 51.) \* Paper, 10c. Agr 8-441/2

**General Land Office.** See also Homestead—New Mexico—Oklahoma—Railroad land grants.

### Geological Survey.

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers, formerly Water-supply and irrigation papers; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

#### Bulletin—

319. Summary of controlling factors of artesian flows; by Myron L. Fuller. 1908. 44 + vi p. 17 il. 7 pl. \* Paper, 10c.

GS 8-93/2

326. Arkansas coal field, by Arthur J. Collier; with reports on paleontology, by David White and G. H. Girty. 1907 [1908]. vi + 158 + viii p. 29 il. 6 pl. (incl. map in pocket). \* Paper, 25c. GS 8-86

327. Geologic reconnaissance in Matanuska and Talkeetna basins, Alaska; by Sidney Paige and Adolph Knopf. 1907 [1908]. 71 + xiv p. 4 il. 4 pl. (incl. 2 maps in pocket). \* Paper, 25c. GS 8-94/3

332. Report of United States fuel-testing plant. St. Louis, Mo., Jan. 1906–June, 1907; Joseph A. Holmes in charge. 1908. 299 p. \* Paper, 25c. GS 8-97

336. Washing and coking tests of coal and cupola tests of coke conducted by fuel-testing plant, St. Louis, Mo., Jan. 1905–June, 1907, [articles] by Richard Moldenke, A. W. Belden, and G. R. Delamater; with introduction, by J. A. Holmes. 1908. 76 p. \* Paper, 10c. GS 8-95/5

Preparator of fossils (male) Geological Survey [announcement of examination] May 20, 1908. Apr. 16, 1908. [2] p. 4° (Civil Service Commission.) †

**Topographic sheets.** See names of places.

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5

**Geological Survey—Continued.**

to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About one-third of the area of the country, excluding outlying possessions, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Water-supply paper—**

211. Surface water supply of Colorado River drainage above Yuma, 1906; R. I. Meeker [and] H. S. Reed, district hydrographers. 1908. 149 p. 2 il. 2 pl. (incl. map).  
\* Paper, 20c. GS 8-96/4

212. Surface water supply of Great Basin drainage, 1906; E. C. La Rue, Thomas Grieve, jr., and Henry Thurtell, district hydrographers. 1908. iv + 98 p. 2 il. 2 pl. (incl. map).  
\* Paper, 15c. GS 8-98/5

**Library of Congress.** Publications issued since 1897. Jan. 1908. 46 p. 12° † 6-35005

**Life-saving stations.** Organization and rating of crews of life-saving stations. Apr. 10, 1908. 1 p. 4° (Treasury Dept., Dept. circular 25, 1908; Life-Saving Service.) †

**Light-House Board.**

NOTE.—Beginning with Jan. 1, 1908, the monthly Notice to mariners, issued by the Coast and Geodetic Survey, was consolidated with and made a part of the Weekly notice to mariners, issued by the Light-House Board, thus making it a joint publication. The List of lights and fog signals, the List of lights, buoys, and day marks, and the Weekly notice to mariners can be obtained, free of charge, on application to the office of the Board at Washington, the inspectors and engineers of the several lighthouse districts, the United States custom-houses, the principal agencies of the Coast and Geodetic Survey, the Hydrographic Office, the branch hydrographic offices, and United States consulates in foreign ports.

Weekly notice to mariners, changes in aids to navigation and chart corrections affecting publications of Light-House Board and Coast and Geodetic Survey, nos. 14-17, Apr. 3-24, 1908. 1908. †

See also Lights.

**Lights.** List of lights, buoys, and daymarks on northern lakes and rivers; corrected to opening of navigation, 1908. 1908. 182 p. large 8° (Light-House Board.) † 7-24418

**Lime-sulphur wash.** Self-boiled lime-sulphur mixture as promising fungicide; by W. M. Scott. Apr. 18, 1908. 18 p. 2 il. (Plant Industry Bureau. Circular 1.) \* Paper, 5c. Agr 8-437/2

**Liquidambar.** Sap-rot and other diseases of red gum; by Hermann von Schrenk. Dec. 5, 1907 [reprint 1908]. 37 p. 8 pl. (Plant Industry Bureau. Bulletin 114.) \* Paper, 15c. Agr 7-2377/3

**Live stock.** See Cattle.

**Loans and Currency Division.**

Caveat list of United States registered bonds, Apr. 1, 1908. [1908.] 1 p. f° [Monthly.] †

Circulation statement, Apr. 1, 1908. Apr. 1, 1908. 1 p. oblong 8° [Monthly.] †

**Loco-weed.** See Milk-sickness.

**Lubricating-oil.** See Paint.

**Lumber and timber.** Rules and specifications for grading of lumber adopted by various lumber manufacturing associations of United States, compiled by E. R. Hodson. 1906 [reprint 1908]. 127 p. (Forest Service. Bulletin 71.) \* Paper, 15c. Agr 7-8/2

**Lumbermen.** Lumberman [Forest Service, announcement of examination] May 20, 1908. Apr. 16, 1908. [2] p. 4° (Civil Service Commission.) †

**Machinery.** See Electricians.

**Mackinac, Straits of.** Straits of Mackinac with approaches therefrom from lakes Huron and Michigan and entrance by Detour Passage to St. Mary's River. Scale 1:120,000. [Washington, Northern and Northwestern Lakes Survey] Mar. 25, 1908. 22.2 × 40.9 in. (Northern and Northwestern Lakes Survey.) † 15c.

**Mails, Foreign.** Schedule of steamers appointed to convey mails to foreign countries during May, 1908. Apr. 16, 1908. 1 p. narrow f° (Foreign Mail Service.) [Monthly.] \* Paper, 10c. single copy, \$1.00 a yr.

**Manufactures Bureau.**

Consular reports, annual series 1; Turkey, trade for fiscal year 1907; [by Edward H. Ozmun]. Apr. 1908. 40 p. † 8-35384

NOTE.—The above series, of which this publication is the first, is to contain the annual reports of the consular officers which have heretofore been held until the end of the year and embodied in the volume known as Commercial relations. Hereafter the reports for each country are to be issued separately in advance in this consecutively numbered series, and later are to be brought together and reissued as Commercial relations.

**Manufactures Bureau—Continued.**

Daily consular and trade reports, nos. 3139-64; Apr. 1-30, 1908. [1908.] [15] il. [Daily except Sundays and holidays.] †

Monthly consular and trade reports, Apr. 1908; no. 331. 1908. 232 p. [2] il. \* Paper, 25c. 6-35356/4

Special consular reports, v. 39; Cotton-seed products in foreign countries; reprint with appendix. 1908. 255 p. [Corrected 2d print was issued.] \* Paper, 25c. 8-35301

See also Commerce—Commercial relations—Swiss embroidery.

**Manufactures, etc.** See Chemicals.**Manuscripts Division, Library of Congress.** See Continental Congress.

**Manzano national forest.** Manzano national forest, N. Mex. [to include and supersede Mount Taylor national forest] (2d proclamation). [Apr. 16, 1908.] [2] p. 2 maps, f° (President of United States.) †

**Masurite.** Masurite Explosive Company *v.* Pittsburg & Lake Erie Railroad Company et al.; submitted Apr. 7, 1908, decided Apr. 13, 1908; report of [Interstate Commerce] Commission. 1908. c. t. o. p. 405-408. (Interstate Commerce Commission.) [From Reports, v. 13.] †

**Matanuska Valley.** Geologic reconnaissance in Matanuska and Talkeetna basins, Alaska; by Sidney Paige and Adolph Knopf. 1907 [1908]. 71 + xiv p. 4 il. 4 pl. (incl. 2 maps in pocket). (Geological Survey. Bulletin 327.) \* Paper, 25c. GS 8-94/3

**Meat inspection.**

Amendment 1 to [Bureau of Animal Industry] order 150 (regulations governing meat inspection of Department of Agriculture). Apr. 25, 1908. 2 p. (Agriculture Dept.) †

Bureau of Animal Industry meat inspection rulings 3A. Apr. 6, 1908. 1 p. (Agriculture Dept.) †

**Medicine.**

Index to United States naval medical bulletin, v. 1. 1908. n. t. p. iv p. ([Medicine and Surgery Bureau.]) † 8-35357

United States naval medical bulletin, v. 2, no. 2; Apr. 1908. 1908. vii + 97 p. [15] pl. on 10 p. (Medicine and Surgery Bureau.) [Quarterly.] \* Paper, 15c. 8-35357

**Medicine and Surgery Bureau.**

Index to United States naval medical bulletin, v. 1. 1908. n. t. p. iv p. † 8-35357

Monthly statement, paper currency of each denomination outstanding Mar. 31, 1908. Apr. 1, 1908. 1 p. oblong 24° (Treasurer of United States.) †

New counterfeit \$5 silver certificate (Indian head). Apr. 15, 1908. 1 p. 4° (Secret Service Division. Circular letter 273.) †

New counterfeits. Apr. 1, 1908. 1 p. 4° (Secret Service Division. Circular letter 272.) †

**Parasites of animals.** See Isopods.

**Passenger rates.** Al. G. Field *v.* Southern Railway Company et al.; decided Apr. 6, 1908; report of [Interstate Commerce Commission. 1908. c. t. o. p. 298, 299. (Interstate Commerce Commission.) [From Reports, v. 13.] †

See also Freight rates.

**Pasture-land.** Improvement of mountain meadows; by J. S. Cotton. Apr. 14, 1908. 29 p. 4 pl. (Plant Industry Bureau. Bulletin 127.) \* Paper, 10c. Agr 8-436/2

**Patent attorneys.** Rules and regulations in regard to attorneys practicing before Patent Office, 1908, extracts from Rules of practice. 1908. n. t. p. 3 p. (Patent Office.) †

**Patent Office.**

NOTE.—The Patent Office publishes specifications and drawings of patents, both in single copies and monthly volumes, the former at 5c. and the latter at \$5.00. The former are not enumerated in this catalogue. For certified copies of patents, including specification, drawing, certificate, and grant, the price is 80c. A variety of indexes, giving a complete view of the work of the Office from 1790 to date, are published at prices ranging from 25c. to \$10.00 per volume. The Rules of practice and pamphlet Patent laws are furnished free. The Patent Office issues coupon orders in packages of 20 at \$1.00 per package, or in books containing 100 coupons at \$5.00 per book. One coupon will procure a specification with drawings, and two coupons a copy of the Official gazette. They are good until used. Address Chief Clerk, Patent Office.

Official gazette, Apr. 7-28, 1908; v. 133, nos. 6-9. 1908. c. t. o. [cix]+1193-2184 p. il. large 8° † Paper, 10c. single copy, \$5.00 a yr. 4-18256-8/3

**Slip laws.** See Congress.

**Smith, John Donnell.** See Botany.

**Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No sets of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

Smithsonian miscellaneous collections—

v. 50, pub. 1780. Smithsonian miscellaneous collections, quarterly issue, v. 4, pt. 4. Washington, Smithsonian Institution, 1908. c. t. o. viii + 419-558 p. [6] il. [26] pl. † Paper, 50c.

CONTENTS.—[Title-page, contents, and index to v. 50.]—New and characteristic species of fossil mollusks from oil-bearing tertiary formations of Santa Barbara County, Cal.; by Ralph Arnold.—On occurrence of remains of fossil cetaceans of genus *Schizodelphis* in United States, and on *Priscodelphinus* (?) *crassangulum* Case; by Frederick W. True.—Meteor crater of Canyon Diablo, Ariz., its history, origin, and associated meteoric irons; by George P. Merrill.—Notes on *Gonidea angulata* Lea, fresh-water bivalve, with description of new variety; by Wm. H. Dall.—New species of *cavolina*, with notes on other pteropods; by Wm. H. ## Size

When size is not given, octavo is to be understood. Size of maps is measured from outer edge of border, excluding margin.

## NOTES OF GENERAL INTEREST

The amazing variety of topics treated of in the United States public documents furnishes fresh cause for wonderment in each Monthly catalogue. The present Catalogue, for May, 1908, is in no wise behind its predecessors in the varied interest of the official publications to which it supplies a guide.

It is not a wide-spread popular belief that census reports have a general and enduring popularity with the reading public, yet we have this month a fifth edition of the ponderous Agriculture volume (v. 6) of the twelfth census. There would not be a fifth edition if the four preceding editions had not been exhausted by the popular demand.

Part 1 of a summary of the Report of the commissioner of corporations on cotton exchanges has been issued.

Bulletin 94 of the Census Bureau is composed of statistics of employees, executive civil service of the United States. The total number of employees is given as 286,902, of whom a little over 10 per cent, or 29,103, are employed in Washington. If there is any kind of employee that is not employed by the Government it must be a rather rare kind. The list in Bulletin 94 is not in detail, but in groups and classes, yet such titles of employees as these are found in it: Appraisers, apprentices, architects, attorneys, bakers, botanists, chaplains, collaborators, collectors, computers, cooks, curators, domestics, detectives, editors, experts, farmers, firemen, fish culturists, gaugers, geographers, guards, internes, interpreters, janitors, keepers, librarians, laborers, melters, mates, musicians, nurses, openers, packers, pharmacists, stewards, surfmen, statisticians, storekeepers, samplers, taggers, teachers, translators, watchmen, woodworkers, and zoologists.

In the medical line we have Bulletin 43 of the Hygienic Laboratory, Public Health and Marine-Hospital Service, on the Standardization of tetanus antitoxin; Drill regulations and outlines of first aid to the injured, for the Hospital Corps of the Army; Bulletin 104 of the Animal Industry Bureau, Agriculture Department, entitled Medical milk commissions and the production of certified milk in the United States; and Bulletin 112, part 2, of the Chemistry Bureau, Agriculture Department, Food legislation during the fiscal year 1907.

Of the great Geologic atlas of the United States upon which the Geological Survey has been engaged for a quarter-century, two new folios are issued for the month: No. 156, the Elk Point folio, which includes parts of the States of South Dakota, Nebraska, and Iowa, and No. 158, Rockland, Me.

Volumes 11 and 12 of the Library of Congress print of the Journals of the Continental Congress, issued by the Manuscripts Division, are now available, bringing the record down to the close of the year 1778.

Farmers' bulletin 327 is on the Conservation of natural resources, and its author is Forester Gifford Pinchot: a subject of vital moment treated by a master hand.

Of timely interest, we have the following fresh from the press: List of works relating to the first and second banks of the United States, with chronological list of reports, etc., contained in the American state papers and in the Congressional documents; Statistical abstract of the United States, 1907.

Bulletin 74 of the Labor Bureau is on the Legal liability of employers for injuries to employees in the United States. It is stated that laws relating to such liability have been enacted in 22 foreign countries.

Bulletin 329 of the United States Geological Survey is of present economical interest, being on the Organization, equipment, and operation of the structural-materials testing laboratories at St. Louis. The pamphlet is fully illustrated and will give careful readers a clear understanding of the methods of the important work which has been done at St. Louis during the few years last past.

Bulletin 1, series of 1908, Education Bureau, has the interesting theme, On the training of persons to teach agriculture in the public schools, and it is by the eminent agricultural author, Prof. Liberty Hyde Bailey, of Cornell University.

Some hard nuts for legal minds to crack would be found in a pamphlet from the Naval War College, if it were not for the fact that the solutions are supplied in the same publication. Its title is, International law situations, with solutions and notes. Because naval officers may at times represent the Government in any part of the world, they must be well grounded in international law, and one of the means of testing and increasing their knowledge is that of submitting to them various hypothetical "situations" to which they are to furnish "solutions."

The Adjutant-General of the Army has promulgated a little volume which will be more interesting than a novel to that large part of the bone and sinew of the land which is enrolled in the National Guard of the various States and Territories. Its title is Regulations of the War Department governing the organized militia under the Constitution and laws of the United States.

#### GEORGE CATLIN

None of the books written by George Catlin is a public document of the United States, but the unsuccessful efforts of many prominent persons, prolonged for many years, to induce Congress to buy the hundreds of portraits of Indians painted from the life by him and the numerous objects illustrative of Indian life which he had collected during eight years' habitation among the tribes, and the

final acquirement of these collections by the National Museum after they had suffered from neglect and vicissitude for a generation, are interesting episodes described in various numbered Congressional documents (409-636; 476-374; 491-806; 511-152; 527-820; 2432-15). Mr. Donaldson's thorough account of the Catlin gallery (National Museum Report, 1885, Appendix, part 5) contains also an excellent biography of Catlin and lists of his works, both literary and artistic. Mr. Catlin never received a cent of subsidy from the Government. He maintained himself and family in Europe for many years by exhibiting his gallery of Indian paintings and curios. The proposal to buy his paintings and collections for \$65,000 was once lost in Congress by a single vote in the Senate, and the failure was attributed to the jealous opposition of another artist, J. M. Stanley, who also had Indian pictures to sell. There was fierce rivalry, in the first half of the nineteenth century, between those who were exploiting the Indians for the fame and fortune of the exploiters. Schoolcraft published a note questioning the truth of Catlin's account of certain religious ceremonies among the Mandans. Catlin resented this, and brought forward in defense much corroborative evidence. He wrote Humboldt that Schoolcraft "had not the industry or courage to go within a thousand miles of the Mandans." Catlin was born in Wilkes-Barre, Pa., 1796, and died in Jersey City, 1872. For the last ten years of his life he suffered the severe disability of total deafness.

#### HENRY ROWE SCHOOLCRAFT

Schoolcraft's books relating to the North American Indians were found desirable for distribution by Congresses before the civil war. Mr. Schoolcraft, who was born near Albany, N. Y., 1793, and married an Indian wife at Mackinaw, 1823, began his exploring trips among the tribes as early as 1820 and began publishing his narratives in 1821, but it was not till 1847 that he got the first appropriation from Congress for the publication of his chief work. When the Treasury tap was once started it flowed freely. The first appropriation, March 3, 1847, was \$5,000, and others followed in this order: January 26, 1849, \$5,000; September 30, 1850, \$10,000; February 27, 1851, \$19,361; July 21, 1852, \$28,875; March 3, 1853, \$17,620; March 3, 1855, \$17,200. In none of the appropriation bills does Schoolcraft's name appear. The first appropriation was made "to enable the Bureau of Indian Affairs" (then an office in the War Department) "to collect and digest such statistics and materials as may illustrate the history, present condition, and future prospects of the Indian tribes," and the succeeding appropriations were made "to continue" the same work. Notwithstanding the liberality of the subsidies, the work moved slowly, and not until July, 1852, did Congress find it needful to make a special appropriation for printing and binding the first volume. In this appropriation act the legislators gave evidence of impatience by providing that the work should be finished in five volumes and that at least one volume should be

published every year. Nevertheless the work grew to six volumes, and Schoolcraft had two more ready, but Congress would not pay for printing them. The series was peremptorily wound up by adding to the final appropriation (1855) the proviso that the money was "for the completion of the sixth and last volume," and that "said volume shall embrace all the material now or to be collected, and be completed within two years," and also that the text should be submitted to the Secretary of the Interior before publication "for revision with a view to the curtailment of all matter useless, irrelevant, or inconsistent."

In his latter years Schoolcraft was a paralytic and had no use of his hands. Typewriters were then undreamed of and stenographers were few. The volumes for which Congress paid so handsomely were mainly written and compiled, under his direction, by his second wife, a white woman. The full title of the second (which is the standard) edition of his work is: "Information respecting the history, condition, and prospects of the Indian tribes of the United States; collected and prepared under the direction of the Bureau of Indian Affairs, per act of Congress, March 3, 1847, by Henry R. Schoolcraft. Illustrated by Seth Eastman, captain, U. S. A. Published by authority of Congress. Philadelphia, Lippincott, Grambo & Co., 1853-1858. 6 vols. 4<sup>o</sup>." Volume 6 has a special title, "History of the Indian tribes of the United States." The first edition, 1851-1857, has the words "Historical and statistical" as the first of the title, which otherwise is as found in the second edition. There is also an edition entitled "Archives of aboriginal knowledge, containing all the original papers laid before Congress," etc. None of these volumes is found in the series of numbered Congressional documents.

There are conflicting opinions as to the merit of Schoolcraft's work. In a letter to Catlin, Humboldt calls it "a huge scrap-book," but no room was found in it for mention of George Catlin, a contemporary painter of and writer concerning the Indians. He also had wares to sell to Congress, and was probably looked upon as a rival. Schoolcraft published several minor works, but not under the patronage of Congress. He died in Washington, 1864.

#### NOTABLE REPORTS AND ADDRESSES

A list of a few of the notable reports and addresses that have been made to Congress, showing where they may be found in the "sheep set":

##### **Adams, John Quincy.**

Instructions as to privateering. 1823. 33d Cong. 1st sess., H. ex. doc. 111.

Oration on life and character of General Lafayette. 1834. 23d Cong. 2d sess., House Journal, p. 657.

Report on Smithsonian bequest. 1840. 26th Cong. 1st sess., H. rp. 277.

Report on weights and measures. 1821. 16th Cong. 2d sess., H. doc. 109.

**Adams, John Quincy—Continued.**

South American applications for appointment of United States ministers answered and illegal acts rebuked. 1819. 15th Cong. 2d sess., H. doc. 116.

**Astor, John Jacob.**

Historical sketch of Astoria. 1823. 17th Cong. 2d sess., H. doc. 45.

**Bache, Alexander Dallas.**

Report on construction of standard weights and measures. 1846. 29th Cong. 1st sess., S. doc. 483.

**Bancroft, George.**

Correspondence with Earl Russell [Lord John] concerning statements in memorial address on Abraham Lincoln. 1866. 39th Cong. 1st sess., H. mis. doc. 110.

**Benton, Thomas Hart.**

Report in reply to charges of corruption. 1846. 29th Cong. 1st sess., S. doc. 222.

Report on reduction of executive patronage. 1826. 19th Cong. 1st sess., S. doc. 88.

**Bingham, John A.**

Argument for the Government on the trial of Herold, Atzerodt, Payne, O'Laughlin, Spangler, Arnold, Mudd, and Mrs. Mary E. Surratt. 1865. 39th Cong. 1st sess., H. ex. doc. 1, p. 1007.

**Bryant, William Cullen, and others.**

Memorials in favor of an international copyright law. 1848. [With catalogue of American books piratically published in Great Britain.] 30th Cong. 1st sess., H. mis. doc. 76.

**Buckalew, Charles R.**

Report of a select committee on representative reform. 1869. 40th Cong. 3d sess., S. rp. 271.

**Bulfinch, Charles.**

Report on penitentiaries. 1827. 19th Cong. 1st sess., H. doc. 98.

**Burke, Edmund.**

Report on the Dorr rebellion in Rhode Island. 1844. 28th Cong. 1st sess., H. rp. 546.

**Burnside, Ambrose Everett.**

Report on reorganization of the Army. 1878. 45th Cong. 3d sess., S. rp. 555.

**Calhoun, John Caldwell.**

Report favoring closing mails to inflammatory [anti-slavery] publications. 1836. 24th Cong. 1st sess., S. doc. 118.

Special report on roads and canals. 1819. 15th Cong. 2d sess., H. doc. 87.

**Cambreleng, Churchill C.**

Report on commerce and navigation. 1830. 21st Cong. 1st sess., H. rp. 165.

**Carleton, James Henry.**

Report on Mountain Meadows massacre. 1859. 40th Cong. 2d sess., H. rp. 79, p. 26.

**Cartter, David Kellogg.**

Opinion in case of Hallet Kilbourn, imprisoned for alleged contempt of House of Representatives. 1876. 44th Cong. 1st sess., H. mis. doc. 174.

**Causin, John M. S., and Preston, J. A.**

Minority report on the Dorr rebellion in Rhode Island. 1844.  
28th Cong. 1st sess., H. rp. 581.

**Clay, Henry.**

Report on reducing price of public lands. 1832. 22d Cong. 1st  
sess., H. rp. 448.

Report on relations with France. 1835. 23d Cong. 2d sess., S.  
doc. 40.

**Cope, Edward Drinker.**

Vertebrata of tertiary formations of the West. 1884. 48th  
Cong. 1st sess., H. mis. doc. 60.

**Cross, Judson N.**

Report on alien contract labor laws and immigration. 1892. 52d  
Cong. 1st sess., H. ex. doc. 235, pt. 1, p. 181.

**Cushing, Caleb.**

Instructions to, as Commissioner to China. 1843. 28th Cong.  
2d sess., S. doc. 138.

This list will be continued.

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers, formerly Water-supply and irrigation papers; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

**Bulletin—**

329. Organization, equipment, and operation of structural-materials testing laboratories at St. Louis, Mo., by Richard L. Humphrey; with preface, by Joseph A. Holmes. 1908. xi + 84 p. 9 il. 25 pl. \* Paper, 20c. GS 8-99
342. Results of spirit leveling in California, 1896-1907; by S. S. Gannett and D. H. Baldwin. 1908. 172 p. \* Paper, 20c. GS 8-131/3

**Geologic atlas of United States, folio—**

156. Elk Point folio, S. Dak.-Nebr.-Iowa. Washington, Geological Survey, 1908. c. t. o. 8 p. 6 il. [3] maps. \* Paper, 25c. 8-127/4
158. Rockland folio, Me. Washington, Geological Survey, 1908. c. t. o. 15 p. 2 il. [5] maps, large 4° \* Paper, 25c. 8-132/2

Monographs, v. 49; Ceratopsia, by John B. Hatcher, based on preliminary studies by Othniel C. Marsh [with bibliography]; edited and completed by Richard S. Lull [with introduction, by H. F. Osborn]. 1907 [1908]. xxx + 300 + ii p. 125 il. 51 pl. (incl. maps), 4° (Geological Survey. Monographs, v. 49.) [Includes list of Hatcher's writings.] \* Cloth, \$1.50. GS 8-128/4

Professional paper 56; Geography and geology of portion of southwestern Wyoming, with special reference to coal and oil [with bibliography]; by A. C. Veatch. 1907 [1908]. vi + 178 + viii p. 9 il. 26 pl. (1 in pocket, incl. maps, 3 in pocket), 1 tab. 4° \* Paper, 60c. GS 8-129/4

Publications of Survey (not including topographic maps). 1908. 80 p. † GS 8-133/3

**Topographic sheets.** See names of places.

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About one-third of the area of the country, excluding outlying possessions, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the Survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

Water-supply paper 218; Water-supply investigations in Alaska, 1906-07, Nome and Kougarok regions, Seward Peninsula, Fairbanks district, Yukon-Tanana region; [articles] by Fred F. Henshaw and C. C. Covert. 1908. 156 + v p. 2 il. 12 pl. (incl. maps). \* Paper, 25c. GS 8-130/3

### Patent Office.

NOTE.—The Patent Office publishes specifications and drawings of patents, both in single copies and monthly volumes, the former at 5c. and the latter at \$5.00. The former are not enumerated in this catalogue. For certified copies of patents, including specification, drawing, certificate, and grant, the price is 80c. A variety of indexes, giving a complete view of the work of the Office from 1790 to date, are published at prices ranging from 25c. to \$10.00 per volume. The Rules of practice and pamphlet Patent laws are furnished free. The Patent Office issues coupon orders in packages of 20 at \$1.00 per package, or in books containing 100 coupons at \$5.00 per book. One coupon will procure a specification with drawings, and two coupons a copy of the Official gazette. They are good until used. Address Chief Clerk, Patent Office.

**Quinsigamond, Mass.** Massachusetts - Connecticut - Rhode Island, Quinsigamond quadrangle, lat. 42°–42° 30', long. 71° 30'–72°. Scale 1:125,000, contour interval 40 ft. [Washington, Geological Survey] edition of Jan. 1908. 17.5 × 13.1 in. (Geological Survey. Topographic sheet.) † 5c.

**Railroad accidents.** Accident bulletin 26, showing collisions and derailments of trains and casualties to persons, Oct.–Dec. 1907. 1908. 13 p. (Interstate Commerce Commission.) [Quarterly.] † 5-41547/2

- Railroad-worms.** Apple maggot or railroad worm (*Rhagoletis, Trypeta, pomonella* Walsh); by A. L. Quaintance. May 4, 1908. n. t. p. 12 p. 2 il. (Entomology Bureau. Circular 101.) \* Paper, 5c. Agr 8-44/2
- Railroads.** Conference rulings. May 7, 1908. 14 p. (Interstate Commerce Commission. Bulletin 1.) † 8-35449
- Reappraisalment circulars.** See Appraisers.
- Receipts and expenditures of United States, Comparative statement of.** See Bookkeeping and Warrants Division.
- Reclamation Service.** See Engineers.
- Resolutions.** See Congress.
- Rib-grass.** Improved method of separating buckhorn from red clover and alfalfa seeds; by Harry B. Shaw. May 13, 1908. 12 p. 10 il. (Plant Industry Bureau. Circular 2.) \* Paper, 5c. Agr 8-489/2
- Rivers and harbors.** List of works relating to deep waterways from Great Lakes to Atlantic Ocean, with some other related works. 1908. 59 p. (Bibliography Division, Library of Congress.) \* Paper, 10c. 8-35004/2
- Rockland, Me.** Rockland folio, Me. Washington, Geological Survey, 1908. c. t. o. 15 p. 2 il. [5] maps, large 4° (Geological Survey. Geologic atlas of United States, folio 158.) \* Paper, 25c. 8-132/2
- Rockville, Md.** Maryland-Virginia, Rockville quadrangle, lat. 39°-39° 15', long. 77°-77° 15'. Scale 1: 62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Mar. 1908. 17.5 × 13.7 in. (Geological Survey. Topographic sheet.) † 5c.
- Romain, Cape.** See South Carolina.
- Rominger, Carl Ludwig.** Carl Ludwig Rominger [with bibliography of his works]; by George P. Merrill. Washington, Smithsonian Institution, May 1, 1908. c. t. o. p. 79-82, 1 il. (Smithsonian Institution. [Publication] 1796.) [From Smithsonian miscellaneous collections, v. 52.] †
- Rural schools.** See Public schools.
- Samar.** Northeast coast of Samar, P. I., Catarman to Oras Bay, scale 1:100,000; with inset, Helm Harbor and San Ramon Bay, east coast of Samar, scale 1:25,000; chart 4421. Washington, Coast and Geodetic Survey, Apr. 1908. 29.7 × 41.6 and 15.9 × 16.7 in. (Coast and Geodetic Survey.) † 40c.
- Sandy soil.** See Clover.
- San Pedro, Cal.** San Pedro Harbor, Cal.; chart 5145. Scale 1:10,000. Washington, Coast and Geodetic Survey, May, 1908. 34.4 × 26.6 in. (Coast and Geodetic Survey.) † 25c.
- San Ramon Bay.** See Samar.
- Schools.** See Public schools.
- Sea-turtles.** See Turtles.
- Seal and seal fisheries.** Reports relating to Alaskan seal fisheries [1906 and 1907; by W. I. Lembkey]. 1908. 120 p. (Alaskan Fisheries Division.) \* Paper, 10c.
- Secret Service Division.** Circular letter 273; New counterfeits. May 19, 1908. 1 p. 4° †
- Seeds.** See Plant Industry Bureau.
- Shipping.** Tonnage movement of American and foreign vessels in foreign trade of United States during year ending June 30, 1907. 1908. c. t. o. p. 1163-1240, 4° (Statistics Bureau, Commerce and Labor Dept.) [From Foreign commerce and navigation, 1907.] † 8-35450

**Sierra national forest.** Sierra national forest, Cal. and Nev. (3d proclamation). [Apr. 20, 1908.] [2] p. map, f° (President of United States.) †

**Silver.** See Gold.

**Slip laws.** See Congress.

**Small arms.** See Army supplies.

**Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1. Contributions to knowledge; 2. Miscellaneous collections; 3. annual reports; 4. special publications. No *sets* of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the endorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

(Box 112) List of official publications of Government, Feb. 26-May 20, 1908 [distributed for Library of Congress through Smithsonian Institution]. Washington, Smithsonian Institution, 1908. 10 p. †

## Size

When size is not given, octavo is to be understood. Size of map is measured from outer edge of border, excluding margin.

## NOTES OF

## GENERAL INTEREST

New topographic map sheets for the month are of Agra, in Oklahoma; Blalock Island, in Oregon and Washington; Calhoun, in Kentucky; Four Oaks, in North Carolina; Las Vegas, in Nevada and California; Lewiston, in Maine; Loveland, in Colorado; Rochester, in Michigan; Shoshone Lake, in Yellowstone Park and Wyoming; Waukegan, in Illinois and Wisconsin; and Youngstown, in Ohio and Pennsylvania. Each map is named after some prominent place in its area, but the area mapped extends many miles beyond the point from which the name is derived. All of these new maps are parts of the great topographical map of the United States upon which the Geological Survey has been engaged for many years.

An Executive proclamation of date June 15, 1908, sets aside and reserves from settlement "all unpatented public lands of the United States lying within 60 feet of the boundary line between the United States and the Dominion of Canada."

Conventions providing for arbitration of differences between this country and Great Britain and Spain are published.

The report of the United States representative, W. I. Buchanan, on the Central American Peace Conference, held in Washington, Nov. 13-Dec. 20, 1907, is now just published.

That standard statistical work, Foreign commerce and navigation of the United States, is now just issued for 1907.

The Statistics Bureau, Agriculture Department, is issuing a series of bulletins showing the statistics for the forty years, 1866-1906, concerning the crops of corn, wheat, oats, barley, rye, buckwheat, potatoes, and hay. The potato, buckwheat, and rye crops are this month's contributions.

That wonderfully varied and useful series, the Farmers' bulletins of the Agriculture Department, has reached its 324th number with a treatise upon the cultivation of the sweet potato.

Chemistry Bureau Bulletin 113 discusses an interesting subject, "Injury to vegetation and animal life by smelter wastes."

The little book of information for immigrants seeking naturalization is being issued in many languages. This month's issues are in Bohemian, Croatian, Danish-Norwegian, German, Greek, Slovenian, and Swedish.

The Bibliography Division of the Library of Congress issues two new lists of books, one of publications on corrupt practices in elections, the other on workingmen's insurance.

Technical series 15 of the Entomology Bureau comprehensively considers that troublesome and injurious family, the Ixodoidea or ticks.

A new set of regulations for the manufacture, sale, and use of denatured alcohol has been published by the Internal Revenue Commissioner.

The Geological Survey publishes a new map of the coal fields of the United States with statistical and descriptive text.

The Coast Survey's volume of Tide tables for 1909 has been issued.

The Agriculture Department offers an interesting contrast this month by publishing the annual reports for 1907 of the two experiment stations most widely separated by climatic conditions—one situated in Hawaii, the land of perpetual summer, the other in Alaska, the land of almost perpetual winter. The reports indicate that both stations are flourishing and that both are growing bountiful crops, though there are, of course, great differences in the kinds of plants grown. Both reports are generously and instructively illustrated.

The Education Bureau has found occasion for the issue of a second edition of its Bulletin on Agricultural education (no. 2 of 1907).

Special consular reports, v. 40, pt. 2, fills 144 pages with information from all parts of the world about Motor machines.

#### DOCUMENT CATALOGUE

The Document catalogue of the 58th Congress is at last completed and will appear very shortly. It covers the period between July 1, 1903, and June 30, 1905, and will be larger than any of the previous volumes, as it contains 1,581 pages. On account of its size, an effort is being made by the Government Printing Office to obtain a thinner paper for it in order to make it easier for the user to handle.

#### ADVANCE SHEETS OF THIRD EDITION OF CHECKLIST OF UNITED STATES PUBLIC DOCUMENTS

Advance sheets for the several bureaus and offices of the Department of Agriculture have now been issued, 33 classes comprising a complete set for the Department.

The sheet for the American Republics Bureau has also been distributed. The publications of this Bureau are listed in a single number.

Nine of the 16 issues for the Department of Commerce and Labor are now (July 3, 1908), in press, and 2 of the classes have already been issued.

This Office is sending out copies of the Advance sheets to the bureaus concerned for their criticisms, and from time to time we are receiving in reply additional information which will be incorporated in the permanent Checklist. We wish to express here our appreciation of such cooperation on the part of Government officials and librarians.

We have a regular mailing list for the Advance sheets, and all sets as distributed should be complete. If, however, any numbers have gone astray, the missing ones may be obtained by application to the Superintendent of Documents, Washington, D. C.

#### MONROE DOCTRINE

The Documents Office occasionally receives a request for "The Monroe doctrine," as if it were a volume or a pamphlet which might be passed out like an army register or a consular report. As a matter of fact, there is no such official publication as "The Monroe doctrine." The phrase has gradually grown into popular usage to designate a national principle which was formulated in a few diplomatically-phrased lines in the message sent to the 1st session of the 18th Congress, Dec. 2, 1823, by President James Monroe. He did not call it a "Doctrine" nor designate it by any other title. It appears in the text of the message, not distinguished by any heading or emphasis from other parts of the text. Here are the few words which by unanimous acceptance have become perhaps the most prominent and the most tenaciously-held principle of American national policy—though they have never had any legislative support and impose no legal obligation upon anybody:

In the wars of the European powers in matters relating to themselves we have never taken any part, nor does it comport with our policy so to do. It is only when our rights are invaded or seriously menaced that we resent injuries or make preparation for our defense. With the movements in this hemisphere we are, of necessity, more immediately connected, and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially different in this respect from that of America. This difference proceeds from that which exists in their respective governments. And to the defense of our own which has been achieved by the loss of so much blood and treasure, and matured by the wisdom of their most enlightened citizens, and under which we have enjoyed unexampled felicity, this whole nation is devoted. We owe it, therefore, to candor, and to the amicable relations existing between the United States and those powers, to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered, and shall not interfere. But with the governments who have declared their independence, and maintained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them, or controlling in any other manner their destiny, by any European power, in any other light than as the manifestation of an unfriendly disposition toward the United States.

Though this is expressed in terms used in diplomacy, nobody has ever had any doubt as to its meaning. It meant and still means that if Spain or any other European power or combination of powers shall attempt by force of arms to compel any American country having a republican form of government to accept or become subject to a monarchical form the United States, in President Monroe's opinion, should go to war to prevent such coercion. President Monroe's message, from which the quotation is made, may be most conveniently found in "Messages and papers of the Presidents," v. 2, p. 207. The quotation is from p. 218.

The most practical and serious application of the doctrine was made by President Cleveland, Dec. 17, 1895, when, after having failed to induce Great Britain to submit to arbitration her dispute with Venezuela over the boundary between that country and British Guiana, he sent in a special message asking Congress for an appropriation to pay the expense of a wholly American (United States) commission, which should determine the true boundary. This having been found, he proposed that the United States should require that it be observed. The appropriation was granted and the commission was appointed and began its work, but before it had made a report Great Britain consented to an arbitration. For this message, see "Messages and papers of the Presidents," v. 9, p. 655.

A few other public document references to the Monroe doctrine follow:

47th Cong., 1st sess., S. ex. doc. 194 (serial 1991), captioned "The Clayton-Bulwer treaty and the Monroe doctrine." It is a letter from the Secretary of State to the American Minister at London, dated May 8, 1882, with sundry explanatory papers and documents selected from the archives of the State Department. It shows how often and how emphatically the United States Government has asserted the Monroe doctrine. 203 pages.

56th Cong., 2d sess., S. doc. 41 (serial 4033). A conversation with Senator Stephen A. Douglas, in the summer of 1859, was reported by his brother-in-law, J. Madison Cutts, with a view to publication. It appears to have been first published in a newspaper in Dec. 1881. On Dec. 11, 1900, it was ordered to be printed as S. doc. 41. It refers to a speech in opposition to the Clayton-Bulwer treaty by Mr. Douglas Mar. 10 and 17, 1853, gives an interesting narrative of events connected with the ratification of the treaty in 1850, and concludes with a pointed note on the Monroe doctrine. 5 pages.

57th Cong., 1st sess., S. doc. 26 (serial 4220). This is correspondence between President Monroe and ex-President Jefferson, in Oct. 1823, a few weeks before the publication of the Monroe doctrine message. When Monroe had the message in mind he thought it wise to consult the two national sages, ex-Presidents Jefferson and Madison. Mr. Jefferson, then more than 80 years of age, wrote a vigorous letter sustaining the Monroe doctrine. Monroe's and Jefferson's letters are printed in this document. 4 pages.

58th Cong., 1st sess., S. doc. 7 (serial 4563). This is an English view of the Monroe doctrine, by Sir Frederick Pollock, an eminent barrister and writer on legal subjects. It is a fair-minded statement, giving much information as to the conditions existing in President Monroe's time and since and as to the friendly attitude of England toward the doctrine. 18 pages.

#### NATIONAL ACADEMY OF SCIENCES

The National Academy of Sciences was organized at New York, Apr. 22, 1863, under an act of incorporation which had been approved by President Lincoln Mar. 4 of the same year. Its purpose was and is to give to the Government the benefit of scientific

counsel in relation to matters of practical administration. It has reported on many such matters which have been submitted to it by various Government Departments. Its members do not ask nor accept pay from the Government for services rendered, though the necessary expense of some of its investigations has been met by the public treasury. The Academy had at organization 50 members, and has increased to 88, with 26 foreign associates, though 109 members and 53 foreign associates have died. Only scientists of acknowledged eminence are admitted to membership. Besides the annual reports, Memoirs, and special reports, which are numbered Congressional documents, the Academy has published (at Cambridge, 1865, 1866, 1867) three volumes called "Annual of the National Academy of Sciences," which contain the first three annual reports, proceedings, lists of members, and biographical memoirs; also, a Constitution and membership pamphlet, presumed to be issued annually but with many breaks in the series; also, a volume of Proceedings, in three parts, issued at Washington, 1877, 1884, 1895; also five volumes of Biographical memoirs, published at Washington, 1877, 1886, 1895, 1902, 1905. The annual reports for 1868-72, 1874-77, and 1882 were not issued in the Congressional set, and are not known to have been issued in any form. The first volume of the Memoirs was not issued in the Congressional set, but was published in cloth by the Government Printing Office, 1866. There are also unnumbered cloth editions of the other volumes. The Memoirs are original scientific monographs, which are first printed in separate pamphlets, quarto, and later in collected volumes.

#### NOTABLE REPORTS AND ADDRESSES

A list, continued from the May Monthly catalogue, of a few of the notable reports and addresses that have been made to Congress, showing where they may be found in the "sheep set":

**Alexander, Columbus.**

Safe-burglary conspiracy. 1874. 43d Cong. 1st sess., S. rp. 477.

**Cass, Lewis.**

Reports on uniforms of American diplomatists (history of the question, which was long in hot dispute). 36th Cong. 1st sess., S. ex. doc. 31.

**Dall, William Healey.**

Marine mollusca from localities between capes Hatteras and Roque. 1885. 49th Cong. 2d sess., H. mis. doc. 163.

**Daniel, John Warwick.**

Oration at dedication of Washington Monument, Feb. 21, 1885. 48th Cong. 2d sess., S. mis. doc. 56.

**Davidson, George.**

Report on Alaska. 1867. 40th Cong. 2d sess., H. ex. doc. 177.

**Davis, David.**

Report on war claims at St. Louis. 1862. 37th Cong. 2d sess., H. ex. doc. 94.

**Davis, John.**

Report of work of first Alabama Claims Commission. 1877. 44th Cong. 2d sess., S. ex. doc. 21.

**De Caidry, William A.**

History of War Department. 1878. 45th Cong. 3d sess., S. rp. 555 (pt. 2, p. 372).

**Delafield, Richard.**

Art of war in Europe, 1854-6. 36th Cong. 1st sess., S. ex. doc. 59.

**Derby, George Horatio.**

Reconnaissance of Tulare Lake Valley and vicinity. 1850. 32d Cong. 1st sess., S. ex. doc. 621.

**Dickins, Asbury.**

Claim of payment for services as Secretary of State and Secretary of the Treasury. 1856. 34th Cong. 1st sess., H. rp. 94.

**Diller, Joseph Silas.**

Late volcanic eruption in northern California and its peculiar lava. 1891. 52d Cong. 1st sess., H. mis. doc. 24.

**Dix, Dorothea Lynde.**

Memorial relative to aid of indigent insane. 1848. 30th Cong. 1st sess., S. mis. doc. 150.

**Doane, Gustavus C.**

Yellowstone expedition. 1870. 41st Cong. 3d sess., S. ex. doc. 51.

**Dodge, Henry.**

Journal of expedition to Rocky Mountains. 1835. 24th Cong. 1st sess., H. doc. 181.

**Dorr, Thomas Wilson.**

Act of Rhode Island Assembly annulling judgment of treason against Dorr. 1854. 33d Cong. 1st sess., H. mis. doc. 95.

**Dutton, Clarence Edward.**

Tertiary history of Grand Cañon district. 1882. 48th Cong. 2d sess., H. mis. doc. 35.

**Dyrenforth, Robert G.**

Experiments in production of rainfall. 1892. 52d Cong. 1st sess., S. ex. doc. 45.

**Eaton, Dorman Bridgman.**

Report concerning civil service in Great Britain. 1879. 46th Cong. 2d sess., H. ex. doc. 1, pt. 7.

**Edwards, Ninian.**

The "A. B. plot." 1824. 18th Cong. 1st sess., H. doc. 139.

**Emmons, Samuel Franklin.**

Geology and mining resources of Leadville. 1886. 49th Cong. 1st sess., H. mis. doc. 397.

**Emory, William Hemsley.**

Report of Mexican Boundary Commission. 1858. 34th Cong. 1st sess., S. ex. doc. 108.

**Ericsson, John.**

Relief of his estate and history of his inventions. 1892. 52d Cong. 1st sess., H. rp. 1225.

**Everett, Edward.**

Report on Jewett's plan for stereotyping catalogue entries. 1850. 32d Cong., special sess. Senate, S. mis. doc. 1, p. 81.

This list will be continued.

---

BINDING THE MONTHLY CATALOGUE

*A title-page for the 12 numbers of the catalogue, July, 1907-June, 1908, accompanies this issue. Duplicate numbers of the Monthly catalogue can not be supplied.*

# MONTHLY CATALOGUE

No. 162

JUNE

1908

**Adjutant-General's Department.** Army list and directory, officers of Army, June 20, 1908; [no. 103]. 1908. 113 p. large 8° [Monthly.] \* Paper, 15c. single copy, \$1.50 a yr.

**Adulterations.** See Butter.

**Africa, Western.** West coast of Africa, Lagos River to Forcados River, from latest information; chart 2351. Scale 1° lat.=15.08 in. Washington, Hydrographic Office, May, 1908. 28.2 × 41 in. (Hydrographic Office.) † 50c.

**Agra, Okla.** Oklahoma, Agra quadrangle, lat. 35° 45'–36°, long. 96° 45'–97°. Scale 1:62,500, contour interval 20 ft. [Washington, Geological Survey] edition of Feb. 1908. 17.5 × 14.3 in. (Geological Survey. Topographic sheet.) † 5c.

**Agricultural experiment stations.** List of station publications received by Office of Experiment Stations during May, 1908. June 8, 1908. n. t. p. 6 p. (Experiment Stations Office. [Publication] 1097.) [Monthly.] †

See also Agriculture—Alaska Agricultural Experiment Stations—Hawaii Agricultural Experiment Station.

## **Agriculture.**

Agricultural education, including nature study and school gardens [with bibliography]; by James Ralph Jewell. 2d edition revised. 1908. 148 p. (Education Bureau. Bulletin 2, 1907; whole no. 368.) \* Paper, 15c. 7-35376/4

Experiment station record, v. 19, no. 9; May, 1908. 1908. c. t. o. viii + 801–900 p. (Experiment Stations Office.) \* Paper, \$1.50 a vol. (12 nos. and index).

Experiment station work 3. 1898 [reprint 1908]. 32 p. 2 il. (Experiment Stations Office; Agriculture Dept., Farmers' bulletin 69.) \* Paper, 5c. Agr 6-305/3

Same, v. 3, no. 6. June 26, 1908. iii + 141–168 p. (Experiment Stations Office. [Publication] 1086.) [Same as Farmers' bulletin 320.] \* Paper, 5c. Agr 6-305/3

List of publications of Office of Experiment Stations on agricultural education; corrected to June 1, 1908. June 17, 1908. n. t. p. 12 p. (Experiment Stations Office. [Publication] 1094.) †

See also Montana.

## **Agriculture Department.**

Advance sheets of 3d edition of Checklist of United States public documents, A, Agriculture Department, [class] A27, Statistics Bureau, May 9, 1908. [1908.] n. t. p. 7 l. 4° (Documents Office.) † 8-7365

Same, A28, Vegetable Physiology and Pathology Division, May 12, 1908. [1908.] 2 l. 4° (Documents Office.) † 8-7365

48240—08—2

527

**Agriculture Department—Continued.**

Same, A29, Weather Bureau, May 13, 1908. [1908.] n. t. p.  
16 l. 4° (Documents Office.) † 8-7365

Same, A30, Appointment Clerk, May 14, 1908. [1908.] 1 p. 4°  
(Documents Office.) † 8-7365

Same, A31, Chief Clerk, May 14, 1908. [1908.] 1 p. 4° (Docu-  
ments Office.) † 8-7365

Same, A32, Food and Drug Inspection Board, May 14, 1908.  
[1908.] 1 p. 4° (Documents Office.) † 8-7365

Same, A 33, Solicitor of Department of Agriculture, May 14, 1908.  
[1908.] 1 p. 4° (Documents Office.) † 8-7365

**Farmers' bulletin—**

69. Experiment station work 3, 1898 [reprint 1908]. 32 p. 2 il.  
(Experiment Stations Office.) \* Paper, 5c. Agr 6-305/3

322. Milo as dry-land grain crop; by Carleton R. Ball and  
Arthur H. Leidigh. June 3, 1908. 23 p. 9 il. (Plant  
Industry Bureau.) \* Paper, 5c. Agr 8-547/3

324. Sweet potatoes; by W. R. Beattie. May 23, 1908. 39 p.  
24 il. (Plant Industry Bureau.) \* Paper, 5c. Agr 8-539/2

Farmers' bulletin subject index (revised to include bulletin 320).  
May 9, 1908. n. t. p. 31 p. (Publications Division. Circular  
4.) \* Paper, 5c. Agr 7-1216/2

Farmers' bulletins [available for distribution]. June 12, 1908.  
n. t. p. 3 p. (Publications Division. [Publication] 603.) †

Monthly list of publications [of Department], Apr.-May, 1908.  
May 29, 1908. n. t. p. 4 p. (Publications Division. [Pub-  
lication] 605.) †

Same [for foreign distribution], Mar. 1908. Mar. 31, 1908. n. t. p.  
3 p. (Publications Division. [Publication] 600.) †

See also Cattle—Sheep.

**Alaska.** See Controller Bay—Pleistocene fossils—Seward Penin-  
sula.

**Alaska Agricultural Experiment Stations.** Annual report, [calen-  
dar year] 1907. June 15, 1908. 98 p. 3 il. 7 pl. (Experiment  
Stations Office. [Publication] 1082.) \* Paper, 15c.

**Albay Gulf.** Albay Gulf and part of Lagonoy Gulf, east coast of  
Luzon; chart 4221. Scale 1:100,000. Washington, Coast and  
Geodetic Survey, May, 1908, first published 1904. 28.1 × 39.9  
in. (Coast and Geodetic Survey.) † 50c.

**Alcohol.**

Denatured alcohol, relative to deposit of soot by denatured alco-  
hol when burned in lamp not provided with means for aerating  
flame. May 27, 1908. n. t. p. 3 p. (Internal Revenue Com-  
missioner. [Treasury decision] 1365.) [From Treasury deci-  
sions, v. 15, no. 22.] †

Regulations relating to manufacture, sale, and use of denatured  
alcohol. June 3, 1908. 14 p. (Internal Revenue Commis-  
sioner. Regulations no. 30, supplement 1.) †

**Ambas Bay.** See Duala, Kamerun.

**American Republics.** See Latin America.

**American Republics Bureau.**

NOTE.—This Bureau sells its own monthly bulletins, handbooks, etc.,  
at prices usually ranging from 5c. to \$1.00. Address the Director of  
the Bureau.

**American Republics Bureau—Continued.**

Advance sheets of 3d edition of Checklist of United States public documents, AR, American Republics Bureau, May 20, 1908. [1908.] n. t. p. 8 l. 4° (Documents Office.) † 8-7365

Bulletin [v. 26, no. 5]; May, 1908. [1908.] liii + 963-1210 + [ii] p. [9] por. [16] pl. [18] p. of pl. map. [English, Spanish, Portuguese, and French. Monthly.] † Paper, 25c. single copy, \$2.00 a yr.

NOTE.—This number of the Bulletin contains also the addresses, etc., at the laying of the corner stone of the new building of the American Republics Bureau at Washington, D. C., May 11, 1908.

Same [no. 6]; June, 1908. [1908.] [lxviii] + 1211-1434 p. [2] por. [4] pl. [18] p. of pl. [English, Spanish, Portuguese, and French. Monthly.] † Paper, 25c. single copy, \$2.00 a yr.

**Animal Industry Bureau.**

## Bulletin—

105. Varieties of cheese, descriptions and analyses [with sources of analytical data]; by C. F. Doane and H. W. Lawson. June 27, 1908. 72 p. \* Paper, 10c. Agr 8-666/3

106. Experiments on digestibility of prickly pear by cattle; by R. F. Hare. May 28, 1908. 38 p. 1 il. 1 pl. \* Paper, 10c. Agr 8-541/2

See also Cattle—Sheep.

**Animals, Fossil.** See Pleistocene fossils.

**Appointment Clerk,** Agriculture Dept. See Agriculture Department.

**Appraisers.** Reappraisements of merchandise by general appraisers [on May 21-June 23, 1908]; June 1-29, 1908. 1908. 4° (Reappraisement circulars 1819-34.) [Weekly.] †

**Arbitration.**

Convention between United States and Great Britain, arbitration; signed Washington, Apr. 4, 1908, proclaimed June 5, 1908. 1908. 5 p. (State Dept.) † 8-35511

Convention between United States and Spain, arbitration; signed Washington, Apr. 20, 1908, proclaimed June 3, 1908. 1908. 5 p. (State Dept.) [English and Spanish.] † 6-35548

**Architect, Supervising.** See Draftsmen.

**Army.** See Horses.

**Army list and directory.** See Adjutant-General's Department.

**Artillery.** Journal of United States artillery, v. 29, no. 3, May-June, 1908; whole no. 91. Fort Monroe, Va., Coast Artillery School Press, 1908. [2] + 225-340 p. [24] il. [14] pl. (incl. 4 pl. on 2 l.). (Coast Artillery School, Fort Monroe.) [Bimonthly.] † Paper, 50c. single copy, \$2.50 a yr. 6-13361/7

**Artillery School,** Fort Monroe. See Coast Artillery School.

**Asbestos.** Production of asbestos, [calendar year] 1907; by J. S. Diller. 1908. 14 p. (Geological Survey.) [From Mineral resources, 1907.] †

**Atlantic Coast.** Statement of quantities and values of certain fishery products landed at Boston and Gloucester, Mass., by American fishing vessels, May, 1908. 1 p. oblong 8° (Fisheries Bureau. Statistical bulletin 214.) †

**Atlantic Ocean.** Pilot chart of north Atlantic Ocean, June, 1908; chart 1400. Scale  $1^{\circ}$  long. = 0.27 in. Washington, Hydrographic Office, May 28, 1908.  $21 \times 32$  in. (Hydrographic Office.) [Monthly.] † 10c.

**Attorney, Power of.** See Power of attorney.

**Attorneys.** See Judges.

**Audit clerks.** Auditing clerk (male) Philippine service [announcement of examination] July 22, 1908. June 18, 1908. [2] p.  $4^{\circ}$  (Civil Service Commission.) †

**Auditor for Treasury Department.** See Bonds.

**Automobiles.** Motor machines. June, 1908. 144 p. (Dept. of Commerce and Labor doc. 79, pt. 2; Manufactures Bureau, Special consular reports, v. 40, pt. 2.) \* Paper, 15c. 7-35343

**Bananas.** Topeka Banana Dealers' Association v. St. Louis & San Francisco Railroad Company et al.; Missouri Valley Banana Dealers' Association v. [same]; Missouri & Kansas Shippers' Association v. [same]; submitted May 15, 1908, decided June 2, 1908; report of [Interstate Commerce] Commission. 1908. c. t. o. p. 620-632. (Interstate Commerce Commission.) [From Reports, v. 13.] †

**Bank-notes.** See National bank notes.

**Banks and banking.** See National banks.

**Belgium.** See Insurance.

**Bermuda.** Bermuda, customs tariff act, 1907. 1908. n. t. p. 4 p. (Manufactures Bureau. Tariff series 11.) † 8-35535

**Bibliography Division, Library of Congress.** See Elections—Insurance.

**Big Burros national forest.** See Gila national forest.

**Biological Survey Bureau.**

Circular—

32, 2d revised edition. Directions for destruction of prairie dogs; [by C. Hart Merriam]. June 25, 1908. n. t. p. 3 p. 1 il. \* Paper, 5c.

64. Destruction of cotton boll weevil by birds in winter; by Arthur H. Howell. June 19, 1908. n. t. p. 5 p. 1 il. \* Paper, 5c. Agr 8-663/2

**Birds.** Destruction of cotton boll weevil by birds in winter; by Arthur H. Howell. June 19, 1908. n. t. p. 5 p. 1 il. (Biological Survey Bureau. Circular 64.) \* Paper, 5c. Agr 8-663/2

**Blalock Island.** Oregon-Washington, Blalock Island quadrangle, lat.  $45^{\circ} 30' - 46^{\circ}$ , long.  $119^{\circ} 30' - 120^{\circ}$ . Scale 1:125,000, contour interval 50 ft. [Washington, Geological Survey] edition of Apr. 1908.  $17.5 \times 12.3$  in. (Geological Survey. Topographic sheet.) † 5c.

**Boat-racing.** Regulation of regattas or marine parades [act of Congress]. June 3, 1908. 2 p.  $4^{\circ}$  (Commerce and Labor Dept., Dept. circular 169; Bureau of Navigation.) †

**Boats.** Water lines, tentative classifications of operating revenues and operating expenses. May 15, 1908. 21 p.  $4^{\circ}$  ([Interstate Commerce Commission.]) †

**Boll-weevils.** See Mexican cotton-boll weevils.

**Bombay, India.** Port of Bombay, west coast of India, from British survey in 1892 and 1893; chart 2462. Scale naut. m.=6 in. Washington, Hydrographic Office, May, 1908. 39.7 × 26.7 in. (Hydrographic Office.) † 50c.

### **Bonds.**

Notice to begin new series of bond numbers. June 16, 1908. 1 p. 4° (Treasury Dept., Dept. circular 41, 1908; Auditor for Treasury Dept.) †

Originals only of bonds, etc., to be approved by Secretary. June 24, 1908. 1 p. 4° (Treasury Dept., Dept. circular 45, 1908; Division of Appointments.) †

Seals required in execution of bonds. June 22, 1908. 1 p. 4° (Treasury Dept., Dept. circular 43, 1908; Division of Appointments.) †

**Bonds of officers, etc.** See Guaranty companies.

### **Bonds of United States.**

Caveat list of United States registered bonds, June 1, 1908. [1908.] 1 p. 1° (Loans and Currency Division.) [Monthly.] †

Market prices and investment values of outstanding securities [May, 1908]. June 1, 1908. 2 p. 4° (Treasury Dept., Dept. circular 35, 1908; Government Actuary.) †

See also National bank notes.

**Bongao, Port.** See Borneo.

### **Bookkeeping and Warrants Division.**

Comparative statement of receipts and expenditures of United States [for month and 11 months ending May, 1907 and 1908]. June 1, 1908. 1 p. oblong 8° [Monthly.] †

Statement of Treasury, June 1-30, 1908. [1908.] Each 2 l. 4° [Daily except Sundays and holidays.] †

**Borneo.** Sulu Archipelago and north east coast of Borneo, from [British] surveys, 1871-92, with additions from Spanish surveys, scale 1° lat.=5.9 in.; with insets, Northern entrance of channel between Lapak and Siassi islands, from Spanish survey, 1883, scale naut. m.=2.87 in., Port Bongao, Tawi Tawi Group, from Spanish survey, 1873, scale naut. m.=2 in.; chart 1728. Washington, Hydrographic Office, May, 1908. 25.6 × 39.1, 7.6 × 7.1, and 8 × 10.2 in. (Hydrographic Office.) † 50c.

**Boston, Mass.** See Atlantic Coast.

**Boundaries.** See Canadian boundary.

**Bran.** Marshall Michel Grain Company *v.* Missouri Pacific Railway Company; submitted Apr. 11, 1908, decided June 1, 1908; report of [Interstate Commerce] Commission. 1908. c. t. o. p. 566-568. (Interstate Commerce Commission.) [From Reports, v. 13.] †

**Breeding.** See Sheep.

**Briquets.** Binders for coal briquets, investigations made at fuel-testing plant, St. Louis, Mo. [with bibliography]; by James E. Mills. 1908. 56 p. 1 il. (Geological Survey. Bulletin 343.) \* Paper, 10c. GS 8-134/2

**Geological Survey.**

NOTE.—The publications of the United States Geological Survey consist of annual reports (restricted to one volume each, beginning with report for 1902), bulletins, Mineral resources, Professional papers, and Water-supply papers, formerly Water-supply and irrigation papers; and maps, Monographs, and folios of the Geologic atlas and the Topographic atlas of the United States, which are sold at prices ranging from 5c. to \$11.00 each. A wholesale rate has been established for topographic and geologic folios, whenever the sum transmitted solely for folios at the wholesale price amounts to at least \$5.10; that is, a

**Geological Survey—Continued.**

discount of 40 per cent will be given whenever 34 or more folios that sell singly for 25c., or their equivalent in higher priced folios, are ordered at one time. Address the Director of the Geological Survey, Washington.

**Bulletin—**

328. Gold placers of parts of Seward Peninsula, Alaska, including Nome, Council, Kougarok, Port Clarence, and Goodhope precincts; [articles] by Arthur J. Collier, Frank L. Hess, Philip S. Smith, and Alfred H. Brooks. 1908. 343 + v p. 19 il. 11 pl. (incl. 4 maps in pocket). \* Paper, 70c. GS 8-242/5

335. Geology and mineral resources of Controller Bay region, Alaska [with bibliography], by G. C. Martin; [and preface, by Alfred H. Brooks]. 1908. 141 + v p. 2 il. 10 pl. (incl. maps, 3 in pocket). \* Paper, 70c. GS 8-248/3

343. Binders for coal briquets, investigations made at fuel-testing plant, St. Louis, Mo. [with bibliography]; by James E. Mills. 1908. 56 p. 1 il. \* Paper, 10c. GS 8-134/2

**Topographic sheets. See names of places.**

NOTE.—The Geological Survey is making a topographic map of the United States. The sheets of which it is composed are projected without reference to political divisions, and are designated by some prominent town or natural feature found on them. Three scales are used, 1:62,500, 1:125,000, and 1:250,000. These correspond, approximately, to 1 mile, 2 miles, and 4 miles to 1 linear inch on the map. The size, unless otherwise given, is about 17.5 inches in height by 11.5 to 16 inches in width, exclusive of the margin, the width varying with the latitude. A description of the topographic map is printed on the reverse of each sheet.

About one-third of the area of the country, excluding outlying possessions, has been mapped, nearly every State being represented. Massachusetts, Connecticut, Rhode Island, New Jersey, and the District of Columbia are completely mapped. Sheets of the regular size are sold by the survey at 5c. each; but in lots of 100 or more copies, whether of the same sheet or of different sheets, the price is 3c. each. In no case can orders be filled at the wholesale rate unless the sum remitted solely for topographic maps amounts to at least \$3.00.

**Smithsonian Institution.**

NOTE.—In its latest price-list the Smithsonian Institution publishes this note: "The publications of the Smithsonian Institution are, 1, Contributions to knowledge; 2, Miscellaneous collections; 3, annual reports; 4, special publications. No sets of these are for sale or distribution, as most of the volumes are out of print. The volumes of Contributions and Collections are distributed only to public libraries and learned institutions in this country and abroad. A small edition of the papers in these two series is printed separately for sale or exchange. The Smithsonian reports are distributed by the Institution to libraries throughout the world, and may be had by purchase at cost from the Superintendent of Documents. The papers printed in the annual reports are published separately for free distribution. Publications should be ordered by the *serial* number. Remittances should be made payable to 'Smithsonian Institution.' An application from a library should state the number of volumes in the library and the date of establishment, and have the indorsement of a Member of Congress. Applicants for these publications are asked to state the ground of their requests, as the Institution is able to supply papers only as an aid to the research or study in which the applicant is especially interested." The annual reports are the only Smithsonian publications that are regularly issued as public documents. All the others are paid for from the private funds of the Institution.

Smithsonian miscellaneous collections, v. 51, pub. 1807; Smithsonian exploration in Alaska in 1907 in search of Pleistocene fossil vertebrates; by Charles W. Gilmore. Washington, Smithsonian Institution, 1908. 38 p. 4 il. 13 pl. (incl. maps).
